

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Petition to Expunge Third Party Requester's Improper Submission of Declarations and Strike Comments Directed to Examiner's Determination filed 06/26/2013; Patent Owner's Comments in Response to Examiner's Determination filed 05/10/2013; Examiner's Determination Under 37 C.F.R. § 41.77(d) mailed 04/10/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Decision on Petition Under 37 C.F.R. § 1.183 to Request Examiner Enter Evidence mailed 03/20/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)	Examiner's Answer to Appeal Brief mailed 03/14/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)	Examiner's Answer to Appeal Brief mailed 10/01/2012

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings filed by Cellco Partnership d/b/a Verizon Wireless, involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/001,922)	Patent Owner's Supplemental Response to Action Closing Prosecution filed 05/15/2013; Patent Owner's Response to Action Closing Prosecution filed 05/09/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/001,923)	Patent Owner's Supplemental Response to Office Action filed 04/29/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,352,300 (Control No. 95/001,924)	Patent Owner's Response to Action Closing Prosecution filed 05/09/2013; Action Closing Prosecution mailed 04/09/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,395,345 (Control No. 95/001,925)	Patent Owner's Supplemental Response to Office Action filed 05/06/2013

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/001,926)	Patent Owner's Reply to Action Closing Prosecution filed 04/05/2013; Action Closing Prosecution mailed 03/05/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,415,530 (Control No. 95/001,927)	Right of Appeal Notice mailed 05/31/2013; Action Closing Prosecution mailed 04/03/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/001,928)	Patent Owner's Reply to Action Closing Prosecution filed 04/05/2013; Action Closing Prosecution mailed 03/05/2013

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL61-NPL109.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 1:11-cv-06698-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00333-LED)	Notice of Appeal Filed
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> , No. 1:11-cv-06696-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00326-LED)	Notice of Appeal Filed
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 1:11-cv-06697-RJH (S.D. New York) (transferred from E.D. Texas; No. 6:09-cv-00327-LED)	Notice of Appeal Filed
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2
7	<i>Realtime Data, LLC d/b/a IXO v. CME Group Inc., et al. (II)</i> , No. 6:10-cv-246 (E.D. Texas)	Consolidated with Case No. 4
8	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al. (II)</i> , No. 6:10-cv-247 (E.D. Texas)	Consolidated with Case No. 2
9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC d/b/a IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Notice of Appeal Filed

Updated court docket listings downloaded July 8, 2013 for litigations previously disclosed and pending are submitted herewith as NPL119-NPL122.

*Realtime Data, LLC d/b/a IXO v. MetroPCS Texas, LLC et al.*

Applicants submit herewith documents related to the above-listed litigation as documents NPL27-NPL41.

Realtime Data LLC d/b/a/ IXO v. Morgan Stanley, et al.;  
Realtime Data LLC d/b/a/ IXO v. CME Group Inc., et al.; and  
Realtime Data LLC d/b/a/ IXO v. Thomson Reuters Corp., et al.

Applicants submit herewith documents related to the above-listed litigations as documents US1-US3 and NPL1-NPL26 with confidential information redacted.

Information Disclosure Statement

Listed on accompanying IDS Forms PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Atty. Dkt. No. 2855.004000B

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed before the mailing of a first Office Action and after the filing of a request for continued examination under 37 C.F.R. § 1.114. No statement or fee is required.

Documents US1-US8 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL122 are cited on the attached form PTO/SB/08B. Copies of documents NPL1-NPL15 and NPL17-NPL122 are submitted herewith. Due to its file format, document NPL16 cannot be submitted electronically, and is therefore presented on the accompanying CD labeled as document NPL16, submitted via hand-carry. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S. patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL42 is a copy of a Notice of Allowance mailed on June 21, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL43 is a copy of a Final Office Action mailed on June 26, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL44 is a copy of a Notice of Allowance mailed on July 12, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL45 is a copy of a Notice of Allowance mailed on July 16, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL46 is a copy of a Non-Final Office Action mailed on July 20, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/482,800.

Document NPL47 is a copy of a Notice of Allowance mailed on November 6, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL48 is a copy of a Notice of Allowance mailed on November 15, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL49 is a copy of a Non-Final Office Action mailed on November 29, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL50 is a copy of a Final Office Action mailed on December 4, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL51 is a copy of a Final Office Action mailed on December 13, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL52 is a copy of a Supplemental Notice of Allowability mailed December 18, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL53 is a copy of a Notice of Allowance mailed December 28, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL54 is a copy of a Non-Final Office Action mailed on January 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL55 is a copy of a Non-Final Office Action mailed on February 19, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/482,800.

Document NPL56 is a copy of a Notice of Allowance mailed on March 4, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL57 is a copy of a Non-Final Office Action mailed on April 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL58 is a copy of a Notice of Allowance mailed on April 24, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL59 is a copy of a Notice of Allowance mailed on May 14, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL60 is a copy of a supplemental Notice of Allowance mailed on May 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL110 is a copy of a Notice of Allowance mailed on June 17, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL111 is a copy of a supplemental Notice of Allowance mailed on June 18, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL112 is a copy of supplemental Notice of Allowance mailed on July 2, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL113 is a copy of a Non-Final Office Action mailed on July 3, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

The identification of these actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), and 11/551,211, filed October 19, 2006 (now U.S. Patent No. 8,112,619), in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE KESSLER, GOLDSTEIN & FOX P.L.L.C.

Commissioner:

Transmitted herewith for appropriate action are the following documents:

1. Online Credit Card Payment Authorization in the amount of **\$12,300.00** to cover:
  - \$1,400.00** Three-Month Extension of Time Fee;
  - \$1,200.00** Request for Continued Examination Fee;
  - \$ 160.00** Terminal Disclaimer Fee;
  - \$9,120.00** Excess Claims Fee;
  - \$ 420.00** Independent Excess Claim Fee;
2. Petition for Extension of Time Under 37 C.F.R. § 1.136(a) Form (PTO/SB/22);
3. Request for Continued Examination (RCE) under 37 C.F.R. § 1.114(c);
4. Terminal Disclaimer To Obviate A Double Patenting Rejection Over "Prior" Patents;
5. Submission Under 37 C.F.R. § 1.114(c) and Preliminary Amendment Under 37 C.F.R. § 1.115;
6. Third Supplemental Information Disclosure Statement;
7. Form PTO/SB/08a (1 sheet) listing (8) documents (US1-US8);
8. Form PTO/SB/08b (13 sheets) listing (122) documents (NPL1-NPL122);
9. Electronic copies of cited documents (NPL1-NPL15 and NPL17-NPL122);
10. CD-Rom with cited document NPL16 (submitted via hand-carry); and

**TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING REJECTION OVER "PRIOR" PATENTS**

Docket Number (Optional)  
2855.004000B

In re Application of: FALLON et al.

Application No.: 13/118,122

Filed: May 27, 2011

For: SYSTEMS AND METHODS FOR ACCELERATED LOADING OF OPERATING SYSTEMS AND APPLICATION PROGRAMS

The owner\*, Realtime Data LLC, of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory terms of **prior patent** Nos. 7,181,608, 8,090,936, and 8,112,619 as the terms of said **prior patents** are defined in 35 U.S.C. 154 and 173, and as the terms of said **prior patents** are presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the **prior patents** are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory terms as defined in 35 U.S.C. 154 and 173 of the **prior patents**, "as the terms of said **prior patents** are presently shortened by any terminal disclaimer," in the event that said **prior patents** later:

- expire for failure to pay a maintenance fee;
- are held unenforceable;
- are found invalid by a court of competent jurisdiction;
- are statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321;
- have all claims canceled by a reexamination certificate;
- are reissued; or
- are in any manner terminated prior to the expiration of their full statutory term as presently shortened by any terminal disclaimer.

Check either box 1 or 2 below, if appropriate.

1.  For submissions on behalf of a business/organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the organization.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

2.  The undersigned is an attorney or agent of record. Reg. No. 37,575

July 9, 2013  
 Signature Date

Michael V. Messinger  
Typed or printed name

(202) 772-8667  
Telephone Number

- Terminal disclaimer fee under 37 CFR 1.20(d) included.

**WARNING: Information on this form may become public. Credit card information should not be included on this form. Provide credit card information and authorization on PTO-2038.**

\*Statement under 37 CFR 3.73(b) is required if terminal disclaimer is signed by the assignee (owner).  
Form PTO/SB/96 may be used for making this certification. See MPEP § 324.

FALLON, James J. *et al*

Appl. No.: 13/118,122

Filed: May 27, 2011

For: **Systems And Methods For  
Accelerated Loading Of Operating  
Systems And Application Programs**

Confirmation No.: 8978

Art Unit: 2115

Examiner: SURYAWANSHI, Suresh

Atty. Docket: 2855.004000B

**Submission Under 37 C.F.R. § 1.114(c) and  
Preliminary Amendment Under 37 C.F.R. § 1.115**

*Mail Stop RCE*

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Commissioner:

Filed concurrently herewith in the captioned application is a Request for Continued Examination (RCE). Prior to examination of the RCE on the merits, Applicants respectfully request that this Application be further amended as directed herein. Applicants submit the following Remarks in reply to the Office Action dated January 9, 2013 ("Final Action").

It is not believed that extensions of time or fees for net addition of claims are required beyond those that may otherwise be provided for in documents accompanying this paper. However, if additional extensions of time are necessary to prevent abandonment of this application, then such extensions of time are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required therefor (including fees for net addition of claims) are hereby authorized to be charged to our Deposit Account No. 19-0036.

***Amendments to the Claims***

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A method for providing accelerated loading of an operating system in a computer system, comprising:

maintaining a list of boot data ~~used for booting~~ ~~[[a]]~~ the computer system,

wherein at least a portion of boot data is associated with the list of boot data;

~~preloading~~ loading the at least a portion of boot data into a memory ~~upon~~ ~~initialization of the computer system~~;

accessing the loaded at least a portion of boot data in a compressed form from the memory; and

decompressing, on a just-in-time basis, the at least a portion of boot data in compressed form ~~accessed~~ from the memory at a rate that decreases boot time relative to loading the operating system in an uncompressed form ~~increases the effective access rate of the memory~~ ~~[[;]], and~~

~~utilizing the decompressed~~ wherein the at least a portion of decompressed boot data ~~in loading~~ is a portion of the operating system for the computer system.

2. (Currently Amended) The method of claim 1, further comprising:

updating the list of boot data by associating additional boot data with the list of boot data ~~list~~ ~~[[;]]~~

compressing the boot data preloaded into the memory with a data compression engine; and

compressing the additional boot data with ~~a random access~~ an encoder coupled to the data compression engine.

3. (Currently Amended) The method of claim 1, further comprising:

updating the list of boot data list by removing an association of additional boot data from the list of boot data.

4. (Currently Amended) The method of claim 1, further comprising:

updating the list of boot data by associating additional boot data with the list of boot data list; and

compressing at least a portion of the additional boot data with a data compression encoder.

5. (Cancelled)

6. (Currently Amended) A method, comprising:

maintaining a list of compressed boot data used for booting a computer system;

storing ~~the~~ compressed boot data associated with the list of compressed boot data on a boot device non-volatile memory;

~~initializing a central processing unit of the computer system;~~

loading the compressed boot data from the ~~boot device~~ non-volatile memory to a second memory;  
accessing the compressed boot data from the second memory; and  
decompressing the compressed boot data to provide decompressed boot data; and  
utilizing the decompressed boot data to boot the computer system, ~~wherein at least a portion of the boot data is accessed in compressed form~~  
wherein the accessing and the decompressing occur within a period of time which is less than a time to access the boot data from the non-volatile memory in an uncompressed form.

7. (Currently Amended) A system comprising:

a processor;

a memory; and

a non-volatile memory device configured to store [[:]] boot data in compressed form for booting the system ~~stored in compressed form in the non-volatile memory [[:]]~~ and logic code associated with the processor, the logic code stored in the non-volatile memory and comprising including instructions executable by the processor for maintaining a list of boot data used for booting the system, [[:]] and

wherein the processor is configured to load at least a portion of the compressed boot data in compressed form being preloaded into the memory, and to access the at least a portion of the boot data in compressed form and to decompress the at least a portion of the boot data in compressed form at a rate that decreases boot time relative to booting the system with uncompressed boot data being accessed and utilized to boot the system.

Atty. Dkt. No. 2855.004000B

8. (Currently Amended) The system of claim 7, further comprising:  
a data compression engine, coupled to the non-volatile memory, configured to compress the boot data; and  
a ~~random access encoder~~ data compression encoder, coupled to the data compression engine, configured to compress additional boot data.

9. (Currently Amended) A method of ~~preloading~~ loading an operating system for booting a computer system, comprising:  
storing substantially all of the operating system in compressed form on a ~~boot device~~ non-volatile memory;  
loading a first portion of the ~~compressed~~ operating system in compressed form from the ~~boot device~~ non-volatile memory to a second memory;  
accessing the first portion from the second memory in compressed form;  
decompressing the first portion to provide a decompressed first portion of the operating system;  
utilizing the decompressed first portion to partially boot the computer system;  
~~responsive to a request, locating a second portion of the compressed operating system using a boot data list and preloading~~ loading the a second portion of the operating system in compressed form from the ~~boot device~~ non-volatile memory to the second memory;  
accessing the second portion from the memory in compressed form; ~~and~~

decompressing the second portion to provide a decompressed second portion of the operating system; and

utilizing the decompressed second portion to further partially boot the computer system,

wherein the first and second portions are accessed and decompressed at a rate that is faster than accessing the first and second portions from the non-volatile memory in uncompressed form.

10. (Currently Amended) The method of claim 9, further comprising:

compressing additional boot data; and

storing the additional compressed boot data in the ~~boot device~~ non-volatile memory.

11. (Currently Amended) The method of claim 10, further comprising:

compressing the additional boot data with a ~~random-access~~ data compression encoder.

12. (Currently Amended) A method for providing accelerated loading of an operating system in a computer system, comprising:

~~maintaining a boot data list;~~

loading boot data in compressed form associated with ~~the~~ a boot data list ~~in compressed form~~ from a non-volatile boot device into a memory upon initialization of the computer system;

accessing the ~~compressed~~ boot data in compressed form from the memory;

~~decompressing as-needed the compressed boot data in compressed form accessed from the memory at a rate that increases the effective access rate of the memory~~  
decreases a time to load the operating system relative to loading the operating system with the boot data in uncompressed form; and

~~utilizing the decompressed boot data in-loading to load~~ the operating system for the computer system.

13. (Previously Presented) The method of claim 12, further comprising:  
compressing additional boot data with a random access encoder.

14. (Currently Amended) A method for providing accelerated loading of an operating system in a computer system, comprising:

maintaining a boot data list;

loading boot data associated with the boot data list from a non-volatile boot device into a memory in compressed form upon initialization of the computer system;

accessing the compressed boot data from the memory;

~~decompressing, on a just-in-time basis, the compressed boot data accessed from the memory at a rate that~~  
decreases a time to load the operating system relative to loading the operating system with the boot data in uncompressed form ~~increases the effective access rate of the memory;~~ and

~~utilizing the decompressed boot data in-loading the operating system for the~~ computer system.

15. (New) A method for providing accelerated loading of an operating system in a computer system, comprising:

accessing boot data for booting the computer system, wherein at least a portion of the boot data is in compressed form;

loading the boot data into a memory;

servicing requests for boot data from the computer system using the loaded compressed boot data, wherein the servicing requests include accessing compressed boot data and decompressing the compressed boot data at a rate that decreases an overall boot time relative to loading the operating system in uncompressed form.

16. (New) The method of claim 15, wherein the boot data comprises program code associated with the operating system.

17. (New) The method of claim 15, wherein the operating system comprises multiple files.

18. (New) The method of claim 15, wherein the boot data comprises program code associated with one or more application programs of the computer system.

19. (New) The method of claim 15, wherein the boot data comprises program code associated with a combination of the operating system and one or more application programs.

20. (New) The method of claim 18, wherein the one or more application programs comprises multiple files.

21. (New) The method of claim 15, further comprising:  
updating the boot data.

22. (New) The method of claim 15, further comprising:  
updating a list of the boot data.

23. (New) The method of claim 22, wherein the updating comprises:  
adding to the list any boot data requested by the computer system not previously stored in the list.

24. (New) The method of claim 22, wherein the updating comprises:  
removing from the list any boot data previously stored in the list and not requested by the computer system.

25. (New) The method of claim 15, further comprising:  
maintaining a boot data list.

26. (New) The method of claim 15, wherein the boot data is accessed from a non-volatile memory device.

27. (New) The method of claim 1, wherein the at least a portion of the boot data in compressed form represents a plurality of files.

28. (New) The method of claim 1, wherein the at least a portion of the boot data in compressed form comprises program code associated with the operating system.

29. (New) The method of claim 1, further comprising:  
compressing the at least a portion of the boot data with one or more advanced compression encoders to provide the at least a portion of the boot data in compressed form.

30. (New) The method of claim 1, wherein the decompressing comprises:  
decompressing the at least a portion of the boot data in compressed form utilizing one or more advanced decompression decoders.

31. (New) The method of claim 1, wherein the loading comprises:  
loading the at least a portion of the boot data in compressed form into a contiguous portion of the memory, and further comprising:  
decompressing the at least a portion of the boot data in compressed form into a different portion of the memory than the contiguous portion.

32. (New) The method of claim 1, wherein the memory is virtual.

33. (New) The method of claim 1, wherein the memory is physical.
34. (New) The method of claim 1, wherein the compressed boot data is larger than 512 kilobytes.
35. (New) The method of claim 1, wherein the at least a portion of the boot data in compressed form is larger than 640 kilobytes.
36. (New) The method of claim 1, wherein the compression ratio of the at least a portion of the boot data in compressed form is greater than 2.5:1.
37. (New) The method of claim 1, wherein the operating system comprises multiple files.
38. (New) The method of claim 1, wherein the boot data includes program code associated with one or more application programs of the computer system.
39. (New) The method of claim 1, wherein the boot data comprises program code associated with a combination of the operating system and one or more application programs.
40. (New) The method of claim 38, wherein the one or more application programs are comprised of multiple files.

41. (New) The method of claim 1, wherein the accessing comprises:  
accessing the at least a portion of the boot data in compressed form via direct  
memory access.

42. (New) The method of claim 1, wherein Huffman encoding is utilized to  
encode the at least a portion of the boot data in compressed form.

43. (New) The method of claim 1, wherein Lempel-Ziv encoding is utilized to  
encode the at least a portion of the boot data in compressed form.

44. (New) The method of claim 1, wherein a plurality of encoders are utilized to  
encode the at least a portion of the boot data in compressed form.

45. (New) The method of claim 6, wherein the compressed boot data represents  
a plurality of files.

46. (New) The method of claim 6, wherein the compressed boot data comprises  
program code associated with an operating system.

47. (New) The method of claim 6, further comprising:  
compressing the boot data with one or more advanced compression encoders to  
provide the compressed boot data.

48. (New) The method of claim 6, wherein the decompressing comprises:  
decompressing the compressed boot data with one or more advanced  
decompression decoders.

49. (New) The method of claim 6, wherein the loading comprises:  
loading the compressed boot data to a contiguous portion of the second memory,  
and wherein the decompressing comprises:  
decompressing the compressed boot data to a different portion of the second  
memory than the contiguous portion.

50. (New) The method of claim 6, wherein the second memory is virtual.

51. (New) The method of claim 6, wherein the second memory is physical.

52. (New) The method of claim 6, wherein the compressed boot data is larger  
than 512 kilobytes.

53. (New) The method of claim 6, wherein the compressed boot data is larger  
than 640 kilobytes.

54. (New) The method of claim 6, wherein the compression ratio of the  
compressed boot data is greater than 2.5:1.

Atty. Dkt. No. 2855.004000B

55. (New) The method of claim 46, wherein the operating system comprises multiple files.

56. (New) The method of claim 6, wherein the compressed boot data comprises program code associated with one or more application programs of the computer system.

57. (New) The method of claim 6, wherein the compressed boot data comprises program code associated with a combination of an operating system of the computer system and one or more application programs.

58. (New) The method of claim 56, wherein the one or more application programs includes multiple files.

59. (New) The method of claim 6, wherein the accessing comprises: accessing the compressed boot data via direct memory access.

60. (New) The method of claim 6, wherein Huffman encoding is utilized to encode the compressed boot data.

61. (New) The method of claim 6, wherein Lempel-Ziv encoding is utilized to encode the compressed boot data.

62. (New) The method of claim 6, wherein a plurality of encoders are utilized to encode the compressed boot data.

63. (New) The system of claim 7, wherein the boot data in compressed form represents a plurality of files.

64. (New) The system of claim 7, wherein the boot data comprises program code associated with an operating system.

65. (New) The system of claim 7, further comprising:  
one or more advanced compression encoders configured to compress the boot data to provide the boot data in compressed form.

66. (New) The system of claim 7, further comprising:  
one or more advanced decompression decoders configured to decompress the boot data in compressed form.

67. (New) The system of claim 7, wherein the processor is further configured to load the boot data in compressed form into a contiguous portion of the memory and to decompress the boot data in compressed form to a different portion of the memory than the contiguous portion.

68. (New) The system of claim 7, wherein the memory is virtual.

69. (New) The system of claim 7, wherein the memory is physical.

70. (New) The system of claim 7, wherein the boot data in compressed form is larger than 512 kilobytes.

71. (New) The system of claim 7, wherein the boot data in compressed form is larger than 640 kilobytes.

72. (New) The system of claim 7, wherein the compression ratio of the boot data in compressed form is greater than 2.5:1.

73. (New) The system of claim 7, wherein the boot data in compressed form is comprised of multiple files.

74. (New) The system of claim 7, wherein the boot data comprises program code associated with one or more application programs of the system.

75. (New) The system of claim 7, wherein the boot data comprises program code associated with a combination of an operating system of the system and one or more application programs.

76. (New) The system of claim 74, wherein the one or more application programs are comprised of multiple files.

77. (New) The system of claim 7, wherein the processor is further configured to access the at least a portion of the boot data in compressed form the memory via direct memory access.

78. (New) The system of claim 7, wherein the processor is further configured to utilize Huffman encoding to encode the boot data to provide the boot data in compressed form.

79. (New) The system of claim 7, wherein the processor is further configured to utilize Lempel-Ziv encoding to encode the boot data to provide the boot data in compressed form.

80. (New) The system of claim 7, further comprising:  
a plurality of encoders configured to encode the boot data in compressed form.

81. (New) The method of claim 9, wherein the operating system in compressed form represents a plurality of files.

82. (New) The method of claim 9, wherein the operating system in compressed form comprises program code associated with an operating system.

83. (New) The method of claim 9, further comprising:  
compressing the operating system with one or more advanced compression encoders to provide the operating system in compressed form.

84. (New) The method of claim 9, wherein the decompressing the first and second portions comprise:  
decompressing the first and second portions with one or more advanced decompression decoders.

85. (New) The method of claim 9, wherein the loading comprises:  
loading the operating system in compressed form into a contiguous portion of the second memory, and wherein the decompressing the first portion comprises:  
decompressing the first portion into a different portion of the second memory than the contiguous portion.

86. (New) The method of claim 9, wherein the memory is virtual.

87. (New) The method of claim 9, wherein the memory is physical.

88. (New) The method of claim 9, wherein the operating system in compressed form is larger than 512 kilobytes.

89. (New) The method of claim 9, wherein the operating system in compressed form is larger than 640 kilobytes.

90. (New) The method of claim 9, wherein the compression ratio of the operating system in compressed form is greater than 2.5:1.

91. (New) The method of claim 9, wherein the operating system is comprised of multiple files.

92. (New) The method of claim 9, wherein the operating system comprises program code associated with one or more application programs of the computer system.

93. (New) The method of claim 9, wherein the operating system in compressed form comprises program code associated with a combination of an operating system of the computer system and one or more application programs.

94. (New) The method of claim 92, wherein the one or more application programs are comprised of multiple files.

95. (New) The method of claim 9, wherein the accessing comprises:  
accessing the first portion from the second memory via direct memory access.

96. (New) The method of claim 9, wherein Huffman encoding is utilized to encode the operating system in compressed form.

97. (New) The method of claim 9, wherein Lempel-Ziv encoding is utilized to encode the operating system in compressed form.

98. (New) The method of claim 9, wherein a plurality of encoders are utilized to encode the operating system in compressed form.

99. (New) The method of claim 12, wherein the boot data in compressed form represents a plurality of files.

100. (New) The method of claim 12, wherein the boot data comprises program code associated with the operating system.

101. (New) The method of claim 12, further comprising;  
compressing the boot data in compressed form utilizing one or more advanced compression encoders to provide the boot data in compressed form.

102. (New) The method of claim 12, wherein the decompressing comprises:  
decompressing the boot data in compressed form utilizing one or more advanced decompression decoders.

103. (New) The method of claim 12, wherein the loading comprises:  
loading the boot data in compressed form into a contiguous portion of the  
memory, and wherein the decompressing comprises:  
decompressing the boot data in compressed form into a different portion of the  
memory than the contiguous portion.
104. (New) The method of claim 12, wherein the memory is virtual.
105. (New) The method of claim 12, wherein the memory is physical.
106. (New) The method of claim 12, wherein the boot data in compressed form  
is larger than 512 kilobytes.
107. (New) The method of claim 12, wherein the boot data in compressed form  
is larger than 640 kilobytes.
108. (New) The method of claim 12, wherein the compression ratio of the boot  
data in compressed form is greater than 2.5:1.
109. (New) The method of claim 12, wherein the operating system is comprised  
of multiple files.

110. (New) The method of claim 12, wherein the boot data comprises program code associated with one or more application programs of the computer system.

111. (New) The method of claim 12, wherein the boot data comprises program code associated with a combination of the operating system and one or more application programs.

112. (New) The method of claim 110, wherein the one or more application programs are comprised of multiple files.

113. (New) The method of claim 12, wherein the accessing comprises:  
accessing the boot data in compressed form from the memory via direct memory access.

114. (New) The method of claim 12, wherein Huffman encoding is utilized to encode the boot data in compressed form.

115. (New) The method of claim 12, wherein Lempel-Ziv encoding is utilized to encode the boot data in compressed form.

116. (New) The method of claim 12, wherein a plurality of encoders are utilized to encode the boot data in compressed form.

117. (New) The method of claim 14, wherein the compressed boot data represents a plurality of files.

118. (New) The method of claim 14, wherein the boot data comprises program code associated with the operating system.

119. (New) The method of claim 14, further comprising:  
compressing the boot data with one or more advanced compression encoders to provide the compressed boot data.

120. (New) The method of claim 14, wherein the decompressing comprises:  
decompressing the compressed boot data with one or more advanced decompression decoders.

121. (New) The method of claim 14, wherein the loading comprises:  
loading the compressed boot data into a contiguous portion of the memory, and wherein the decompressing comprises:  
decompressing the compressed boot data into a different portion of the memory than the contiguous portion.

122. (New) The method of claim 14, wherein the memory is virtual.

123. (New) The method of claim 14, wherein the memory is physical.

124. (New) The method of claim 14, wherein the compressed boot data is larger than 512 kilobytes.

125. (New) The method of claim 14, wherein the compressed boot data is larger than 640 kilobytes.

126. (New) The method of claim 14, wherein the compression ratio of the compressed boot data is greater than 2.5:1.

127. (New) The method of claim 14, wherein the operating system is comprised of multiple files.

128. (New) The method of claim 14, wherein the boot data comprises program code associated with one or more application programs of the computer system.

129. (New) The method of claim 14, wherein the boot data comprises program code associated with a combination of the operating system and one or more application programs.

130. (New) The method of claim 128, wherein the one or more application programs are comprised of multiple files.

131. (New) The method of claim 14, wherein the accessing comprises:  
accessing the compressed boot data from the memory via direct memory access.

132. (New) The method of claim 14, wherein Huffman encoding is utilized to  
encode the compressed boot data.

133. (New) The method of claim 14, wherein Lempel-Ziv encoding is utilized to  
encode the compressed boot data.

134. (New) The method of claim 14, wherein a plurality of encoders are utilized  
to encode the compressed boot data

***Remarks***

Reconsideration of this Application is respectfully requested.

Upon entry of the foregoing amendment, claims 1-4 and 6-140 are pending in the application, with claims 1, 6-7, 9, 12, and 14-15 being the independent claims. Claims 1-4 and 6-13 are sought to be amended. Claim 5 is sought to be cancelled without prejudice to or disclaimer of the subject matter therein. Applicants reserve the right to prosecute similar or broader claims, with respect to the cancelled and/or amended claims, in the future. New claims 15-134 are sought to be added. These changes are believed to introduce no new matter, and their entry is respectfully requested.

Based on the above amendment and the following remarks, Applicants respectfully request that the Examiner reconsider all outstanding objections and rejections and that they be withdrawn.

***Double Patenting***

Claims 1-14 stand rejected under the judicially created doctrine of obviousness-type double patenting as being allegedly unpatentable over claims 1-13, claims 1-24, and claims 1-31 of U.S. Patent Nos. 8,112,619; 8,090,936; and 7,181,608, respectively.

Claims 1-4 and 6-14

Applicants are submitting a Terminal Disclaimer concurrently herewith to overcome the double patenting rejection with respect to the claims presented above. The filing of this Terminal Disclaimer is not an admission of the propriety of the rejection. See, *Quad Environmental Technologies Corp. v. Union Sanitary District*, 946 F.2d 870, 20 USPQ2d 1392 (Fed. Cir. 1991). Accordingly, Applicants respectfully request that the

Atty. Dkt. No. 2855.004000B

obviousness-type double patenting rejection of claims 1-4 and 6-14 be reconsidered and withdrawn.

Claim 5

Applicants have cancelled claim without prejudice or disclaimer, thereby rendering the rejection moot. Applicants contend that the cancelling of claim 5 does not give rise to any implication regarding whether Applicants agree with or acquiesce to this rejection.

***Rejections Under 35 U.S.C. § 103***

Claims 6-11 stand rejected under 35 U.S.C. § 103 as allegedly being unpatentable over U.S. Patent No. 6,073,232 to Kroeker ("Kroeker") in view of U.S. Patent No. 6,434,695 to Esfahani ("Esfahani"). Applicants respectfully traverse these rejections.

***Kroeker and Esfahani do not Teach or Suggest Each and Every Feature of Claims 6-7 and 9 as Amended***

Independent claim 6 has been amended to recite, among other features, "*wherein the accessing and the decompressing occur within a period of time which is less than a time to access the boot data from the non-volatile memory in an uncompressed form.*" Independent claim 7 has also been amended to recite, among other features, "*wherein the processor is configured to load at least a portion of the boot data in compressed form into the memory, and to access the at least a portion of the boot data in compressed form and decompress at a rate that decreases boot time relative to booting the system with uncompressed boot data.*" Furthermore, independent claim 9 has been amended to

Atty. Dkt. No. 2855.004000B

recite, among other features, "*wherein the first and second portions are accessed and decompressed at a rate that is faster than accessing the first and second portions from the non-volatile memory in uncompressed form.*" Kroeker and Esfahani, alone or any combination thereof, do not teach or suggest at least these features.

Consequently, Kroeker and Esfahani do not render independent claims 6, 7, and 9 obvious, and thus independent claims 6 and 7 are allowable. Dependent claims 8 and 10-11 are likewise allowable for the same reasons as the independent claims from which they respectively depend and further in view of their own features. Accordingly, Applicants respectfully request that the rejection of claims 6-11 under 35 U.S.C. § 103(a) be reconsidered and withdrawn.

***The Combination of the Kroeker and Esfahani References is Based on Impermissible Hindsight***

The Examiner concedes that "Kroeker does not teach about accessing compressed boot data," in rejecting independent claims 6, 7, and 9. (Office Action, pp. 5-6 and 8). The Examiner alleges that Esfahani cures this deficiency and, through combining Kroeker and Esfahani, that "it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the cited references as they are directed to minimize a computer's initial program load time or shortening the load time of the computer programs from a hard disk drive to a hot computer." (*Id.*). Applicants respectfully disagree.

The Examiner is respectfully reminded that "[t]he mere fact that references can be combined or modified does not render the resultant combination obvious." (MPEP §

Atty. Dkt. No. 2855.004000B

2143.01.III). Furthermore, "*it is not enough to simply show that the references disclose the claim limitations*"; in addition, 'it can be important to identify a reason that would have prompted a person of ordinary skill in the art to combine the elements as the new invention does.'" (*Transocean Offshore Deepwater Drilling, Inc. v. Maersk Contractors*, 617 F.3d 1296, (2010) (quoting *KSR International Co. v. Teleflex*, 550 U.S. at 401, Emphasis Added).

To further clarify, Kroeker recognizes that "the transfer of [a] selected program to [a] computer is relatively slow, particularly when the program is a modern large operating system." (Kroeker, 1:29-31). To speed computer boot time, Kroeker "generates a prefetch table that contains pointers to disk locations and lengths of the records of an application program requested by the host computer during an initial power-on/reset." (Kroeker, Abstract).

The boot system of Kroeker, therefore, provides a method whereby "[a] pre fetch table is then generated. . .[t]hen, after a subsequent power-on or reset of the hard disk drive, and during a second power-on or reset of the host computer, the pre fetch table is accessed to read into the data cache the data records. . .[if] records requested by the subsequent read command are stored in the data cache. . .the records are communicated from the cache to the host computer; otherwise, the records are communicated from the disk to the host computer." (Kroeker, 2:36-47). In other words, regardless of whether the records are stored in the data cache, the records are communicated from the cache or the disk to the host computer *without any need to compress the records*. In other words, Kroeker adequately reduces boot load time through the use of prefetch tables, and nowhere does Kroeker or Esfahani teach or suggest deficiencies in the booting system of

Kroeker to cause one skilled in the art to modify this booting system to used compressed data as alleged in the Office Action.

Furthermore, Esfahani is concerned not with boot speed or storage efficiency, but with "facilitating the debugging and upgrading of a computer operating system." (Esfahani, ¶ [0001]). That is, the boot loading system of Esfahani solves different problems entirely than Kroeker. Esfahani further explains the benefits of its boot system. Column 4:55 – Column 5:6 states in full:

The benefits of this approach include the following: When hardware changes are needed, only the hardware-specific code has to be modified, greatly decreasing the turnaround time for new products and software product releases, and reducing testing time and expenses. The higher-level ToolBox and System Software seldom needs to change. This approach further provides high confidence that the higher level software has not been changed when creating a new build as a result of changing the hardware-dependent code. Changing the higher-level software less frequently simplifies testing and reduces the time to develop system software and fix bugs. In addition, the memory footprint may be reduced, since fewer patches may be required as the higher-level software is consolidated and unchanged. Running an OS other than the MacOS, such as Rhapsody, becomes simpler. Also, costs tend to be reduced. Today, RAM and disk space are inexpensive, have high capacity, and are fast compared to the ROM, RAM and disk in the original Macintosh.

One skilled in the art would not add Esfahani's compression functionality to Kroeker's boot system, since Kroeker adequately decreases boot time through the use of prefetch tables. Additionally, Esfahani's use of a compressed ROM image solves problems related not to decreasing boot time, but to simplifying an operating system updating procedure. The reasoning provided in the Office Action to combine the Kroeker and Esfahani references, therefore, cannot be based on the knowledge of one of ordinary skill in the art. The Office Action uses impermissible hindsight to reconstruct Applicants "method for providing accelerated loading of a computer operating system" from the Kroeker and Esfahani references. To guard against impermissible hindsight,

the Office must fully articulate its obviousness rejections. See *In re Kahn*, 441 F.3d 977, 986 (Fed. Cir. 2006). For instance, the Examiner may not use the challenged claims as a roadmap on how or why to combine references. See, e.g., *Ruiz v. A.B. Chance Co.*, 357 F.3d 1270, 1275 (Fed. Cir. 2004).

Instead, the Examiner must rely solely on the prior art teachings and knowledge of a person of ordinary skill at the time the invention was made to determine whether an invention is obvious. See *In re Kahn*, 441 F.3d at 986 and MPEP § 2145.X.A. If anything, it is only when the Specification of this Application is used as a blueprint that a person of ordinary skill in the art would be motivated to combine Kroecker and Esfahani in the manner set forth in the Office Action. But this combination is impermissibly based on hindsight bias. See *KSR*, 127 S.Ct. at 1742 (citing *Graham v. John Deere Co. of Kansas City*, 383 U.S. 1, 36 (1966)) (warning that "[a] factfinder should be aware, of course, of the distortion caused by hindsight bias and must be cautious of arguments reliant on ex post reasoning").

Because the only motivation to combine the Kroecker and Esfahani references is based on impermissible hindsight, the combination is improper. Consequently, the combination of Kroecker and Esfahani does not render claims 6-7 and 9 obvious, and thus claims 6-7 and 9 are allowable based at least upon this impermissible combination. Dependent claims 8 and 10-11 are likewise allowable for the same reasons as the independent claims from which they respectively depend and further in view of their own features. Accordingly, Applicants further request that the rejection of claims 6-11 under 35 U.S.C. § 103(a) be reconsidered and withdrawn.

***New Claims 15-134***

Independent claim 15 has been added. Independent claim 15 recites, among other features, "*servicing requests for boot data from the computer system using the loaded compressed boot data, wherein the servicing requests include accessing compressed boot data and decompressing the compressed boot data at a rate that decreases an overall boot time relative to loading the operating system in uncompressed form.*" Krocker and Esfahani, alone or any combination thereof, do not teach or suggest at least these features, and thus new claim 15 is allowable.

Dependent claims 16-134 have also been added, which depend from independent claims 1, 6-7, 9, 12, and 14-15. As independent claims 1, 6-7, 9, 12, and 14-15 are allowable, new claims 16-134 are likewise allowable for the same reasons as the independent claims from which they depend and further in view of their own respective features.

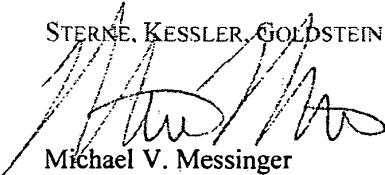

***Conclusion***

As discussed herein, the present application is in condition for allowance. If the Examiner believes, for any reason, that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at the number provided.

Prompt and favorable consideration of this Amendment and Reply is respectfully requested.

Respectfully submitted,

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Sir:

Notice of Prior and Concurrent Proceedings

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,486)	Inter Partes Reexamination Certificate issued 10/10/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/000,466)	Inter Partes Reexamination Certificate issued 05/15/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,453)	Terminated
<i>Ex Parte</i> Reexamination of U.S. Patent No. 6,601,104 (Control No. 90/009,428)	Ex Parte Reexamination Certificate issued 02/28/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/000,478)	Inter Partes Reexamination Certificate issued 10/04/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,624,761 (Control No. 95/000,464)	Inter Partes Reexamination Certificate issued 06/12/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/000,479)	Inter Partes Reexamination Certificate issued 05/22/2012

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Petition to Expunge Third Party Requester's Improper Submission of Declarations and Strike Comments Directed to Examiner's Determination filed 06/26/2013; Patent Owner's Comments in Response to Examiner's Determination filed 05/10/2013; Examiner's Determination Under 37 C.F.R. § 41.77(d) mailed 04/10/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Decision on Petition Under 37 C.F.R. § 1.183 to Request Examiner Enter Evidence mailed 03/20/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)	Examiner's Answer to Appeal Brief mailed 03/14/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)	Examiner's Answer to Appeal Brief mailed 10/01/2012

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings filed by Cellco Partnership d/b/a Verizon Wireless, involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/001,922)	Patent Owner's Supplemental Response to Action Closing Prosecution filed 05/15/2013; Patent Owner's Response to Action Closing Prosecution filed 05/09/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/001,923)	Patent Owner's Supplemental Response to Office Action filed 04/29/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,352,300 (Control No. 95/001,924)	Patent Owner's Response to Action Closing Prosecution filed 05/09/2013; Action Closing Prosecution mailed 04/09/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,395,345 (Control No. 95/001,925)	Patent Owner's Supplemental Response to Office Action filed 05/06/2013

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/001,926)	Patent Owner's Reply to Action Closing Prosecution filed 04/05/2013; Action Closing Prosecution mailed 03/05/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,415,530 (Control No. 95/001,927)	Right of Appeal Notice mailed 04/31/2013; Action Closing Prosecution mailed 04/03/2013
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/001,928)	Patent Owner's Reply to Action Closing Prosecution filed 04/05/2013; Action Closing Prosecution mailed 03/05/2013

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL61-NPL109.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 1:11-cv-06698-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00333-LED)	Notice of Appeal Filed
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> , No. 1:11-cv-06696-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00326-LED)	Notice of Appeal Filed
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 1:11-cv-06697-RJH (S.D. New York) (transferred from E.D. Texas; No. 6:09-cv-00327-LED)	Notice of Appeal Filed
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2
7	<i>Realtime Data, LLC d/b/a IXO v. CME Group Inc., et al. (II)</i> , No. 6:10-cv-246 (E.D. Texas)	Consolidated with Case No. 4
8	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al. (II)</i> , No. 6:10-cv-247 (E.D. Texas)	Consolidated with Case No. 2
9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC d/b/a IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Notice of Appeal Filed

Updated court docket listings downloaded July 8, 2013 for litigations previously disclosed and pending are submitted herewith as NPL119-NPL122.

*Realtime Data, LLC d/b/a IXO v. MetroPCS Texas, LLC et al.*

Applicants submit herewith documents related to the above-listed litigation as documents NPL27-NPL41.

Realtime Data LLC d/b/a/ IXO v. Morgan Stanley, et al.;  
Realtime Data LLC d/b/a/ IXO v. CME Group Inc., et al.; and  
Realtime Data LLC d/b/a/ IXO v. Thomson Reuters Corp., et al.

Applicants submit herewith documents related to the above-listed litigations as documents US1-US3 and NPL1-NPL26 with confidential information redacted.

Information Disclosure Statement

Listed on accompanying IDS Forms PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Atty. Dkt. No. 2855.004000B

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed before the mailing of a first Office Action and after the filing of a request for continued examination under 37 C.F.R. § 1.114. No statement or fee is required.

Documents US1-US8 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL122 are cited on the attached form PTO/SB/08B. Copies of documents NPL1-NPL15 and NPL17-NPL122 are submitted herewith. Due to its file format, document NPL16 cannot be submitted electronically, and is therefore presented on the accompanying CD labeled as document NPL16, submitted via hand-carry. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S. patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL42 is a copy of a Notice of Allowance mailed on June 21, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL43 is a copy of a Final Office Action mailed on June 26, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL44 is a copy of a Notice of Allowance mailed on July 12, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL45 is a copy of a Notice of Allowance mailed on July 16, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Atty. Dkt. No. 2855.004000B

Document NPL46 is a copy of a Non-Final Office Action mailed on July 20, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/482,800.

Document NPL47 is a copy of a Notice of Allowance mailed on November 6, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL48 is a copy of a Notice of Allowance mailed on November 15, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL49 is a copy of a Non-Final Office Action mailed on November 29, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL50 is a copy of a Final Office Action mailed on December 4, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL51 is a copy of a Final Office Action mailed on December 13, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL52 is a copy of a Supplemental Notice of Allowability mailed December 18, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL53 is a copy of a Notice of Allowance mailed December 28, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL54 is a copy of a Non-Final Office Action mailed on January 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL55 is a copy of a Non-Final Office Action mailed on February 19, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/482,800.

Document NPL56 is a copy of a Notice of Allowance mailed on March 4, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL57 is a copy of a Non-Final Office Action mailed on April 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL58 is a copy of a Notice of Allowance mailed on April 24, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL59 is a copy of a Notice of Allowance mailed on May 14, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL60 is a copy of a supplemental Notice of Allowance mailed on May 15, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL110 is a copy of a Notice of Allowance mailed on June 17, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL111 is a copy of a supplemental Notice of Allowance mailed on June 18, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL112 is a copy of supplemental Notice of Allowance mailed on July 2, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL113 is a copy of a Non-Final Office Action mailed on July 3, 2013 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

The identification of these actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), and 11/551,211, filed October 19, 2006 (now U.S. Patent No. 8,112,619), in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

Atty. Dkt. No. 2855.004000B

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.

Examiner Signature	Date Considered
--------------------	-----------------

\*EXAMINER: Initial if reference considered, whether or not citation is in conformance with MPEP 609. Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to applicant.  
<sup>1</sup> Applicant's unique citation designation number (optional). <sup>2</sup> Applicant is to place a check mark here if English language Translation is attached.

## ARTIFACT SHEET

Enter artifact number below. Artifact number is application number + artifact type code (see list below) + sequential letter (A, B, C ...). The first artifact folder for an artifact type receives the letter A, the second B, etc..

Examples: 59123456PA, 59123456PB, 59123456ZA, 59123456ZB

**13118122UA**

Indicate quantity of a single type of artifact received but not scanned. Create individual artifact folder/box and artifact number for each Artifact Type.

<input checked="" type="checkbox"/>	CD(s) containing:	<input type="checkbox"/>
	computer program listing	Artifact Type Code: P
	Doc Code: Computer	
	pages of specification	<input type="checkbox"/>
	and/or sequence listing	Artifact Type Code: S
	and/or table	
	Doc Code: Artifact	
	content unspecified or combined	<input checked="" type="checkbox"/>
	Doc Code: Artifact	Artifact Type Code: U
<input type="checkbox"/>	Stapled Set(s) Color Documents or B/W Photographs	
	Doc Code: Artifact	Artifact Type Code: C
<input type="checkbox"/>	Microfilm(s)	
	Doc Code: Artifact	Artifact Type Code: F
<input type="checkbox"/>	Video tape(s)	
	Doc Code: Artifact	Artifact Type Code: V
<input type="checkbox"/>	Model(s)	
	Doc Code: Artifact	Artifact Type Code: M
<input type="checkbox"/>	Bound Document(s)	
	Doc Code: Artifact	Artifact Type Code: B
<input type="checkbox"/>	Confidential Information Disclosure Statement or Other Documents marked Proprietary, Trade Secrets, Subject to Protective Order, Material Submitted under MPEP 724.02, etc.	
	Doc Code: Artifact	Artifact Type Code X
<input type="checkbox"/>	Other, description: _____

The time period for reply, if any, is set in the attached communication.

### DETAILED ACTION

1. Claims 1-14 are presented for examination.

#### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 8,112,619. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim same invention.

4. Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 8,09,936. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim same invention.

5. Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 7,181,608. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim same invention.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kroeker et al (US Patent 6,073,232<sup>1</sup>; hereinafter Kroeker) in view of Esfahani et al (US Patent 6,434,695<sup>1</sup>; hereinafter Esfahani).

8. As per claim 6, Kroeker discloses a method, comprising:

maintaining a list of compressed boot data used for booting a computer system [col. 2, lines 30-47; col. 5, lines 1-7; a prefetch table containing a listing of the disk locations and length of data records that were requested by the host computer in the immediately previous power-on/reset];

initializing a central processing unit of the computer system [col. 2, lines 30-35; inherent to the system during power-up process];

---

<sup>1</sup> Prior art cited by applicants in submitted information disclosure statement (dated 8/2/11).

loading the compressed boot data from the boot device to a memory [col. 1, lines 58-64; col. 2, lines 36-41; col. 3, lines 30-39; col. 5, lines 17-21; data is preloaded into the RAM cache according to the prefetch table prior to completion of initialization of the host computer as shown in Fig. 3].

Kroeker does not disclose about accessing compressed boot data. However, Esfahani clearly discloses about loading a compressed boot data into a RAM cache and then the boot data is decompressed and executed [col. 2, lines 5-13, 63, 67; col. 10, line 65 -- col. 11, line 4]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the cited references as they are directed to minimize a computer's initial program load time or shortening the load time of the computer programs from a hard disk drive to a host computer. Moreover, the shortening load time method of Kroeker by loading the program into the RAM cache according to the prefetch table will definitely be benefited with the method of reading compressed data into the RAM cache and then decompressing and executing as needed. This way, one may not only have needed data into a fast access memory but also a large amount of data to avoid frequent accessing the storage device(s).

9. As per claim 7, Kroeker discloses a system comprising:

a processor [col. 4, lines 11-16; a digital processor];

a memory [col. 4, lines 17-28; a memory]; and

a non-volatile memory device [col. 2, lines 30-37; col. 4, lines 17-28; col. 5, lines 1-7 and the title];

logic code associated with the processor stored in the non-volatile memory and comprising instructions executable by the processor for maintaining a list of boot data used for booting the system [col. 2, lines 30-37; col. 4, lines 17-28; col. 5, lines 1-7; a prefetch table containing a listing of the disk locations and length of data records that were requested by the host computer in the immediately previous power-on/reset].

Kroeker does not disclose about accessing compressed boot data. However, Esfahani clearly discloses about loading a compressed boot data into a RAM cache and then the boot data is decompressed and executed [col. 2, lines 5-13, 63, 67; col. 10, line 65 -- col. 11, line 4]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the cited references as they are directed to minimize a computer's initial program load time or shortening the load time of the computer programs from a hard disk drive to a host computer. Moreover, the shortening load time method of Kroeker by loading the program into the RAM cache according to the prefetch table will definitely be benefited with the method of reading compressed data into the RAM cache and then decompressing and executing as needed. This way, one may not only have needed data into a fast access memory but also a large amount of data to avoid frequent accessing the storage device(s).

10. As per claim 9, Kroeker discloses a method of preloading an operating system for booting a computer system comprising:

storing substantially all of the operating system in compressed form on a boot device [col. 2, lines 30-47; col. 5, lines 1-7; a prefetch table containing a listing of the disk locations where a disk containing bootable operating system];

loading a first portion of the compressed operating system from the boot device to a memory [col. 1, lines 58-64; col. 2, lines 36-41; col. 3, lines 30-39; col. 5, lines 17-21; data is loaded into the RAM cache according to the prefetch table prior to completion of initialization of the host computer as shown in Fig. 3; further the loading of the operating system happens in portions];

utilizing the first portion to partially boot the computer system [col. 2, lines 30-35; inherent to the system during power-up process];

responsive to a request, locating a second portion of the compressed operating system using a boot data list and preloading the second portion from the boot device to the memory [col. 1, lines 58-64; col. 2, lines 30-47; col. 3, lines 30-39; col. 5, lines 17-21]; and

utilizing the second portion to further partially boot the computer system [col. 2, lines 30-35; inherent to the system during power-up process].

Kroeker does not disclose about accessing compressed boot data. However, Esfahani clearly discloses about loading a compressed boot data into a RAM cache and then the boot data is decompressed and executed [col. 2, lines 5-13, 63, 67; col. 10, line 65 -- col. 11, line 4]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the cited references as they are directed to minimize a computer's initial program load time or shortening the load time of the computer programs from a hard disk drive to a host computer. Moreover, the shortening load time method of Kroeker by loading the program into the RAM cache according to the prefetch table will definitely be benefited with the method of reading compressed data into the RAM cache and then decompressing and executing as needed. This way, one may not only have needed data into a fast access memory but also a large amount of data to avoid frequent accessing the storage device(s).

11. As per claims 8 and 10-11, Kroeker does not disclose about accessing compressed boot data. However, Esfahani clearly discloses about loading a compressed boot data into a RAM cache and then the boot data is decompressed and executed [col. 2, lines 5-13, 63, 67; col. 10, line 65 -- col. 11, line 4]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the cited references as they are directed to

minimize a computer's initial program load time or shortening the load time of the computer programs from a hard disk drive to a host computer. Moreover, the shortening load time method of Kroeker by loading the program into the RAM cache according to the prefetch table will definitely be benefited with the method of reading compressed data into the RAM cache and then decompressing and executing as needed. This way, one may not only have needed data into a fast access memory but also a large amount of data to avoid frequent accessing the storage device(s).

### *Conclusion*

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SURESH SURYAWANSHI whose telephone number is (571)272-3668. The examiner can normally be reached on 9:00am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on 571-272-3667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Proceeding	Status
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/001,928)	Non-Final Office Action mailed 04/25/2012; Official Order Granting <i>Inter Partes</i> Reexam mailed 04/25/2012

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL17-NPL72.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 1:11-cv-06698-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00333-LED)	Pending
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> , No. 1:11-cv-06696-RJH (S.D. New York) (transferred	Pending

	from E.D. Texas; 6:09-cv-00326-LED)	
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 1:11-cv-06697-RJH (S.D. New York) (transferred from E.D. Texas; No. 6:09-cv-00327-LED)	Pending
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2
7	<i>Realtime Data, LLC d/b/a IXO v. CME Group Inc., et al. (II)</i> , No. 6:10-cv-246 (E.D. Texas)	Consolidated with Case No. 4
8	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al. (II)</i> , No. 6:10-cv-247 (E.D. Texas)	Consolidated with Case No. 2
9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC D/B/A IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Pending

Updated court docket listings downloaded June 19, 2012 for litigations previously disclosed and pending are submitted herewith as NPL73-NPL76.

Information Disclosure Statement

Listed on accompanying IDS Form PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed after the mailing date of a first Office Action on the merits. The required fee is provided through online credit card payment authorization in the amount of \$180.00 in payment of the fee under 37 C.F.R. § 1.17(p).

A concise explanation of the relevance of the non-English language document FP1 appears below in accordance with 37 C.F.R. § 1.98(a)(3).

FP1 (JP 04-241681) is in the Japanese language. An English language abstract is as follows:

PURPOSE: To provide a means which can make optimum compression on data of any kinds of data pattern and can improve the data compressing efficiency.

CONSTITUTION: At the time of storing data, the data are compressed by means of compression circuits 11 and 12 of plural data compressing systems and counted results of the byte numbers of the compressed data are compared with each other after the byte

numbers are counted. Then the compressed data of the smallest amount are selected and stored in a storing section 2 after adding a code indicating the compressing system. At the time of reading out the recorded data, the data are restored to the original data by selecting the corresponding restoration circuit 31 or 32 in accordance with the added code indicating the compressing system.

Documents US1-US13 and FP1 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL76 are cited on the attached form PTO/SB/08B. Copies of documents FP1 and NPL1-NPL76 are submitted. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S. patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL2 is a copy of a Notice of Allowance mailed on September 26, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/123,081.

Document NPL3 is a copy of a Notice of Allowance mailed on September 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL4 is a copy of a Notice of Allowance mailed on October 18, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL5 is a copy of a Non-Final Office Action mailed on November 2, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL6 is a copy of a Notice of Allowance mailed on November 15, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL7 is a copy of a Non-Final Office Action mailed on November 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/688,413.

Document NPL8 is a copy of a Notice of Allowance mailed on December 30, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL9 is a copy of a Notice of Allowance mailed on February 6, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL10 is a copy of a Non-Final Office Action mailed on March 8, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL11 is a copy of a Notice of Allowance mailed on March 30, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL12 is a copy of a Non-Final Office Action mailed on April 11, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL13 is a copy of a Notice of Allowance mailed on April 23, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL14 is a copy of a Notice of Allowance mailed on May 7, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL15 is a copy of a Non-Final Office Action mailed on May 23, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL16 is a copy of a Notice of Allowance mailed on May 29, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

The identification of these actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), and 11/551,211, filed October 19, 2006 (now U.S. Patent No. 8,112,619), in accordance with MPEP 2001.06(b), and indicate in the next communication from the

/Suresh Suryawanshi/

ALL REFERENCES CONSIDERED EXCEPT WHERE LINED THROUGH. /SKS./

office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.

Examiner Initials*	Cite No. <sup>1</sup>	Include name of the author (in CAPITAL LETTERS), title of the article (when appropriate), title of the item (book, magazine, journal, serial, symposium, catalog, etc.), date, page(s), volume number, publisher, city and/or country where published	T <sup>2</sup>
	NPL41	Right of Appeal Notice in Inter Partes Reexamination of U.S. Patent No. 7,417,568, Control No. 95/001,533, mailed March 1, 2012, 8 pages.	
	NPL42	Right of Appeal Notice in Inter Partes Reexamination of U.S. Patent No. 7,400,274, Control No. 95/001,544, mailed March 6, 2012, 7 pages.	
	NPL43	Request for Inter Partes Reexamination of U.S. Patent No. 7,321,937, Control No. 95/001,922, filed March 2, 2012, including accompanying Exhibits PA-A to PA-D, PAT-A to PAT-C, CC-A to CC-D, Oth-A, and Form PTO/SB/08a, 2865 pages.	
	NPL44	Request for Inter Partes Reexamination of U.S. Patent No. 6,604,158, Control No. 95/001,923, filed March 2, 2012, including accompanying Exhibits PA-A to PA-D, PAT-A to PAT-B, CC-A to CC-F, Oth-A, and Form PTO/SB/08a, 560 pages.	
	NPL45	Request for Inter Partes Reexamination of U.S. Patent No. 7,352,300, Control No. 95/001,924, filed March 2, 2012, including accompanying Exhibits PA-A to PA-H, PAT-A to PAT-B, CC-A to CC-F, Oth-A, and Form PTO/SB/08a, 1012 pages.	
	NPL46	Request for Inter Partes Reexamination of U.S. Patent No. 7,395,345, Control No. 95/001,925, filed March 2, 2012, including accompanying Exhibits PA-A to PA-C, PAT-A, CC-A to CC-C, Oth-A, and Form PTO/SB/08a, 204 pages.	
	NPL47	Request for Inter Partes Reexamination of U.S. Patent No. 7,161,506, Control No. 95/001,926, filed March 2, 2012, with accompanying Exhibits PA-A to PA-C, PAT-A to PAT-C, CC-A to CC-B, Oth-A to Oth-B, and Form PTO/SB/08a, 2651 pages.	
	NPL48	Request for Inter Partes Reexamination of U.S. Patent No. 7,415,530, Control No. 95/001,927, filed March 2, 2012, including accompanying Exhibits PA-A to PA-F, PAT-A to PAT-B, CC-A to CC-O, Oth-A, and Form PTO/SB/08a, 700 pages.	
	NPL49	Request for Inter Partes Reexamination of U.S. Patent No. 7,378,992, Control No. 95/001,928, filed March 2, 2012, including Exhibits PA-A to PA-D, PAT-A to PAT-C, CC-A to CC-B, Oth-A, and Form PTO/SB/08a, 2316 pages.	
	NPL50	Official Order Granting Request for Inter Partes Reexamination of U.S. Patent No. 7,395,345, Control No. 95/001,925, mailed March 19, 2012, 11 pages.	

Examiner Signature	/Suresh Suryawanshi/	Date Considered	01/08/2013

AMENDMENT UNDER 37 C.F.R. § 1.111

*Mail Stop Amendment*

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Commissioner:

In reply to the Office Action dated May 16, 2012, Applicants submit the following Amendment and Remarks.

Amendments to the Specification begin on page 2.

The listing of claims begins on page 8 of this paper.

Remarks and Arguments begin on page 13 of this paper.

It is not believed that extensions of time or fees for net addition of claims are required beyond those that may otherwise be provided for in documents accompanying this paper. However, if additional extensions of time are necessary to prevent abandonment of this application, then such extensions of time are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required therefor (including fees for net addition of claims) are hereby authorized to be charged to our Deposit Account No. 19-0036.

FALLON *et al*  
Appl. No. 13/118,122*Amendments to the Specification*

Please amend the specification as follows:

[0034] The present invention is directed to data storage controllers that provide increased data storage/retrieval rates that are not otherwise achievable using conventional disk controller systems and protocols to store/retrieve data to/from mass storage devices. The concept of "accelerated" data storage and retrieval was introduced in copending U.S. Application Serial No. 09/266,394, filed March 11, 1999, entitled "System and Methods For Accelerated Data Storage and Retrieval," now U.S. Patent No. 6,601,104, and copending U.S. Application Serial No. 09/481,243 filed January 11, 2000, entitled "System and Methods For Accelerated Data Storage and Retrieval," now U.S. Patent No. 6,604,158, both of which are commonly assigned and incorporated herein by reference. In general, as described in the above-incorporated applications, "accelerated" data storage comprises receiving a digital data stream at a data transmission rate which is greater than the data storage rate of a target storage device, compressing the input stream at a compression rate that increases the effective data storage rate of the target storage device and storing the compressed data in the target storage device. For instance, assume that a mass storage device (such as a hard disk) has a data storage rate of 20 megabytes per second. If a storage controller for the mass storage device is capable of compressing an input data stream with an average compression rate of 3:1, then data can be stored in the mass storage device at a rate of 60 megabytes per second, thereby effectively increasing the storage bandwidth ("storewidth") of the mass storage device by a factor of three. Similarly, accelerated data retrieval comprises retrieving a compressed digital data stream from a target storage device at the rate equal to, e.g., the data access rate of the target storage device and then decompressing the compressed data at a rate that increases the effective data access rate of the target storage device.

Atty. Dkt. No. 2855.004000B

- 3 -

FALLON *et al*  
Appl. No. 13/118,122

Advantageously, accelerated data storage/retrieval mitigates the traditional bottleneck associated with, e.g., local and network disk accesses.

[0035] Referring now to Fig. 1, a high-level block diagram illustrates a data storage controller 10 according to one embodiment of the present invention. The data storage controller 10 comprises a data compression engine 12 for compressing/decompressing data (preferably in real-time or psuedo real-time) stored/retrieved from a hard disk 11 (or any other type of mass storage device) to provide accelerated data storage/retrieval. The DCE 12 preferably employs the data compression/decompression techniques disclosed in U.S. Serial No. 09/210,491 entitled "Content Independent Data Compression Method and System," filed on December 11, 1998, now U.S. Patent No. 6,195,024, which is commonly assigned and which is fully incorporated herein by reference. It is to be appreciated that the compression and decompression systems and methods disclosed in U.S. Patent No. 6,195,024 ~~Serial No. 09/210,491~~ are suitable for compressing and decompressing data at rates, which provide accelerated data storage and retrieval. A detailed discussion of a preferred "content independent" data compression process will be provided below.

[0041] As discussed in greater detail below, upon host computer power-up or external user reset, the data storage controller 10 initializes the onboard interfaces 14, 15 prior to release of the external host bus 16 from reset. The processor of the host computer then requests initial data from the disk 11 to facilitate the computer's boot-up sequence. The host computer requests disk data over the Bus 16 via a command packet issued from the host computer. Command packets are preferably eight words long (in a preferred embodiment, each word comprises 32 bits). Commands are written from the host computer to the data storage controller 10 with the host computer as the Bus Master and the data storage controller 10 as the slave. The data storage controller 10 includes at least one Base Address Register (BAR) for decoding the address of a command queue of the data storage

1570636\_1

Atty. Dkt. No. 2855.004000B

- 4 -

FALLON *et al*  
Appl. No. 13/118,122

controller 10. The command queue resides within the cache 13 or within onboard memory of the DCE 12.

[0048] The storage controller 20 further comprises computer reset and power up circuitry 28 (or "boot configuration circuit") for controlling initialization (either cold or warm boots) of the host computer system and storage controller 20. A preferred boot configuration circuit and preferred computer initialization systems and protocols are described in U.S. Patent Application Serial No. 09/775,897 (Attorney Docket No. ~~8011-10~~), filed concurrently herewith (~~Express Mail Label No. EL679454245US~~), which is commonly assigned and incorporated herein by reference. Preferably, the boot configuration circuit 28 is employed for controlling the initializing and programming the programmable logic device 22 during configuration of the host computer system (i.e., while the CPU of the host is held in reset). The boot configuration circuit 28 ensures that the programmable logic device 22 (and possibly other volatile or partially volatile logic devices) is initialized and programmed before the bus 16 (such as a PCI bus) is fully reset.

[0055] Fig. 3 illustrates another embodiment of a data storage controller ~~[[30]]~~ 35 wherein the data storage controller 35 is embedded within the motherboard of the host computer system. This architecture provides the same functionality as the system of Fig. 2, and also adds the cost advantage of being embedded on the host motherboard. The system comprises additional RAM and ROM memory devices 23a, 24a, operatively connected to the DSP 21 via a local bus 25a.

[0095] The DSP services request for its external bus from two requestors, the Enhanced Direct Memory Access (EDMA) Controller and an external shared memory device controller. The DSP can typically utilize the full 280 megabytes of bus bandwidth on an 8k through 64K byte (2k word through 16k word) burst basis. It should be noted that the Data Storage and Retrieval Application (DSRA) does not

1570636\_1

- 5 -

FALLON *et al*  
Appl. No. 13/118,122

utilize the SDRAM memory for interim processing storage, and as such only utilizes bandwidth in direct proportion to disk read and write commands.

[0103] Once the data is preloaded, when the computer system bus issues its first read commands to the data storage controller seeking operating system data, the data will already be available in the cache memory of the data storage controller. The data storage controller will then be able to instantly start transmitting the data to the system bus. Before transmission to the bus, if the data was stored in compressed format on the boot device, the data will be decompressed. The process of preloading required (compressed) portions of the operating system significantly reduces the computer boot process time.

[0117] It is to be understood that any conventional compression/decompression system and method (which comply with the above mentioned constraints) may be employed in the data storage controller for providing accelerated data storage and retrieval in accordance with the present invention. Preferably, the present invention employs the data compression/decompression techniques disclosed in the above-incorporated U.S. Patent No. 6,195,024 Serial No. 09/210,491.

[0118] Referring to FIG. 9, a detailed block diagram illustrates an exemplary data compression system 110 that may be employed herein. Details of this data compression system are provided in U.S. Patent No. 6,195,024 Serial No. 09/210,491. In this embodiment, the data compression system 110 accepts data blocks from an input data stream and stores the input data block in an input buffer or cache 115. It is to be understood that the system processes the input data stream in data blocks that may range in size from individual bits through complete files or collections of multiple files. Additionally, the input data block size may be fixed or variable. A counter 120 counts or otherwise enumerates the size of input data block in any convenient units including bits, bytes, words, and

1570636\_1

Atty. Dkt. No. 2855.004000B

- 6 -

FALLON *et al*  
Appl. No. 13/118,122

double words. It should be noted that the input buffer 115 and counter 120 are not required elements of the present invention. The input data buffer 115 may be provided for buffering the input data stream in order to output an uncompressed data stream in the event that, as discussed in further detail below, every encoder fails to achieve a level of compression that exceeds an a priori specified minimum compression ratio threshold.

[0122] Again, it is to be understood that the embodiment of the data compression engine of Fig. 9 is exemplary of a preferred compression system which may be implemented in the present invention, and that other compression systems and methods known to those skilled in the art may be employed for providing accelerated data storage in accordance with the teachings herein. Indeed, in another embodiment of the compression system disclosed in the above-incorporated U.S. Patent No. 6,195,024 Serial No. 09/210,491, a timer is included to measure the time elapsed during the encoding process against an a priori-specified time limit. When the time limit expires, only the data output from those encoders (in the encoder module 125) that have completed the present encoding cycle are compared to determine the encoded data with the highest compression ratio. The time limit ensures that the real-time or pseudo real-time nature of the data encoding is preserved. In addition, the results from each encoder in the encoder module 125 may be buffered to allow additional encoders to be sequentially applied to the output of the previous encoder, yielding a more optimal lossless data compression ratio. Such techniques are discussed in greater detail in the above-incorporated U.S. Patent No. 6,195,024 Serial No. 09/210,491.

[0123] Referring now to FIG. 10, a detailed block diagram illustrates an exemplary decompression system that may be employed herein or accelerated data retrieval as disclosed in the above-incorporated U.S. Patent No. 6,195,024 Serial No.

- 7 -

FALLON *et al*  
Appl. No. 13/118,122

~~09/210,491~~. In this embodiment, the data compression engine 180 retrieves or otherwise accepts compressed data blocks from one or more data storage devices and inputs the data via a data storage interface. It is to be understood that the system processes the input data stream in data blocks that may range in size from individual bits through complete files or collections of multiple files. Additionally, the input data block size may be fixed or variable.

[0126] As with the data compression systems discussed in U.S. Patent No. 6,195,024 ~~Application Serial No. 09/210,491~~, the decoder module 165 may include multiple decoders of the same type applied in parallel so as to reduce the data decoding time. An output data buffer or cache 170 may be included for buffering the decoded data block output from the decoder module 165. The output buffer 170 then provides data to the output data stream. It is to be appreciated by those skilled in the art that the data compression system 180 may also include an input data counter and output data counter operatively coupled to the input and output, respectively, of the decoder module 165. In this manner, the compressed and corresponding decompressed data block may be counted to ensure that sufficient decompression is obtained for the input data block.

FALLON *et al*  
Appl. No. 13/118,122*Listing of Claims*

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (*Currently Amended*) A method for providing accelerated loading of an operating system, comprising the steps of:
  - maintaining a list of boot data used for booting a computer system, wherein at least a portion of boot data is associated with the list of boot data;
  - preloading the at least a portion of boot data into a memory upon initialization of the computer system;
  - ~~servicing requests for boot data from the computer system using the preloaded boot data~~
  - accessing the at least a portion of boot data in a compressed form from the memory;
  - decompressing on a just-in-time basis the at least a portion of boot data in compressed form accessed from the memory at a rate that increases the effective access rate of the memory; and
  - utilizing the decompressed at least a portion of boot data in loading the operating system for the computer system.
  
2. (*New*) The method of claim 1, further comprising:
  - associating additional boot data with the boot data list;

1570636\_1

Atty. Dkt. No. 2855.004000B

- 9 -

FALLON *et al*  
Appl. No. 13/118,122

compressing the boot data preloaded into the memory with a data compression engine; and

compressing the additional boot data with a random access encoder coupled to the data compression engine.

3. (New) The method of claim 1, further comprising:

updating the boot data list.

4. (New) The method of claim 1, further comprising:

associating additional boot data with the boot data list; and

compressing at least a portion of the additional boot data with a data compression encoder.

5. (New) The method of claim 4, further comprising:

using at least a portion of the compressed additional boot data to boot the computer system.

6. (New) A method, comprising:

maintaining a list of compressed boot data used for booting a computer system;

storing the compressed boot data on a boot device;

initializing a central processing unit of the computer system;

loading the compressed boot data from the boot device to a memory;

- 10 -

FALLON *et al*  
Appl. No. 13/118,122

accessing the compressed boot data from the memory; and  
utilizing the boot data to boot the computer system, wherein at least a portion of the  
boot data is accessed in compressed form.

7. (New) A system comprising:  
a processor;  
a memory; and  
a non-volatile memory device;  
boot data for booting the system stored in compressed form in the non-volatile  
memory;  
logic code associated with the processor stored in the non-volatile memory and  
comprising instructions executable by the processor for maintaining a list of boot  
data used for booting the system; and  
at least a portion of the compressed boot data being preloaded into the memory, and  
being accessed and utilized to boot the system.

8. (New) The system of claim 7, further comprising:  
a data compression engine coupled to the non-volatile memory to compress the boot  
data; and  
a random access encoder coupled to the data compression engine to compress  
additional boot data.

FALLON *et al*  
Appl. No. 13/118,122

9. (*New*) A method of preloading an operating system for booting a computer system comprising:
- storing substantially all of the operating system in compressed form on a boot device;
  - loading a first portion of the compressed operating system from the boot device to a memory;
  - accessing the first portion from the memory in compressed form;
  - utilizing the first portion to partially boot the computer system;
  - responsive to a request, locating a second portion of the compressed operating system using a boot data list and preloading the second portion from the boot device to the memory;
  - accessing the second portion from the memory in compressed form; and
  - utilizing the second portion to further partially boot the computer system.
10. (*New*) The method of claim 9, further comprising:
- compressing additional boot data; and
  - storing the additional compressed boot data in the boot device.
11. (*New*) The method of claim 10, further comprising:
- compressing the additional boot data with a random access encoder.
12. (*New*) A method for providing accelerated loading of an operating system in a computer system, comprising:

FALLON *et al*  
Appl. No. 13/118,122

maintaining a boot data list;  
loading boot data associated with the boot data list in compressed form into a  
memory upon initialization of the computer system;  
accessing the compressed boot data from the memory;  
decompressing as needed the compressed boot data accessed from the memory at a  
rate that increases the effective access rate of the memory; and  
utilizing the decompressed boot data in loading the operating system for the  
computer system.

13. (*New*) The method of claim 12, further comprising: compressing additional boot  
data with a random access encoder.

14. (*New*) A method for providing accelerated loading of an operating system in a  
computer system, comprising:  
maintaining a boot data list;  
loading boot data associated with the boot data list into a memory in compressed  
form upon initialization of the computer system;  
accessing the compressed boot data from the memory;  
decompressing on a just-in-time basis the compressed boot data accessed from the  
memory at a rate that increases the effective access rate of the memory; and  
utilizing the decompressed boot data in loading the operating system for the  
computer system.

FALLON *et al*  
Appl. No. 13/118,122*Remarks*

Reconsideration of this Application is respectfully requested.

Claims 1-14 are pending in the application, with claims 1, 6, 7, 9, 12 and 14 being the independent claims. Claim 1 has been amended to more clearly define features of this invention. Claims 2-14 have been added to define further features of this invention. Applicants reserve the right to prosecute similar or broader claims, with respect to the amended claims in the future.

With respect to this Application, Applicant hereby rescinds any and all disclaimers of claim scope made in any related application(s). The Examiner is advised that any previous disclaimer of claim scope, if any, and any references that allegedly caused any previous disclaimer of claim scope, may need to be revisited. Nor should any previous disclaimer of claim scope, if any, in this Application be read back into any related Application. It is understood that throughout examination, the claims presented in this Application are to be given their broadest reasonable meaning in view of the Specification. Any paraphrasing of claim features in remarks during prosecution is not to be interpreted as reading any features into, or characterizing, any claim.

Based on the foregoing amendments and the following remarks, Applicant respectfully requests that the Examiner reconsider all outstanding rejections and that they be withdrawn.

1570636\_1

Atty. Dkt. No. 2855.004000B

- 14 -

FALLON *et al*  
Appl. No. 13/118,122***Rejections under 35 U.S.C. § 102***

Claim 1 was rejected under 35 U.S.C. §102(b) as allegedly being anticipated by U.S. Patent No. 6,073,232 (Kroeker). This ground of rejection is respectfully traversed.

Independent claim 1 recites, inter alia, the following features:

accessing the boot data *in a compressed form* from the memory;

decompressing on a just-in-time basis the at least a portion of boot data in compressed form accessed from the memory at a rate that increases the effective access rate of the memory;

These features are recited in each of independent claims 6, 7, 9, 12, and 14 in the same or substantially the same form.

Kroeker nowhere teaches or suggests accessing at least a portion boot data in a *compressed form from memory*. Similar arguments can be made with respect to each of independent claims 6, 7, 9, 12, and 14. Therefore Kroeker cannot anticipate independent claims 1, 6, 7, 9, 12, and 14.

Claims 2-5, 8, 10, 11, and 13 depend directly or indirectly from one or the other of independent claims 1, 6, 7, 9, 12, and 14. The dependent claims incorporate by reference all of the features of their respective parent claims. Independent claims 1, 6, 7, 9, 12, and 14 are patentable over Kroeker for at least the reasons presented above. Dependent claims 2-5, 8, 10, 11, and 13 are therefore patentable over Kroeker for at least the same reasons, in addition to their own respective features.

FALLON *et al*  
Appl. No. 13/118,122**Conclusion**

All of the stated grounds of rejection have been properly traversed, accommodated, or rendered moot. Applicants therefore respectfully request that the Examiner reconsider all presently outstanding rejections and that they be withdrawn. Applicants believe that a full and complete reply has been made to the outstanding Office Action and, as such, the present application is in condition for allowance. If the Examiner believes, for any reason, that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at the number provided.

Prompt and favorable consideration of this Amendment and Reply is respectfully requested.

Respectfully submitted,

STERNE, BESSLER, GOLDSTEIN &amp; FOX P.L.L.C.

Re: U.S. Utility Patent Application  
Appl. No. 13/118,122; Filing Date: May 27, 2011  
For: **Systems and Methods for Accelerated Loading of Operating Systems  
and Application Programs**  
Inventors: **FATLON et al.**  
Our Ref: 2855.004000B

Commissioner:

Transmitted herewith for appropriate action are the following documents:

1. Credit Card Payment in the amount of \$2,040.00 to cover:  
    \$1,290.00 Petition for Extension of Time fee;  
    \$ 750.00 Independent Claims in Excess of Three (3) fee;
2. Petition for Extension of Time Under 37 C.F.R. § 1.136(a);
3. Amendment Under 37 C.F.R. 1.111 and;
4. Credit Card Payment Form (PTO-2038)

The above-listed documents are filed via facsimile.

In the event that extensions of time are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned.

EJK/bks  
Enclosure(s)

**PETITION FOR EXTENSION OF TIME UNDER 37 CFR 1.136(a)** Docket Number (Optional) **2855.004000B**

Application Number **13/118,122** Filed **May 27, 2011**

For **Systems and Methods for Accelerated Loading of Operating Systems and Application Programs**

Art Unit **2115** Examiner **SURYAWANSHI, Suresh**

This is a request under the provisions of 37 CFR 1.136(a) to extend the period for filing a reply in the above-identified application.

The requested extension and fee are as follows (check time period desired and enter the appropriate fee below):

	Fee	Small Entity Fee	
<input type="checkbox"/> One month (37 CFR 1.17(a)(1))	\$150	\$75	\$ _____
<input type="checkbox"/> Two months (37 CFR 1.17(a)(2))	\$570	\$285	\$ _____
<input checked="" type="checkbox"/> Three months (37 CFR 1.17(a)(3))	\$1,290	\$645	\$ <u>1,290.00</u>
<input type="checkbox"/> Four months (37 CFR 1.17(a)(4))	\$2,010	\$1,005	\$ _____
<input type="checkbox"/> Five months (37 CFR 1.17(a)(5))	\$2,730	\$1,365	\$ _____

Applicant claims small entity status. See 37 CFR 1.27.

A check in the amount of the fee is enclosed.

Payment by credit card. Form PTO-2038 is attached.

The Director has already been authorized to charge fees in this application to a Deposit Account.

The Director is hereby authorized to charge any fees which may be required, or credit any overpayment, to Deposit Account Number 19-0036.

Payment made via EFS-Web.

\* Total of 1 forms are submitted.

This collection of information is required by 37 CFR 1.136(a). The information is required to obtain or retain a benefit by the public, which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 6 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop PCT, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

<b>Total Files Size (in bytes):</b>			283142491		

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

(57) **ABSTRACT**

Systems and methods for providing accelerated data storage and retrieval utilizing lossless data compression and decompression. A data storage accelerator includes one or a plurality of high speed data compression encoders that are configured to simultaneously or sequentially losslessly compress data at a rate equivalent to or faster than the transmission rate of an input data stream. The compressed data is subsequently stored in a target memory or other storage device whose input data storage bandwidth is lower than the original input data stream bandwidth. Similarly, a data retrieval accelerator includes one or a plurality of high speed data decompression decoders that are configured to simultaneously or sequentially losslessly decompress data at a rate equivalent to or faster than the input data stream from the target memory or storage device. The decompressed data is then output at rate data that is greater than the output rate from the target memory or data storage device. The data storage and retrieval accelerator method and system may employed: in a disk storage adapter to reduce the time required to store and retrieve data from computer to disk; in conjunction with random access memory to reduce the time required to store and retrieve data from random access memory; in a display controller to reduce the time required to send display data to the display controller or processor; and/or in an input/output controller to reduce the time required to store, retrieve, or transmit data.

**Reexamination Request:**  
No. 95/000,466, May 7, 2009

**Reexamination Certificate for:**  
Patent No.: **7,321,937**  
Issued: **Jan. 22, 2008**  
Appl. No.: **11/400,674**  
Filed: **Apr. 8, 2006**

(\*) Notice: This patent is subject to a terminal disclaimer.

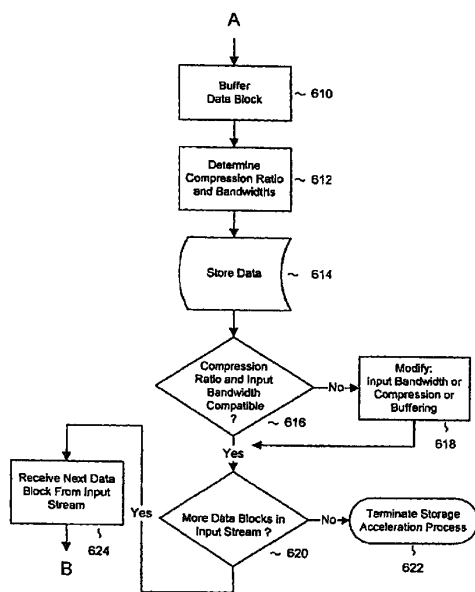

**Related U.S. Application Data**

**Reexamination Request:**  
No. 95/000,479, May 28, 2009

(57) **ABSTRACT**

**Reexamination Certificate for:**  
Patent No.: **7,161,506**  
Issued: **Jan. 9, 2007**  
Appl. No.: **10/668,768**  
Filed: **Sep. 22, 2003**

Systems and methods for providing fast and efficient data compression using a combination of content independent data compression and content dependent data compression. In one aspect, a method for compressing data comprises the steps of: analyzing a data block of an input data stream to identify a data type of the data block, the input data stream comprising a plurality of disparate data types; performing content dependent data compression on the data block; if the data type of the data block is identified; performing content independent data compression on the data block, if the data type of the data block is not identified.

(\*) Notice: This patent is subject to a terminal disclaimer.

**Related U.S. Application Data**

(63) Continuation of application No. 10/016,355, filed on Oct. 29, 2001, now Pat. No. 6,624,761, which is a continuation-in-part of application No. 09/705,446, filed on Nov. 3, 2000, now Pat. No. 6,309,424, which is a continuation of application No. 09/210,491, filed on Dec. 11, 1998, now Pat. No. 6,195,024.

**At the time of issuance and publication of this certificate, the patent remains subject to pending reexamination control number 95/001,926 filed Mar. 2, 2012. The claim content of this patent may be subsequently revised if a reexamination certificate issues from the reexamination proceeding.**

Sir:

Notice of Prior and Concurrent Proceedings

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,486)	Patent Owner Notice of Appeal filed 04/26/2012; Right of Appeal Notice mailed 03/26/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/000,466)	<i>Inter Partes</i> Reexamination Certificate issued 05/15/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,453)	Terminated
<i>Ex Parte</i> Reexamination of U.S. Patent No. 6,601,104 (Control No. 90/009,428)	<i>Ex Parte</i> Reexamination Certificate issued 02/28/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/000,478)	Petition for Correction of Notice of Intent to Issue Reexamination Certificate filed 05/09/2012; Notice of Intent to Issue <i>Inter Partes</i> Reexamination Certificate mailed 04/06/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,624,761 (Control No. 95/000,464)	<i>Inter Partes</i> Reexamination Certificate issued 06/12/2012

Proceeding	Status
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/000,479)	Inter Partes Reexamination Certificate issued 05/22/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Examiner's Answer to Appeal Brief mailed 03/01/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Right of Appeal Notice mailed 03/01/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)	Patent Owner Response to Non-Final Office Action filed 02/24/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)	Right of Appeal Notice mailed 03/06/2012

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings filed by Cellco Partnership d/b/a Verizon Wireless, involving patents that are commonly-assigned with the patent in the above-identified patent application:

Proceeding	Status
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/001,922)	Non-Final Office Action mailed 04/20/2012; Official Order Granting Inter Partes Reexam mailed 04/20/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/001,923)	Non-Final Office Action mailed 05/07/2012; Official Order Granting Inter Partes Reexam mailed 05/07/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,352,300 (Control No. 95/001,924)	Non-Final Office Action mailed 05/17/2012; Official Order Granting Inter Partes Reexam mailed 05/17/2012
<i>Inter Parte</i> Reexamination of U.S. Patent No. 7,395,345 (Control No. 95/001,925)	Patent Owner Response to Office Action filed 05/21/2012; Non-Final Office Action mailed 03/19/2012; Official Order Granting Inter Partes Reexam mailed 03/19/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/001,926)	Non-Final Office Action mailed 04/25/2012; Official Order Granting Inter Partes Reexam mailed 4/25/2012
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,415,530 (Control No. 95/001,927)	Official Order Denying Inter Partes Reexam mailed 04/27/2012

Proceeding	Status
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/001,928)	Non-Final Office Action mailed 04/25/2012; Official Order Granting <i>Inter Partes</i> Reexam mailed 04/25/2012

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL17-NPL72.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 1:11-cv-06698-RJH (S.D. New York) (transferred from E.D. Texas; 6:09-cv-00333-LED)	Pending
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> , No. 1:11-cv-06696-RJH (S.D. New York) (transferred	Pending

	from E.D. Texas; 6:09-cv-00326-LED)	
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 1:11-cv-06697-RJH (S.D. New York) (transferred from E.D. Texas; No. 6:09-cv-00327-LED)	Pending
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2

Updated court docket listings downloaded June 19, 2012 for litigations previously disclosed and pending are submitted herewith as NPL73-NPL76.

Information Disclosure Statement

Listed on accompanying IDS Form PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed after the mailing date of a first Office Action on the merits. The required fee is provided through online credit card payment authorization in the amount of \$180.00 in payment of the fee under 37 C.F.R. § 1.17(p).

A concise explanation of the relevance of the non-English language document FP1 appears below in accordance with 37 C.F.R. § 1.98(a)(3).

FP1 (JP 04-241681) is in the Japanese language. An English language abstract is as follows:

PURPOSE: To provide a means which can make optimum compression on data of any kinds of data pattern and can improve the data compressing efficiency.

CONSTITUTION: At the time of storing data, the data are compressed by means of compression circuits 11 and 12 of plural data compressing systems and counted results of the byte numbers of the compressed data are compared with each other after the byte

numbers are counted. Then the compressed data of the smallest amount are selected and stored in a storing section 2 after adding a code indicating the compressing system. At the time of reading out the recorded data, the data are restored to the original data by selecting the corresponding restoration circuit 31 or 32 in accordance with the added code indicating the compressing system.

Documents US1-US13 and FP1 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL76 are cited on the attached form PTO/SB/08B. Copies of documents FP1 and NPL1-NPL76 are submitted. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S. patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL2 is a copy of a Notice of Allowance mailed on September 26, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/123,081.

Document NPL3 is a copy of a Notice of Allowance mailed on September 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL4 is a copy of a Notice of Allowance mailed on October 18, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL5 is a copy of a Non-Final Office Action mailed on November 2, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/154,239.

Document NPL6 is a copy of a Notice of Allowance mailed on November 15, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL7 is a copy of a Non-Final Office Action mailed on November 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/688,413.

Document NPL8 is a copy of a Notice of Allowance mailed on December 30, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL9 is a copy of a Notice of Allowance mailed on February 6, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL10 is a copy of a Non-Final Office Action mailed on March 8, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL11 is a copy of a Notice of Allowance mailed on March 30, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL12 is a copy of a Non-Final Office Action mailed on April 11, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL13 is a copy of a Notice of Allowance mailed on April 23, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL14 is a copy of a Notice of Allowance mailed on May 7, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL15 is a copy of a Non-Final Office Action mailed on May 23, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL16 is a copy of a Notice of Allowance mailed on May 29, 2012 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

The identification of these actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), and 11/551,211, filed October 19, 2006 (now U.S. Patent No. 8,112,619), in accordance with MPEP 2001.06(b), and indicate in the next communication from the

office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.

*Primary Examiner*—Matthew Heneghan

(57) **ABSTRACT**

(75) Inventor: **James J. Fallon**, Bronxville, NY (US)  
(73) Assignee: **Realtime Data LLC**, New York, NY (US)

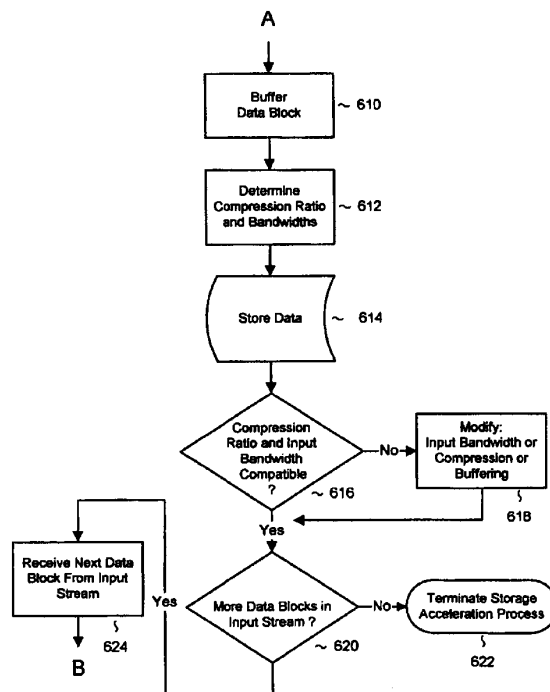

Systems and methods for providing accelerated data storage and retrieval utilizing lossless data compression and decompression. A data storage accelerator includes one or a plurality of high speed data compression encoders that are configured to simultaneously or sequentially losslessly compress data at a rate equivalent to or faster than the transmission rate of an input data stream. The compressed data is subsequently stored in a target memory or other storage device whose input data storage bandwidth is lower than the original input data stream bandwidth. Similarly, a data retrieval accelerator includes one or a plurality of high speed data decompression decoders that are configured to simultaneously or sequentially losslessly decompress data at a rate equivalent to or faster than the input data stream from the target memory or storage device. The decompressed data is then output at rate data that is greater than the output rate from the target memory or data storage device. The data storage and retrieval accelerator method and system may employed: in a disk storage adapter to reduce the time required to store and retrieve data from computer to disk; in conjunction with random access memory to reduce the time required to store and retrieve data from random access memory; in a display controller to reduce the time required to send display data to the display controller or processor; and/or in an input/output controller to reduce the time required to store, retrieve, or transmit data.

Table with 2 columns: MAIL DATE, DELIVERY MODE

05/16/2012 PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 13/118,122	<b>Applicant(s)</b> FALLON ET AL.	
	<b>Examiner</b> SURESH SURYAWANSHI	<b>Art Unit</b> 2115	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 27 May 2011.
- 2a)  This action is **FINAL**.
- 2b)  This action is non-final.
- 3)  An election was made by the applicant in response to a restriction requirement set forth during the interview on \_\_\_\_\_; the restriction requirement and election have been incorporated into this action.
- 4)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 5)  Claim(s) 1 is/are pending in the application.
- 5a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 6)  Claim(s) \_\_\_\_\_ is/are allowed.
- 7)  Claim(s) 1 is/are rejected.
- 8)  Claim(s) \_\_\_\_\_ is/are objected to.
- 9)  Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 10)  The specification is objected to by the Examiner.
- 11)  The drawing(s) filed on 27 May 2011 is/are: a)  accepted or b)  objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 12)  The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 13)  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a)  All    b)  Some \*    c)  None of:  
1.  Certified copies of the priority documents have been received.  
2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3.  Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1)  Notice of References Cited (PTO-892)
- 2)  Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3)  Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 8/2/11,9/16/11.
- 4)  Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5)  Notice of Informal Patent Application
- 6)  Other: \_\_\_\_\_.

**DETAILED ACTION**

1. Claim 1 is presented for examination.

*Specification*

2. The disclosure is objected to because of the following informalities: U.S. Patent Application Serial No. 09/266,394 is now Patent 6,601,103 in paragraph [0034].

Appropriate correction is required.

3. The disclosure is objected to because of the following informalities: U.S. Patent Application Serial No. 09/481,243 is now Patent 6,604,158 in paragraph [0034].

Appropriate correction is required.

4. The disclosure is objected to because of the following informalities: "greater that" should be "greater than" at page 8, line 2.

Appropriate correction is required.

5. The disclosure is objected to because of the following informalities: U.S. Patent Serial No. 09/210,491 is now Patent 6,195,024 in paragraphs [0035], [0117], 0118], [0122], [0123], [0126].

Appropriate correction is required.

6. The disclosure is objected to because of the following informalities: symbol “5” in paragraph [0041] is not in any figure.

Appropriate correction is required.

7. The disclosure is objected to because of the following informalities: blank space should be filled with Serial No. “09/775,897” in paragraph [0048].

Appropriate correction is required.

8. The disclosure is objected to because of the following informalities: symbol “30” in paragraph [0055] should be “35”.

Appropriate correction is required.

9. The disclosure is objected to because of the following informalities: symbol “DSRA” is used without any definition in specification in paragraph [0097].

Appropriate correction is required.

10. The disclosure is objected to because of the following informalities: “if the was stored” should have been “if the data was stored” in paragraph [0103].

Appropriate correction is required.

### ***Double Patenting***

11. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

12. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 7,181,608. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a method for providing accelerated loading of an operating system by maintaining a boot data list, preloading the boot data upon initialization of the computer system.

13. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 8,090,936. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a method for providing accelerated loading of an operating system by maintaining a boot data list, preloading the boot data upon initialization of the computer system.

14. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 8,112,619. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a method for providing accelerated loading of an operating system by maintaining a boot data list, preloading the boot data upon initialization of the computer system.

***Claim Rejections - 35 USC § 102***

15. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

16. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Krockner et al (US Patent 6,073,232<sup>1</sup>; hereinafter Krockner).

17. As per claim 1, Krockner discloses a method for providing accelerated loading of an operating system, comprising the steps of:

---

<sup>1</sup> Prior art cited by applicants in information disclosure statement submitted on 8/2/11.

maintaining a list of boot data used for booting a computer system [col. 2, lines 30-47; col. 5, lines 1-7; a prefetch table containing a listing of the disk location and length of data records that were requested by the host computer in the immediately previous power-on/reset];

preloading the boot data upon initialization of the computer system [col. 2, lines 36-41; col. 3, lines 30-39; col. 5, lines 17-21; data is prefetched into the cache according to the prefetch table]; and

servicing requests for boot data from the computer system using the preloaded boot data [col. 2, lines 41-47; col. 3, lines 3—39; data is communicated from the cache to the host computer].

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SURESH SURYAWANSHI whose telephone number is (571)272-3668. The examiner can normally be reached on 9:00am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on 571-272-3667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Sir:

Notice of Prior and Concurrent Proceedings

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,486)	Patent Owner Comments after Action Closing Prosecution filed May 9, 2011; Non-Final Action Closing Prosecution mailed March 7, 2011; Decision Dismissing Petition mailed January 26, 2011; Petition filed August 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/000,466)	Examiner's Answer issued July 18, 2011; Decision Dismissing Petition mailed January 26, 2011; Appeal Brief filed Oct. 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,453)	Terminated

ALL REFERENCES CONSIDERED EXCEPT WHERE LINED THROUGH. /SKS./

Proceeding	Status
<i>Ex Parte</i> Reexamination of U.S. Patent No. 6,601,104 (Control No. 90/009,428)	Miscellaneous Action with SSP 6/7/2011; Request for Rehearing after Board Decision 5/18/2011; BPAI Decision mailed March 18, 2011; Notification of Appeal Hearing issued January 14, 2011; Examiner's Answer issued Oct. 6, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/000,478)	Appeal-Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 23, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,624,761 (Control No. 95/000,464)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 28, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/000,479)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 10, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 27, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Order Granting Reexam received 3/9/2011; Notice of Assignment of Reexamination Request Issued 1/13/2011; Filed 12/30/2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Non-Final Office Action mailed 5/6/2011; Replacement Reexam Request filed 3/1/2011; Notification of Incomplete <i>Inter Partes</i> Reexam Request issued 2/22/2011; Reexam Request originally filed 1/31/2011;

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)</i>	Non-Final Office Action mailed 7/25/2011; Order Granting Reexam Request mailed 6/15/2011; Filed 3/21/2011
<i>Inter Partes Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)</i>	Non-Final Office Action mailed 5/20/2011; Filed 2/14/2011

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL24-NPL25.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 6:09-cv-00333-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> ,	Pending, Order

	No. 6:09-cv-00326-LED (E.D. Texas)	denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 6:09-cv-00327-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2

9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC D/B/A IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Pending

*Realtime Data LLC d/b/a/ IXO v. Packeteer, Inc. et al.*

Applicants hereby advise the Patent and Trademark Office that this action has been dismissed with prejudice pursuant to a settlement and license agreement.

Applicants submit herewith documents related to this litigation as documents NPL1-NPL13.

In addition, updated court docket listings downloaded September 2, 2011 for litigations previously disclosed and pending are submitted herewith as NPL27-NPL30.

Information Disclosure Statement

Listed on accompanying IDS Forms PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this

application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed within before the mailing date of a first Office Action on the merits. No statement or fee is required.

Documents US1-US9 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL30 are cited on the attached form PTO/SB/08B. Copies of documents NPL1-NPL30 are submitted. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S.

patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith Office Actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL17 is a copy of a Notice of Allowance mailed on July 11, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL18 is a copy of a Notice of Allowance mailed on July 25, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/684,624.

Document NPL19 is a copy of a Non-Final Office Action mailed on July 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL20 is a copy of a Non-Final Office Action mailed on August 10, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL21 is a copy of a Non-Final Office Action mailed on August 16, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL22 is a copy of a Notice of Allowance mailed on August 24, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

ALL REFERENCES CONSIDERED EXCEPT WHERE LINED THROUGH. /SKS/

Document NPL23 is a copy of a Notice of Allowance mailed on September 1, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/684,624.

The identification of these Office Actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

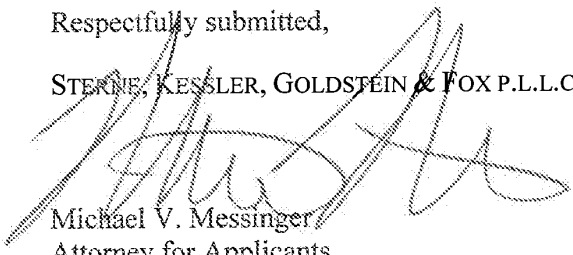

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 11/551,211, filed October 19, 2006, and 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSSTEIN & FOX P.L.L.C.

PUBLICATION NOTICE

Title:Systems and Methods for Accelerated Loading of Operating Systems and Application Programs

Publication No.US-2011-0231642-A1

Publication Date:09/22/2011

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently http://www.uspto.gov/patft/.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently http://pair.uspto.gov/. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Sir:

Notice of Prior and Concurrent Proceedings

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,486)	Patent Owner Comments after Action Closing Prosecution filed May 9, 2011; Non-Final Action Closing Prosecution mailed March 7, 2011; Decision Dismissing Petition mailed January 26, 2011; Petition filed August 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/000,466)	Examiner's Answer issued July 18, 2011; Decision Dismissing Petition mailed January 26, 2011; Appeal Brief filed Oct. 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,453)	Terminated

Proceeding	Status
<i>Ex Parte</i> Reexamination of U.S. Patent No. 6,601,104 (Control No. 90/009,428)	Miscellaneous Action with SSP 6/7/2011; Request for Rehearing after Board Decision 5/18/2011; BPAI Decision mailed March 18, 2011; Notification of Appeal Hearing issued January 14, 2011; Examiner's Answer issued Oct. 6, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/000,478)	Appeal-Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 23, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,624,761 (Control No. 95/000,464)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 28, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/000,479)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 10, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 27, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Order Granting Reexam received 3/9/2011; Notice of Assignment of Reexamination Request Issued 1/13/2011; Filed 12/30/2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Non-Final Office Action mailed 5/6/2011; Replacement Reexam Request filed 3/1/2011; Notification of Incomplete <i>Inter Partes</i> Reexam Request issued 2/22/2011; Reexam Request originally filed 1/31/2011;

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)</i>	Non-Final Office Action mailed 7/25/2011; Order Granting Reexam Request mailed 6/15/2011; Filed 3/21/2011
<i>Inter Partes Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)</i>	Non-Final Office Action mailed 5/20/2011; Filed 2/14/2011

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL24-NPL25.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

<b>No.</b>	<b>Case</b>	<b>Status</b>
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 6:09-cv-00333-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> ,	Pending, Order

	No. 6:09-cv-00326-LED (E.D. Texas)	denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 6:09-cv-00327-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2
7	<i>Realtime Data, LLC d/b/a IXO v. CME Group Inc., et al. (II)</i> , No. 6:10-cv-246 (E.D. Texas)	Consolidated with Case No. 4
8	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al. (II)</i> , No. 6:10-cv-247 (E.D. Texas)	Consolidated with Case No. 2
9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC D/B/A IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Pending

*Realtime Data LLC d/b/a/ IXO v. Packeteer, Inc. et al.*

Applicants hereby advise the Patent and Trademark Office that this action has been dismissed with prejudice pursuant to a settlement and license agreement.

Applicants submit herewith documents related to this litigation as documents NPL1-NPL13.

In addition, updated court docket listings downloaded September 2, 2011 for litigations previously disclosed and pending are submitted herewith as NPL27-NPL30.

Information Disclosure Statement

Listed on accompanying IDS Forms PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this

application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed within before the mailing date of a first Office Action on the merits. No statement or fee is required.

Documents US1-US9 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL30 are cited on the attached form PTO/SB/08B. Copies of documents NPL1-NPL30 are submitted. In accordance with 37 C.F.R. § 1.98(a)(2), no copies of U.S.

patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith Office Actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL17 is a copy of a Notice of Allowance mailed on July 11, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL18 is a copy of a Notice of Allowance mailed on July 25, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/684,624.

Document NPL19 is a copy of a Non-Final Office Action mailed on July 28, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL20 is a copy of a Non-Final Office Action mailed on August 10, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/857,238.

Document NPL21 is a copy of a Non-Final Office Action mailed on August 16, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 13/101,994.

Document NPL22 is a copy of a Notice of Allowance mailed on August 24, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL23 is a copy of a Notice of Allowance mailed on September 1, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/684,624.

The identification of these Office Actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

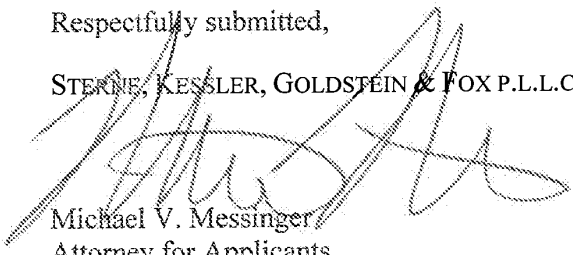

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 11/551,211, filed October 19, 2006, and 09/776,267, filed February 2, 2001 (now U.S. Patent No. 7,181,608), in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSSTEIN & FOX P.L.L.C.

Re: U.S. Utility Patent Application  
Application No. 13/118,122; Filing Date: May 27, 2011  
For: **Systems and Methods for Accelerated Loading of Operating Systems  
and Application Programs**  
Inventors: FALLON *et al.*  
Our Ref: 2855.004000B

Sir:

Transmitted herewith for appropriate action are the following documents:

1. First Supplemental Information Disclosure Statement;
2. Form PTO/SB/08a (1 sheet) listing 9 documents (US1-US9);
3. Form PTO/SB/08b (3 sheets) listing 30 documents (NPL1-NPL30); and
4. Copies of cited documents (NPL1-NPL30).

The above-listed documents are filed electronically through EFS-Web.

In the event that extensions of time are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned.

Commissioner for Patents  
September 16, 2011

<b>Confirmation Number:</b>	8978
<b>Title of Invention:</b>	Systems and Methods for Accelerated Loading of Operating Systems and Application Programs
<b>First Named Inventor/Applicant Name:</b>	James J. Fallon
<b>Customer Number:</b>	26111
<b>Filer:</b>	Michael V. Messinger/Stacy Jen
<b>Filer Authorized By:</b>	Michael V. Messinger
<b>Attorney Docket Number:</b>	2855.004000B
<b>Receipt Date:</b>	02-AUG-2011
<b>Filing Date:</b>	27-MAY-2011
<b>Time Stamp:</b>	16:33:15
<b>Application Type:</b>	Utility under 35 USC 111(a)

**INTERNATIONAL SEARCH REPORT**

International Application No  
PCT/US 01/03712

<b>A. CLASSIFICATION OF SUBJECT MATTER</b> IPC 7 G06F9/445		
According to International Patent Classification (IPC) or to both national classification and IPC		
<b>B. FIELDS SEARCHED</b>		
Minimum documentation searched (classification system followed by classification symbols) IPC 7 G06F		
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched		
Electronic data base consulted during the international search (name of data base and, where practical, search terms used) EPO-Internal, WPI Data, PAJ, IBM-TDB, INSPEC		
<b>C. DOCUMENTS CONSIDERED TO BE RELEVANT</b>		
Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 5 263 168 A (JELEMENSKY JOSEPH ET AL) 16 November 1993 (1993-11-16) abstract; claims 1,6 ---	1-14, 19-23
A	US 5 642 506 A (LEE VAN HOA) 24 June 1997 (1997-06-24) abstract -----	1-14, 19-23
<input type="checkbox"/> Further documents are listed in the continuation of box C. <input checked="" type="checkbox"/> Patent family members are listed in annex.		
* Special categories of cited documents : *A* document defining the general state of the art which is not considered to be of particular relevance *E* earlier document but published on or after the international filing date *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) *O* document referring to an oral disclosure, use, exhibition or other means *P* document published prior to the international filing date but later than the priority date claimed *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art. *&* document member of the same patent family

<input checked="" type="checkbox"/> Further documents are listed in the continuation of box C. <input checked="" type="checkbox"/> Patent family members are listed in annex.		
* Special categories of cited documents:		
*A* document defining the general state of the art which is not considered to be of particular relevance *E* earlier document but published on or after the international filing date *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) *O* document referring to an oral disclosure, use, exhibition or other means *P* document published prior to the international filing date but later than the priority date claimed		*T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention *X* document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone *Y* document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art. *&* document member of the same patent family

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/US 01/03711

## Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos.:  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically
  
3.  Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1.  As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.  As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.  No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

### Remark on Protest

- The additional search fees were accompanied by the applicant's protest.
- No protest accompanied the payment of additional search fees.

**FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210**

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-19.32-35

Architecture of a storage controller comprising a DSP, a PLD and NV-memory.

2. Claims: 20-31

Technique of data preloading for accelerated loading of a program

<p><b>This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.</b></p> <p><b><u>New Applications Under 35 U.S.C. 111</u></b>  <b>If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.</b></p> <p><b><u>National Stage of an International Application under 35 U.S.C. 371</u></b>  <b>If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.</b></p> <p><b><u>New International Application Filed with the USPTO as a Receiving Office</u></b>  <b>If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.</b></p>					

## Electronic Acknowledgement Receipt

<b>EFS ID:</b>	10607439
<b>Application Number:</b>	13118122
<b>International Application Number:</b>	
<b>Confirmation Number:</b>	8978
<b>Title of Invention:</b>	Systems and Methods for Accelerated Loading of Operating Systems and Application Programs
<b>First Named Inventor/Applicant Name:</b>	James J. Fallon
<b>Customer Number:</b>	26111
<b>Filer:</b>	Michael V. Messinger/Stacy Jen
<b>Filer Authorized By:</b>	Michael V. Messinger
<b>Attorney Docket Number:</b>	2855.004000B
<b>Receipt Date:</b>	02-AUG-2011
<b>Filing Date:</b>	27-MAY-2011
<b>Time Stamp:</b>	16:44:44
<b>Application Type:</b>	Utility under 35 USC 111(a)

<b>Total Files Size (in bytes):</b>			857329014		

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Sir:

Notice of Prior and Concurrent Proceedings

Applicants hereby call to the attention of the Patent and Trademark Office the following reexamination proceedings involving patents that are commonly-assigned with the patent in the above-identified patent application:

<b>Proceeding</b>	<b>Status</b>
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,486)	Non-Final Action Closing Prosecution mailed March 7, 2011; Decision Dismissing Petition mailed January 26, 2011; Petition filed August 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,321,937 (Control No. 95/000,466)	Decision Dismissing Petition mailed January 26, 2011; Appeal Brief filed Oct. 25, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,604,158 (Control No. 95/000,453)	Terminated
<i>Ex Parte</i> Reexamination of U.S. Patent No. 6,601,104 (Control No. 90/009,428)	Miscellaneous Action with SSP 6/7/2011; Request for Rehearing after Board Decision 5/18/2011; BPAI Decision mailed March 18, 2011; Notification of Appeal Hearing issued January 14, 2011; Examiner's Answer issued Oct. 6, 2010

Proceeding	Status
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,378,992 (Control No. 95/000,478)	Appeal-Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 23, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 6,624,761 (Control No. 95/000,464)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 8, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 28, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,161,506 (Control No. 95/000,479)	Appeal Brief Filed 4/21/2011; Notice of Appeal filed February 10, 2011; Decision Dismissing Petition mailed January 25, 2011; Patent Owner Comments on Action Closing Prosecution filed September 27, 2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,714,747 (Control No. 95/001,517)	Order Granting Reexam received 3/9/2011; Notice of Assignment of Reexamination Request Issued 1/13/2011; Filed 12/30/2010
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,417,568 (Control No. 95/001,533)	Non-Final Office Action mailed 5/6/2011; Replacement Reexam Request filed 3/1/2011; Notification of Incomplete <i>Inter Partes</i> Reexam Request issued 2/22/2011; Reexam Request originally filed 1/31/2011;
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,777,651 (Control No. 95/001,581)	Order Granting Reexam Request mailed 6/15/2011; Filed 3/21/2011
<i>Inter Partes</i> Reexamination of U.S. Patent No. 7,400,274 (Control No. 95/001,544)	Non-Final Office Action mailed 5/20/2011; Filed 2/14/2011

Applicants invite the Examiner to review the Requests for Reexamination, issued Office Actions, replies, and any other papers in the above-identified reexamination proceedings. If the Examiner is unable to obtain copies of papers in any reexamination

proceeding, copies can be provided to the Examiner upon request. Those documents which may be material that are not already of record in this patent application are listed on the accompanying Form PTO/SB/08. For example, documents related to the reexaminations are listed at NPL538-NPL586.

Notice of Related Litigation

Applicants notify the Patent and Trademark Office of the following litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
1	<i>Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.</i> , No. 6:08-cv-00144-LED (E.D. Texas)	Dismissed

Applicants also notify the Patent and Trademark Office of the following additional litigation involving U.S. Patents commonly-owned with the current patent application, the subject matter of which may be related to the present patent application:

No.	Case	Status
2	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al.</i> No. 6:09-cv-00333-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
3	<i>Realtime Data LLC d/b/a IXO v. Morgan Stanley et al.</i> , No. 6:09-cv-00326-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.
4	<i>Realtime Data LLC d/b/a IXO v. CME Group Inc., et al.</i> , No. 6:09-cv-00327-LED (E.D. Texas)	Pending, Order denying Motion to Expedite Briefing, Order granting writ of mandamus to transfer to the Southern District of New York.

5	<i>Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a IXO</i> , No. 09-cv-4486 (N.D. Ill.)	Dismissed
6	<i>Thomson Reuters Corporation v. Realtime Data, LLC d/b/a IXO</i> , No. 1:09-cv-07868-RMB (S.D.N.Y)	Consolidated with Case No. 2
7	<i>Realtime Data, LLC d/b/a IXO v. CME Group Inc., et al. (II)</i> , No. 6:10-cv-246 (E.D. Texas)	Consolidated with Case No. 4
8	<i>Realtime Data LLC d/b/a IXO v. Thomson Reuters Corporation et al. (II)</i> , No. 6:10-cv-247 (E.D. Texas)	Consolidated with Case No. 2
9	<i>Realtime Data, LLC d/b/a IXO v. Morgan Stanley, et al. (II)</i> , No. 6:10-cv-248 (E.D. Texas)	Consolidated with Case No. 3
10	<i>Realtime Data, LLC D/B/A IXO v. MetroPCS Texas, LLC et al.</i> , No. 6:10-cv-00493 (E.D. Texas)	Pending

*Realtime Data LLC d/b/a IXO v. Packeteer, Inc. et al.*

Applicants hereby advise the Patent and Trademark Office that this action has been dismissed with prejudice pursuant to a settlement and license agreement. Documents NPL264, NPL272-NPL334, NPL416-NPL428, NPL434-NPL435, NPL439-NPL448, NPL455-NPL456, NPL463, NPL468-NPL470, and NPL587-NPL598 are additional information related to the *Packeteer* litigation including certain expert reports, court orders, plaintiff's and defendants' technology tutorials, and notices.

Applicants notify the Patent and Trademark Office the following additional executable software program referenced in this *Packeteer* litigation:

- MetaFrame 1.8
- Winframe 1.5
- Winframe 1.6
- CU-SeeMe 0.961
- CU-SeeMe Pro 4.0.1

Applicants can submit executable copies of the above-identified software at the request of the Examiner.

Applicants notify the Patent and Trademark Office of the existence of a number of confidential documents, hearings, and transcripts related to the *Packeteer* litigation. In particular, confidential documents are listed as NPL401-NPL408 and NPL457 on the attached form PTO/SB/08B. The subject matter of these documents may be related to this patent application. Applicants are prepared, at the request of the Examiner, to

attempt to obtain a waiver of confidentiality so that copies may be provided to the Patent and Trademark Office.

Documents NPL335-NPL399 relate to product information that was produced in the *Packeteer* litigation. This product information includes products provided by Hi/fn, Inc., IBM Corp., Microsoft Corp., RADVision Ltd., and other companies. A declaration of Patrick Gogerty describing the documents from Microsoft Corp. is also submitted herewith (NPL400).

*Realtime Data LLC d/b/a/ IXO v. Thomson Reuters Corporation et al.*

Applicants' assignee is the plaintiff in *Realtime Data LLC d/b/a/ IXO v. Thomson Reuters Corporation et al.*, filed in the U.S. District Court for the Eastern District of Texas under Civil Action No. 6:09-cv-00333-LED (now consolidated with Civil Action Nos. 1:09-cv-07868 (S.D.N.Y) and 6:10-cv-00247 (E.D. Texas)), which involves the enforcement of the following U.S. Patents:

6,624,761	Fallon	09-23-2003
7,161,506	Fallon	01-09-2007
7,400,274	Fallon	07-15-2008
7,417,568	Fallon	08-26-2008
7,714,747	Fallon	05-11-2010
7,777,651	Fallon	08-17-2010

Applicants submit herewith documents related to this litigation at NPL146-NPL154.

*Realtime Data LLC d/b/a/ IXO v. Morgan Stanley et al.*

Applicants' assignee is the plaintiff in *Realtime Data LLC d/b/a/ IXO v. Morgan Stanley et al.*, filed in the U.S. District Court for the Eastern District of Texas under Civil Action No. 6:09-cv-00326-LED (now consolidated with Civil Action No. 6:10-cv-00248 (E.D. Texas) and Civil Action No. 6:10-cv-00247 (E.D. Texas)), which involves the enforcement of the following U.S. Patents:

6,624,761	Fallon	09-23-2003
7,161,506	Fallon	01-09-2007

7,400,274	Fallon	07-15-2008
7,417,568	Fallon	08-26-2008
7,714,747	Fallon	05-11-2010
7,777,651	Fallon	08-17-2010

Applicants submit herewith documents related to this litigation at US13, US80, US125, US172, US241, US267, US333, US389, US400, and NPL69-NPL145.

Realtime Data LLC d/b/a/ IXO v. CME Group Inc., et al.

Applicants' assignee is the plaintiff in *Realtime Data LLC d/b/a/ IXO v. CME Group Inc., et al.*, filed in the U.S. District Court for the Eastern District of Texas under Civil Action No. 6:09-cv-00327-LED (now consolidated with Civil Action No. 6:10-cv-00246 (E.D. Texas) which involves the enforcement of the following U.S. Patents:

6,624,761	Fallon	09-23-2003
7,161,506	Fallon	01-09-2007
7,400,274	Fallon	07-15-2008
7,417,568	Fallon	08-26-2008
7,714,747	Fallon	05-11-2010
7,777,651	Fallon	08-17-2010

Applicants submit herewith documents related to this litigation as US86, US98, US104, US142, US165, US257-US258, US280, US291, US295, US321, US327, US342, US423, US428, US455, US460, FP10, FP20, FP22, NPL1-NPL66, NPL460. While the Defendants' Invalidation Contentions (NPL16) listed claim charts C1-45, D1-45, and E1-45, the defendants did not provide claim charts C8, D8, E8, C32, E10, E12, E16 or E31. Thus, they are not included in this disclosure. This is reflected in the citations of NPL24-NPL26 on the SB/08b forms.

Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a/ IXO

Applicants' assignee is the defendant in *Chicago Board Options Exchange, Inc., v. Realtime Data LLC d/b/a/ IXO*, filed in the U.S. District Court for the Northern District of Illinois under Civil Action No. 09 CV 4486, which involves a request for a

declaratory judgment that the following U.S. Patents are not infringed and/or not valid and/or not enforceable against plaintiff:

6,624,761	Fallon	09-23-2003
7,161,506	Fallon	01-09-2007
7,400,274	Fallon	07-15-2008
7,417,568	Fallon	08-26-2008

Applicants submit herewith a document related to this litigation at NPL467. Applicants hereby notify the Patent Office that this litigation has been dismissed, and that the case has been terminated.

Realtime Data, LLC D/B/A IXO v. MetroPCS Texas, LLC et al.

Applicants' assignee is the plaintiff in *Realtime Data LLC d/b/a/ IXO v. MetroPCS Texas, LLC, et al.*, filed in the U.S. District Court for the Eastern District of Texas under Civil Action No. 6:10-cv-00493, which involves the enforcement of the following U.S. Patents:

6,601,104	Fallon	09-23-2003
6,604,158	Fallon	08-05-2003
7,161,506	Fallon	01-09-2007
7,321,937	Fallon	01-22-2008
7,352,300	Fallon	04-01-2008
7,378,992	Fallon	05-27-2008
7,395,345	Fallon	07-01-2008
7,415,530	Fallon	08-19-2008

Applicants submit herewith a document related to this litigation as US482-US489, FP25, NPL466 and NPL471-NPL488.

In addition, updated court docket listings downloaded July 20, 2011 for litigations previously disclosed are submitted herewith as NPL489-NPL495.

Information Disclosure Statement

Listed on accompanying IDS Forms PTO/SB/08a equivalent and/or PTO/SB/08b equivalent are documents that may be considered material to the patentability of this

application as defined in 37 C.F.R. §1.56, and in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

Filing under 37 C.F.R. § 1.97(b). This Information Disclosure Statement is being filed within before the mailing date of a first Office Action on the merits. No statement or fee is required.

A concise explanation of the relevance of the non-English language document(s) appears below in accordance with 37 C.F.R. § 1.98(a)(3).

**FP1** (DE 4127518) is in the German language. An English language abstract is as follows:

The magnetic disc storage device is connected to a host processor (5) and contains at least one magnetic disc for the storage of data with system startup data in a startup data region, a buffer memory (2) for data to be transferred from the disc/host computer and a data communication device (1). The data communication device transfers the startup data from the startup data region into the buffer memory at the time of system startup. The storage device can be used as an external memory device. **ADVANTAGE** - Enables very short startup times to be achieved for memory systems.

**FP12** (JP 6051989) is in the Japanese language. An English language abstract is as follows:

**PURPOSE:** To perform the fast load processing of an operating system without performing the read processing of volume information for the whole device in spite of the presence/absence of a restore command in the initial load processing of the operating system. **CONSTITUTION:** This system is provided with the device name instruction means 2 of a system storage file volume which instructs a volume in which a system storage file is stored in a device name by a REST command to instruct the generation of a system residence volume, the acquiring means 3 of the correspondence table of the device name with a channel number, a channel number acquiring means 4 to acquire the channel number from the device name of the volume, a restore processing means 5 which performs the generation processing of the system residence volume based

on the device name and the channel number, and a device name/channel number correspondence table 6.

**FP13** (JP 9188009) is in the Japanese language. An English language abstract is as follows:

**PROBLEM TO BE SOLVED:** To provide a printer capable of enhancing a compression ratio by selecting a compression method fitted to data from a plurality of compression methods to perform compression and the data compressing method in the printer. **SOLUTION:** A laser beam printer is equipped with an ROM 4 storing a plurality of preset compression methods and a CPU 3 having a data kind discriminating function analyzing the command of received data and discriminating the kind of data on the basis of the analytical result, a compression method selecting function selecting the compression method fitted to the kind of the discriminated data from a plurality of the compression methods stored in the ROM 4 and data compressing function compressing the data on the basis of the selected compression method.

**FP14** (JP 11149376) is in the Japanese language. An English language abstract is as follows:

**PROBLEM TO BE SOLVED:** To provide a more flexible software development environment by realizing the same function with a circuit mounting an Initial Program Loader ROM in circuit constitution of a smaller scale. **SOLUTION:** A BOOT loader circuit is provided with a BOOT detection part 4 for detecting whether a system becomes a BOOT mode or not, an address decoder 5 for generating a selection signal for each

device, switch parts 6 and 7 for selecting ROM and the external input interface and a CPU stop control part 8 for instructing the stop of CPU various conditions.

FP18 (WO 95/29437) is in the Japanese language. An English language abstract is as follows:

A differential value and compressibility calculating means (76) of a data processing means (71) of a data transmitter calculates the actual differential value and the actual compressibility based on the data length of uncompressed data received from a data outputting source (2) through an uncompressed data receiving means (74) and the data length of compressed data from a data compressing circuit (67). When the actual differential value is equal to or larger than a set differential value  $\alpha$ , at the same time, the actual compressibility is equal to or larger than a set compressibility  $\beta$ , the means (76) transmits the compressed data to a destination (3) through a transfer-requested data outputting means (79), and, in the other cases, transmits the uncompressed data to the destination (3). Therefore, such a phenomenon that the area occupied by compressed data in the memory area in the destination (3) is almost equal to the area occupied by uncompressed data in the memory area can be prevented, and useless data expansion can be avoided at the destination (3).

Documents US1-US530 and FP1-FP26 are cited on the attached form PTO/SB/08A. Documents NPL1-NPL598 are cited on the attached form PTO/SB/08B. Copies of documents FP1-FP26 and NPL1-NPL400, NPL409-NPL456, and NPL458-NPL598 are submitted. Documents NPL401-NPL408 and NPL457 are confidential, as previously noted, and therefore are not submitted. In accordance with 37 C.F.R. §

Atty. Dkt. No. 2855.004000B

1.98(a)(2), no copies of U.S. patents and patent application publications cited on the attached IDS Forms are submitted.

Applicants submit herewith Office Actions from the following co-pending, commonly assigned U.S. Patent Application Nos.:

Document NPL496 is a copy of a notice of allowance mailed on April 10, 2009 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/651,366.

Document NPL497 is a copy of a Non-Final Office Action mailed on November 10, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/684,624.

Document NPL498 is a copy of a Notice of Allowance mailed on February 17, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/123,081.

Document NPL499 is a copy of a Non-Final Office Action mailed on September 27, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/688,413.

Document NPL500 is a copy of a Notice of Allowance mailed on January 31, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL501 is a copy of a Notice of Allowance mailed on September 22, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL502 is a copy of a Notice of Allowance mailed on January 11, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL503 is a copy of a Notice of Allowance mailed on September 22, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL504 is a copy of a Notice of Allowance mailed on November 23, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL505 is a copy of a Notice of Allowance mailed on February 4, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/651,365.

Document NPL506 is a copy of a Notice of Allowance mailed on November 19, 2009 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/651,365.

Document NPL507 is a copy of a Non-Final Office Action mailed on August 27, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL508 is a copy of a Final Office Action mailed on January 28, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL509 is a copy of a Notice of Allowance mailed on June 22, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/131,631.

Document NPL510 is a copy of a Final Office Action mailed on October 30, 2009 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL511 is a copy of a Final Office Action mailed on May 11, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL512 is a copy of a Notice of Allowance mailed on September 30, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL513 is a copy of a Non-Final Office Action mailed on June 16, 2009 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL514 is a copy of a Notice of Allowance mailed on June 21, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL515 is a copy of a Non-Final Office Action mailed on September 22, 2008 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL516 is a copy of a Notice of Allowance mailed on January 27, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,204.

Document NPL517 is a copy of a Non-Final Office Action mailed on September 21, 2010 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL518 is a copy of a Final Office Action mailed May 24, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 09/969,987.

Document NPL519 is a copy of a Notice of Allowance mailed on May 6, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/551,211.

Document NPL520 is a copy of a Notice of Allowance mailed on May 5, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/703,042.

Document NPL521 is a copy of a Notice of Allowance mailed on March 24, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL522 is a copy of a Notice of Allowance mailed on May 20, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,419.

Document NPL523 is a copy of a Final Office Action mailed on June 27, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/400,008.

Document NPL524 is a copy of a Notice of Allowance mailed on May 31, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 11/553,427.

Document NPL525 is a copy of a Final Office Action mailed on June 7, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/690,125.

Document NPL526 is a copy of a Final Office Action mailed on June 7, 2011 in the prosecution of co-pending, commonly-assigned U.S. Application No. 12/688,413.

The identification of these Office Actions is not to be construed as a waiver of secrecy as to those applications now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

Applicants submit copies of prior art submissions received from a third party, M-CAM, Inc. (NPL530-NPL537). These submissions were filed under 37 C.F.R. 1.501 in commonly-assigned patents.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 11/551,211, filed October 19, 2006, and 09/776,267, filed February 2, 2001 (now U.S. Pat. No. 7,181,608), in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

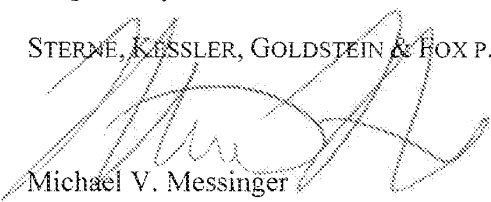

Atty. Dkt. No. 2855.004000B

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.

Re: U.S. Utility Patent Application  
Application No. 13/118,122; Filing Date: May 27, 2011  
For: **Systems and Methods for Accelerated Loading of Operating Systems  
and Application Programs**  
Inventors: FALLON *et al.*  
Our Ref: 2855.004000B

Sir:

Transmitted herewith for appropriate action are the following documents:

1. Information Disclosure Statement;
2. Form PTO/SB/08a (27 sheets) listing 556 documents (US1-US530 and FP1-FP26);
3. Form PTO/SB/08b (66 sheets) listing 598 documents (NPL1-NPL598); and
4. Copies of cited documents (FP1-FP26, NPL1-NPL400, NPL409-NPL456 and NPL458-NPL598).

The above-listed documents are filed electronically through EFS-Web.

In the event that extensions of time are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned.

Commissioner for Patents

FILING RECEIPT

Date Mailed: 06/13/2011

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections

## **PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

### **LICENSE FOR FOREIGN FILING UNDER**

**Title 35, United States Code, Section 184**

**Title 37, Code of Federal Regulations, 5.11 & 5.15**

#### **GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where

the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

**UTILITY  
PATENT APPLICATION  
TRANSMITTAL**

(Only for new nonprovisional applications under 37 CFR 1.53(b))

Attorney Docket No.	<b>2855.004000B</b>
First Inventor	<b>James J. Fallon</b>
Title	<b>Systems and Methods for Accelerated Loading of Operating Systems and Application Programs</b>
Express Mail Label No.	

**APPLICATION ELEMENTS**

See MPEP chapter 600 concerning utility patent application contents.

1.  **Fee Transmittal Form** (e.g., PTO/SB/17)
2.  **Applicant claims small entity status.**  
See 37 CFR 1.27.
3.  **Specification** [Total Pages 40 ]  
Both the claims and abstract must start on a new page  
(For information on the preferred arrangement, see MPEP 608.01(a))
4.  **Drawing(s)** (35 U.S.C. 113) [Total Sheets 13 ]
5. **Oath or Declaration** [Total Sheets 2 ]
- a.  Newly executed (original or copy)
- b.  A copy from a prior application (37 CFR 1.63(d))  
(for continuation/divisional with Box 18 completed)
- i.  **DELETION OF INVENTOR(S):**  
Signed statement attached deleting inventor(s)  
name in the prior application, see 37 CFR  
1.63(d)(2) and 1.33(b).
6.  **Application Data Sheet.** See 37 CFR 1.76

**STATEMENT UNDER 37 CFR 3.73(b)**

Atty. Docket No. 2855.004000B

Applicant/Patent Owner: Fallon et al.

Application No./Patent No.: To Be Assigned Filed/Issue Date: May 27, 2011 (herewith)

Titled: Systems and Methods for Accelerated Loading of Operating Systems and Application Programs

Realtime Data LLC, a limited liability company

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1.  the assignee of the entire right, title, and interest in;
2.  an assignee of less than the entire right, title, and interest in (The extent (by percentage) of its ownership interest is \_\_\_\_\_ %); or
3.  the assignee of an undivided interest in the entirety of (a complete assignment from one of the joint inventors was made)

the patent application/patent identified above, by virtue of either:

A.  An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 011797, Frame 0735, or for which a copy therefore is attached.

OR

B.  A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: \_\_\_\_\_ To: \_\_\_\_\_

The document was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy thereof is attached.

2. From: \_\_\_\_\_ To: \_\_\_\_\_

The document was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy thereof is attached.

3. From: \_\_\_\_\_ To: \_\_\_\_\_

The document was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy thereof is attached.

Additional documents in the chain of title are listed on a supplemental sheet(s).

As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Re: U.S. Non-Provisional Utility Patent Application under 37 C.F.R. § 1.53(b)  
(Continuation of Appl. No. 11/551,211; Filed October 19, 2006)  
Appl. No. To Be Assigned; Filed: Herewith  
For: **Systems and Methods for Accelerated Loading of Operating Systems  
and Application Programs**  
Inventors: Fallon *et al.*  
Our Ref: 2855.004000B

Sir:

The following documents are transmitted herewith for appropriate action by the U.S. Patent and Trademark Office:

1. Utility Patent Application Transmittal Form (PTO/SB/05);
2. Online Credit Card Payment Authorization for **\$1,090.00** to cover:  

\$1,090.00 Patent Application fee (including basic filing, search, and examination fees);
3. Authorization to Treat a Reply As Incorporating An Extension of Time Under 37 C.F.R. § 1.136(a)(3);
4. Authorization to Permit Access to Application by Participating Offices (PTO/SB/39);
5. U.S. Utility Patent Application entitled:  

**Systems and Methods for Accelerated Loading of Operating Systems and Application Programs**

and naming as inventors:  
**James J. Fallon, John Buck, Paul F. Pickel and Stephen J. McErlain**

the application consisting of:

Commissioner for Patents  
May 27, 2011  
Page 2

- a. An Application Data Sheet (37 C.F.R. § 1.76);
  - b. A specification containing:
    - i. 38 pages of description prior to the claims;
    - ii. 1 page listing 1 claim;
    - iii. a one (1) page abstract;
  - c. 13 sheets of drawings: (FIGS. 1-5, 6A, 6B, 7A, 7B, 8A, 8B and 9-10);
  - d. A copy of the executed Declaration, as originally filed in U.S. Appl. No. 11/551,211;
6. Power of Attorney to Prosecute Applications Before the USPTO (PTO/SB/80); and
  7. Statement under 37 C.F.R. § 3.73(b) (PTO/SB/96).

The above-listed documents are filed electronically through EFS-Web.

Fee payment is provided through online credit card payment. The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

	Application Number	To Be Assigned
	Filing Date	Herewith
	First Named Inventor	James J. Fallon
	Attorney Docket Number	2855 004000B
Title (Required)	Systems and Methods for Accelerated Loading of Operating Systems and Application Programs	

Send completed form to: Commissioner for Patents  
 P.O. Box 1450, Alexandria, VA 22313-1450

The undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the above-identified patent application is filed access to the above-identified patent application. See 37 CFR 1.14(c) and (h).

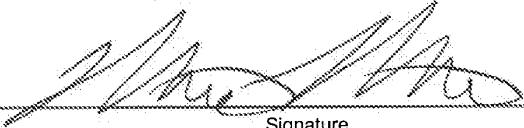

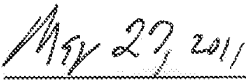

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the above-identified application with respect to: 1) the above-identified patent application-as-filed; 2) any foreign application to which the above-identified patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the above-identified patent application; and 3) any U.S. application-as-filed from which benefit is sought in the above-identified patent application.

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing the Authorization to Permit Access to Application by Participating Offices.

This written authorization should be submitted prior to the filing of a subsequent foreign application, in which priority is claimed to the above-identified patent application, with any intellectual property office (e.g., the EPO, JPO, KIPO, or DAS Accessing Office). However, if applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the above-identified patent application is filed to have access to the above-identified patent application, this written authorization should not be filed.

No fee will be charged under 37 CFR 1.19(b)(1) for providing a participating intellectual property office with an electronic copy of the above-identified patent application.

**This form must be signed by an authorized party in accordance with 37 CFR 1.14(c).**

WHAT IS CLAIMED IS:

1. A method for providing accelerated loading of an operating system, comprising the steps of:  
maintaining a list of boot data used for booting a computer system;  
preloading the boot data upon initialization of the computer system; and  
servicing requests for boot data from the computer system using the preloaded boot data.

## ABSTRACT

Systems and methods for providing accelerated loading of operating system and application programs upon system boot or application launch are disclosed. In one aspect, a method for providing accelerated loading of an operating system comprises the steps of: maintaining a list of boot data used for booting a computer system; preloading the boot data upon initialization of the computer system; and servicing requests for boot data from the computer system using the preloaded boot data. In another aspect, a method for providing accelerated launching of an application program comprises the steps of: maintaining a list of application data associated with an application program; preloading the application data upon launching the application program; and servicing requests for application data from a computer system using the preloaded application data.

DECLARATION

AS A BELOW NAMED INVENTOR, I hereby declare that:

My residence, post office address and citizenship are as stated next to my name

I believe that I am the original, first and sole (if only one name is listed below), or an original, first and joint inventor (if plural names are listed below), of the subject matter which is claimed and for which a patent is sought on the invention entitled:

TITLE: SYSTEMS AND METHODS FOR ACCELERATED LOADING OF OPERATING SYSTEMS AND APPLICATION PROGRAMS

the specification of which either is attached hereto or indicates an attorney docket no. \_\_\_\_\_, or:

[X] was filed in the U.S. Patent & Trademark Office on February 2, 2001 and assigned Serial No. 09/776,267.

[ ] and (if applicable) was amended on \_\_\_\_\_

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above. I acknowledge the duty to disclose information which is material to patentability and to the examination of this application in accordance with Title 37 of the Code of Federal Regulations §1.56. I hereby claim foreign priority benefits under Title 35, U.S. Code §119(a)-(d) or §365(b) of any foreign application(s) for patent or inventor's certificate, or §365(a) of any PCT international application which designated at least one country other than the United States, or §119(e) of any United States provisional application(s), listed below and have also identified below any foreign applications for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

Priority Claimed: Yes [ ] No [ ]

(Application Number) (Country) Day/Month/Year filed

Yes [ ] No [ ]

(Application Number) (Country) (Day/Month/Year filed)

I hereby claim the benefit under Title 35, U.S. Code, §120, of any United States application(s), or §365(c) of any PCT International application designating the United States, listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States or PCT International application(s) in the manner provided by the first paragraph of Title 35, U.S. Code, §112, I acknowledge the duty to disclose information material to patentability as defined in Title 37, The Code of Federal Regulations, §1.56(a) which became available between the filing date of the prior application and the national or PCT international filing date of this application:

60/180,114 February 3, 2000 Pending (Application Serial Number) (Filing Date) (STATUS: patented, pending, abandoned)

(Application Serial Number) (Filing Date) (STATUS: patented, pending, abandoned)

I hereby appoint the following attorneys: FRANK CHAU, Reg. No. 34,136; JAMES J. BITETTO, Reg. No. 40,513, FRANK V. DeROSA, Reg. No. 43,584; and GASPARE J. RANDAZZO, Reg. No. 41,528, each of them of F. CHAU & ASSOCIATES, LLP, 1900 Hempstead Turnpike, Suite 501, East Meadow, New York 11554 to prosecute this application and to transact all business in the U.S. Patent and Trademark Office connected therewith and with any divisional, continuation, continuation-in-part, reissue or re-examination application, with full power of appointment and with full power to substitute an associate attorney or agent, and to receive all patents which may issue thereon, and request that all correspondence be addressed to:

Frank Chau, Esq.
F. CHAU & ASSOCIATES, LLP
1900 Hempstead Turnpike, Suite 501
East Meadow, New York 11554
Area Code: 516-357-0091

I HEREBY DECLARE that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under §1001 of Title 18 U.S. Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

# SYSTEMS AND METHODS FOR ACCELERATED LOADING OF OPERATING SYSTEMS AND APPLICATION PROGRAMS

## CROSS-REFERENCE TO RELATED APPLICATION

[0001] This application is a continuation of United States Patent Application No. 11/551,211, filed on October 19, 2006, which is a continuation of United States Patent Application No. 09/776,267, filed on February 2, 2001, now U.S. Patent No. 7,181,608, which is based on a United States Provisional Application Serial No. 60/180,114, filed on February 3, 2000, all three of which are fully incorporated herein by reference in their entirety.

## BACKGROUND

### 1. Technical Field

[0002] The present invention relates generally to systems and methods for providing accelerated loading of operating system and application programs upon system boot or application launch and, more particularly, to data storage controllers employing lossless and/or lossy data compression and decompression to provide accelerated loading of operating systems and application programs.

### 2. Description of the Related Art

[0003] Modern computers utilize a hierarchy of memory devices. To achieve maximum performance levels, modern processors utilize onboard memory and on board cache to obtain high bandwidth access to both program and data. Limitations in process technologies currently prohibit placing a sufficient quantity of onboard memory for most applications. Thus, in order to offer sufficient memory for the operating system(s), application programs, and user data, computers often use various forms of popular off-processor high speed memory including static random access memory (SRAM), synchronous dynamic random access memory (SDRAM), synchronous burst static ram (SBSRAM). Due to the prohibitive cost of the high-speed random access memory, coupled with their power volatility, a third lower level of the hierarchy exists for non-volatile mass storage devices.

Atty. Dkt. No. 2855.004000B

[0004] Furthermore, mass storage devices offer increased capacity and fairly economical data storage. Mass storage devices (such as a "hard disk") typically store the operating system of a computer system, as well as applications and data and rapid access to such data is critical to system performance. The data storage and retrieval bandwidth of mass storage devices, however, is typically much less as compared with the bandwidth of other elements of a computing system. Indeed, over the last decade, although computer processor performance has improved by at least a factor of 50, magnetic disk storage performance has only improved by a factor of 5. Consequently, memory storage devices severely limit the performance of consumer, entertainment, office, workstation, servers, and mainframe computers for all disk and memory intensive operations.

[0005] The ubiquitous Internet combined with new multimedia applications has put tremendous emphasis on storage volumetric density, storage mass density, storewidth, and power consumption. Specifically, storage density is limited by the number of bits that are encoded in a mass storage device per unit volume. Similarly mass density is defined as storage bits per unit mass. Storewidth is the data rate at which the data may be accessed. There are various ways of categorizing storewidth in terms, several of the more prevalent metrics include sustained continuous storewidth, burst storewidth, and random access storewidth, all typically measured in megabytes/sec. Power consumption is canonically defined in terms of power consumption per bit and may be specified under a number of operating modes including active (while data is being accessed and transmitted) and standby mode. Hence one fairly obvious limitation within the current art is the need for even more volume, mass, and power efficient data storage.

[0006] Magnetic disk mass storage devices currently employed in a variety of home, business, and scientific computing applications suffer from significant seek-time access delays along with profound read/write data rate limitations. Currently the fastest available disk drives support only a sustained output data rate in the tens of megabytes per second data rate (MB/sec). This is in stark contrast to the modern Personal Computer's Peripheral Component Interconnect (PCI) Bus's low end 32 bit / 33Mhz input/output capability of 264 MB/sec and the PC's internal local bus capability of 800 MB/sec.

[0007] Another problem within the current art is that emergent high performance disk interface standards such as the Small Computer Systems Interface (SCSI-3), Fibre

Channel, AT Attachment UltraDMA/66/100, Serial Storage Architecture, and Universal Serial Bus offer only higher data transfer rates through intermediate data buffering in random access memory. These interconnect strategies do not address the fundamental problem that all modern magnetic disk storage devices for the personal computer marketplace are still limited by the same typical physical media restrictions. In practice, faster disk access data rates are only achieved by the high cost solution of simultaneously accessing multiple disk drives with a technique known within the art as data striping and redundant array of independent disks (RAID).

[0008] RAID systems often afford the user the benefit of increased data bandwidth for data storage and retrieval. By simultaneously accessing two or more disk drives, data bandwidth may be increased at a maximum rate that is linear and directly proportional to the number of disks employed. Thus another problem with modern data storage systems utilizing RAID systems is that a linear increase in data bandwidth requires a proportional number of added disk storage devices.

[0009] Another problem with most modern mass storage devices is their inherent unreliability. Many modern mass storage devices utilize rotating assemblies and other types of electromechanical components that possess failure rates one or more orders of magnitude higher than equivalent solid-state devices. RAID systems employ data redundancy distributed across multiple disks to enhance data storage and retrieval reliability. In the simplest case, data may be explicitly repeated on multiple places on a single disk drive, on multiple places on two or more independent disk drives. More complex techniques are also employed that support various trade-offs between data bandwidth and data reliability.

[0010] Standard types of RAID systems currently available include RAID Levels 0, 1, and 5. The configuration selected depends on the goals to be achieved. Specifically data reliability, data validation, data storage /retrieval bandwidth, and cost all play a role in defining the appropriate RAID data storage solution. RAID level 0 entails pure data striping across multiple disk drives. This increases data bandwidth at best linearly with the number of disk drives utilized. Data reliability and validation capability are decreased. A failure of a single drive results in a complete loss of all data. Thus another problem with RAID systems is that low cost improved bandwidth requires a significant decrease in reliability.

[0011] RAID Level 1 utilizes disk mirroring where data is duplicated on an independent disk subsystem. Validation of data amongst the two independent drives is possible if the data is simultaneously accessed on both disks and subsequently compared. This tends to decrease data bandwidth from even that of a single comparable disk drive. In systems that offer hot swap capability, the failed drive is removed and a replacement drive is inserted. The data on the failed drive is then copied in the background while the entire system continues to operate in a performance degraded but fully operational mode. Once the data rebuild is complete, normal operation resumes. Hence, another problem with RAID systems is the high cost of increased reliability and associated decrease in performance.

[0012] RAID Level 5 employs disk data striping and parity error detection to increase both data bandwidth and reliability simultaneously. A minimum of three disk drives is required for this technique. In the event of a single disk drive failure, that drive may be rebuilt from parity and other data encoded on disk remaining disk drives. In systems that offer hot swap capability, the failed drive is removed and a replacement drive is inserted. The data on the failed drive is then rebuilt in the background while the entire system continues to operate in a performance degraded but fully operational mode. Once the data rebuild is complete, normal operation resumes.

[0013] Thus another problem with redundant modern mass storage devices is the degradation of data bandwidth when a storage device fails. Additional problems with bandwidth limitations and reliability similarly occur within the art by all other forms of sequential, pseudo-random, and random access mass storage devices. These and other limitations within the current art are addressed by the present invention.

#### SUMMARY OF THE INVENTION

[0014] The present invention is directed to systems and methods for providing accelerated loading of operating system and application programs upon system boot or application launch and, more particularly, to data storage controllers employing lossless and/or lossy data compression and decompression to provide accelerated loading of operating systems and application programs.

[0015] In one aspect of the present invention, a method for providing accelerated loading of an operating system comprises the steps of: maintaining a list of boot data used for

booting a computer system; preloading the boot data upon initialization of the computer system; and servicing requests for boot data from the computer system using the preloaded boot data. The boot data may comprise program code associated with an operating system of the computer system, an application program, and a combination thereof. In a preferred embodiment, the boot data is retrieved from a boot device and stored in a cache memory device.

- [0016] In another aspect, the method for accelerated loading of an operating system comprises updating the list of boot data during the boot process. The step of updating comprises adding to the list any boot data requested by the computer system not previously stored in the list and/or removing from the list any boot data previously stored in the list and not requested by the computer system.
- [0017] In yet another aspect, the boot data is stored in a compressed format on the boot device and the preloaded boot data is decompressed prior to transmitting the preloaded boot data to the requesting system.
- [0018] In another aspect, a method for providing accelerated launching of an application program comprises the steps of maintaining a list of application data associated with an application program; preloading the application data upon launching the application program; and servicing requests for application data from a computer system using the preloaded application data.
- [0019] In yet another aspect, a boot device controller for providing accelerated loading of an operating system of a host system comprises: a digital signal processor (DSP); a programmable logic device, wherein the programmable logic device is programmed by the digital signal processor to (i) instantiate a first interface for operatively interfacing the boot device controller to a boot device and to (ii) instantiate a second interface for operatively interfacing the boot device controller to the host system; and a non-volatile memory device, for storing logic code associated with the DSP, the first interface and the second interface, wherein the logic code comprises instructions executable by the DSP for maintaining a list of boot data used for booting the host system, preloading the boot data upon initialization of the host system, and servicing requests for boot data from the host system using the preloaded boot data. The boot device controller further includes a cache memory device for storing the preloaded boot data.

- [0020] The present invention is realized due to recent improvements in processing speed, inclusive of dedicated analog and digital hardware circuits, central processing units, (and any hybrid combinations thereof), that, coupled with advanced data compression and decompression algorithms are enabling of ultra high bandwidth data compression and decompression methods that enable improved data storage and retrieval bandwidth.
- [0021] These and other aspects, features and advantages, of the present invention will become apparent from the following detailed description of preferred embodiments that is to be read in connection with the accompanying drawings.

### BRIEF DESCRIPTION OF THE DRAWINGS

- [0022] Fig. 1 is a block diagram of a data storage controller according to one embodiment of the present invention;

## DETAILED DESCRIPTION OF PREFERRED EMBODIMENTS

[0032] In the following description, it is to be understood that system elements having equivalent or similar functionality are designated with the same reference numerals in the Figures. It is to be further understood that the present invention may be implemented in various forms of hardware, software, firmware, or a combination thereof. Preferably, the present invention is implemented on a computer platform including hardware such as one or more central processing units (CPU) or digital signal processors (DSP), a random access memory (RAM), and input/output (I/O) interface(s). The computer platform may also include an operating system, microinstruction code, and dedicated processing hardware utilizing combinatorial logic or finite state machines. The various processes and functions described herein may be either part of the hardware, microinstruction code or application programs that are executed via the operating system, or any combination thereof.

[0033] It is to be further understood that, because some of the constituent system components described herein are preferably implemented as software modules, the actual system connections shown in the Figures may differ depending upon the manner in that the systems are programmed. It is to be appreciated that special purpose microprocessors, dedicated hardware, or any combination thereof may be employed to implement the present invention. Given the teachings herein, one of ordinary skill in the related art will be able to contemplate these and similar implementations or configurations of the present invention.

### I. System Architectures

[0034] The present invention is directed to data storage controllers that provide increased data storage/retrieval rates that are not otherwise achievable using conventional disk controller systems and protocols to store/retrieve data to/from mass storage devices. The concept of "accelerated" data storage and retrieval was introduced in copending U.S. Patent Application Serial No. 09/266,394, filed March 11, 1999, entitled "System and Methods For Accelerated Data Storage and Retrieval" and copending U.S. Patent Application Serial No. 09/481,243, filed January 11, 2000, entitled "System and Methods For Accelerated Data Storage and Retrieval," both of which are commonly assigned and incorporated herein by reference. In general, as described in the above-incorporated

Atty. Dkt. No. 2855.004000B

applications, "accelerated" data storage comprises receiving a digital data stream at a data transmission rate which is greater than the data storage rate of a target storage device, compressing the input stream at a compression rate that increases the effective data storage rate of the target storage device and storing the compressed data in the target storage device. For instance, assume that a mass storage device (such as a hard disk) has a data storage rate of 20 megabytes per second. If a storage controller for the mass storage device is capable of compressing an input data stream with an average compression rate of 3:1, then data can be stored in the mass storage device at a rate of 60 megabytes per second, thereby effectively increasing the storage bandwidth ("storewidth") of the mass storage device by a factor of three. Similarly, accelerated data retrieval comprises retrieving a compressed digital data stream from a target storage device at the rate equal to, e.g., the data access rate of the target storage device and then decompressing the compressed data at a rate that increases the effective data access rate of the target storage device. Advantageously, accelerated data storage/retrieval mitigates the traditional bottleneck associated with, e.g., local and network disk accesses.

[0035] Referring now to Fig. 1, a high-level block diagram illustrates a data storage controller 10 according to one embodiment of the present invention. The data storage controller 10 comprises a data compression engine 12 for compressing/decompressing data (preferably in real-time or pseudo real-time) stored/retrieved from a hard disk 11 (or any other type of mass storage device) to provide accelerated data storage/retrieval. The DCE 12 preferably employs the data compression/decompression techniques disclosed in U.S. Serial No. 09/210,491 entitled "Content Independent Data Compression Method and System," filed on December 11, 1998, which is commonly assigned and which is fully incorporated herein by reference. It is to be appreciated that the compression and decompression systems and methods disclosed in U.S. Serial No. 09/210,491 are suitable for compressing and decompressing data at rates, which provide accelerated data storage and retrieval. A detailed discussion of a preferred "content independent" data compression process will be provided below.

[0036] The data storage controller 10 further comprises a cache 13, a disk interface (or disk controller) 14 and a bus interface 15. The storage controller 10 is operatively connected to the hard disk 12 via the disk controller 14 and operatively connected to an expansion bus (or main bus) 16 of a computer system via the bus interface 15. The disk

interface 14 may employ a known disk interface standard such as UltraDMA, SCSI, Serial Storage Architecture, FibreChannel or any other interface that provides suitable disk access data rates. In addition, the storage controller 10 preferably utilizes the American National Standard for Information Systems (ANSI) AT Attachment Interface (ATA/ATAPI-4) to connect the data storage controller 10 to the hard disk 12. As is known in the art, this standard defines the connectors and cables for the physical interconnects between the data storage controller and the storage devices, along with the electrical and logical characteristics of the interconnecting signals.

[0037] Further, the bus interface 15 may employ a known standard such as the PCI (Peripheral Component Interconnect) bus interface for interfacing with a computer system. The use of industry standard interfaces and protocols is preferable, as it allows the storage controller 10 to be backwards compatible and seamlessly integrated with current systems. However in new designs the present invention may be utilize any suitable computer interface or combination thereof.

[0038] It is to be understood that although Fig. 1 illustrates a hard disk 12, the storage controller 10 may be employed with any form of memory device including all forms of sequential, pseudo-random, and random access storage devices. Storage devices as known within the current art include all forms of random access memory, magnetic and optical tape, magnetic and optical disks, along with various other forms of solid-state mass storage devices. The current invention applies to all forms and manners of memory devices including, but not limited to, storage devices utilizing magnetic, optical, and chemical techniques, or any combination thereof. In addition, the cache 13 may comprise volatile or non-volatile memory, or any combination thereof. Preferably, the cache 13 is implemented in SDRAM (static dynamic random access memory).

[0039] The system of Fig. 1 generally operates as follows. When data is read from disk by the host computer, data flows from the disk 11 through the data storage controller 10 to the host computer. Data is stored in one of several proprietary compression formats on the disk 11 (e.g., "content independent" data compression). Data blocks are pre-specified in length, comprised of single or multiple sectors, and are typically handled in fractional or whole equivalents of tracks, e.g. V2 track, whole track, multiple tracks, etc. To read disk data, a DMA transfer is setup from the disk interface 14 to the onboard cache memory 13. The disk interface 14 comprises integral DMA control to allow transfer of

data from the disk 11 directly to the onboard cache 13 without intervention by the DCE 12. It should be noted that the DCE 12 acts as a system level controller and sets-up specific registers within both the disk interface 14 and bus interface 15 to facilitate DMA transfers to and from the cache memory 13. To initiate a transfer from the disk 11 to the cache 13, the DMA transfer is setup via specifying the appropriate command (read disk), the source address (disk logical block number), amount of data to be transferred (number of disk logical blocks), and destination address within the onboard cache memory 13. Then, a disk data interrupt signal ("DISKINT#") is cleared (if previously set and not cleared) and the command is initiated by writing to the appropriate address space. Once data has been read from disk 11 and placed into onboard cache memory 13, the DISKINT# interrupt is asserted notifying the DCE 12 that requested data is now available in the cache memory 13. Data is then read by the DMA controller within the DCE 12 and placed into local memory for subsequent decompression. The decompressed data is then DMA transferred from the local memory of the DCE 12 back to the cache memory 13. Finally, data is DMA transferred via the bus interface controller 15 from the cache memory 13 to the bus 16. It is to be understood that in the read mode, the data storage controller acts as a bus master. A bus DMA transfer is then setup via specifying the appropriate command (write to host computer), the source address within the cache memory 13, the quantity of data words to be transferred (transfers are preferably in 4 byte increments), and the destination address on the host computer. When a bus 16 read or write transaction has completed, the appropriate interrupt signals (respectively referred to as PCIRDINT# and PCIWRINT#) are asserted to the DCE 12. Either of these interrupts are cleared by a corresponding interrupt service routines through a read or write to the appropriate address of the DCE 12.

**[0040]** Similarly, when data is written to the disk 11 from the host computer, data flows from the host computer through the data storage controller 10 and onto disk 11. Data is normally received from the host computer in uncompressed (raw) format and is compressed by the DCE 12 and stored on the disk 11. Data blocks from the host are pre-specified in length and are typically handled in blocks that are a fixed multiplier higher than fractional or whole equivalents of tracks, e.g. V2 track, whole track, multiple tracks, etc. This multiplier is preferably derived from the expected average compression ratio that is selected when the disk is formatted with the virtual file management system. To

read host computer data, a bus DMA transfer is setup from the host bus 16 to the onboard cache memory 13. The bus interface controller 15 comprises integral DMA control that allows large block transfers from the host computer directly to the onboard cache 13 without intervention by the DCE 12. The bus interface controller 15 acts as a host computer Bus Master when executing such transfer. Once data has been read from the host and placed into onboard cache memory 13, the data is read by the onboard DMA controller (residing on the DCE 12) and placed into local memory for subsequent compression. The compressed data is then DMA transferred from the local memory of the DCE 12 back to the cache memory 13. Finally, data is DMA transferred via the disk controller 14 from the cache 13 to the disk 11.

[0041] As discussed in greater detail below, upon host computer power-up or external user reset, the data storage controller 10 initializes the onboard interfaces 14, 5 prior to release of the external host bus 16 from reset. The processor of the host computer then requests initial data from the disk 11 to facilitate the computer's boot-up sequence. The host computer requests disk data over the Bus 16 via a command packet issued from the host computer. Command packets are preferably eight words long (in a preferred embodiment, each word comprises 32 bits). Commands are written from the host computer to the data storage controller 10 with the host computer as the Bus Master and the data storage controller 10 as the slave. The data storage controller 10 includes at least one Base Address Register (BAR) for decoding the address of a command queue of the data storage controller 10. The command queue resides within the cache 13 or within onboard memory of the DCE 12.

[0042] When a command is received from the host computer, an interrupt (referred to herein as PCICMDINT#) is generated to the DCE processor. The eight-word command is read by the DCE 12 and placed into the command queue. Because the commands occupy a very small amount of memory, the location of the command queue is at the discretion of software and the associated system level performance considerations. Commands may be moved from the bus interface 16 to the command queue by wither explicit reads and writes by the DCE processor or, as explained below, by utilizing programmed DMA from an Enhanced DMA Controller (EDMA) residing on the DCE 12. This second technique may better facilitate system throughput by allowing the EDMA to automatically load

commands while the highly pipelined data compression and decompression processing in the DCE is executed fully undisturbed.

[0043] The DCE 12, disk interface 14 and bus interface 15 commonly share the cache 13. As explained in detail below, the storage controller 10 preferably provides maximum system bandwidth by allowing simultaneous data transfers between the disk 12 and cache 13, the DCE 12 and the cache 13, and the expansion bus 16 and the cache 13. This is realized by employing an integral DMA (direct memory access) protocol that allows the DCE 12, disk interface 14 and bus interface 15 to transfer data without interrupting or interfering with other ongoing processes. In particular, as explained in detail below, an integral bandwidth allocation controller (or arbitrator) is preferably employed to allow the DCE 12, disk controller 14, and bus interface 15 to access the onboard cache with a bandwidth proportional to the overall bandwidth of the respective interface or processing element. The bandwidth arbitration occurs transparently and does not introduce latency in memory accesses. Bandwidth division is preferably performed with a high degree of granularity to minimize the size of requisite onboard buffers to synchronize data from the disk interface 14 and bus interface 15.

[0044] It is to be appreciated that the implementation of a storage controller according to the present invention significantly accelerates the performance of a computer system and significantly increases hard disk data storage capacity. For instance, depending on the compression rate, for personal computers running standard Microsoft Windows® based business application software, the storage controller provides: (1) an increase of n:l in disk storage capacity (for example, assuming a compression ration of 3:1, a 20 gigabyte hard drive effectively becomes a 60 gigabyte hard drive) (2) a significant decrease in the computer boot-up time (turn-on and operating system load) and the time for loading application software and (3) User data storage and retrieval is increased by a factor of n:l.

[0045] Referring now to Fig. 2, a block diagram illustrates a data storage controller 20 according to another embodiment of the present invention. More specifically, Fig. 2 illustrates a PCB (printed circuit board) implementation of the data storage controller 10 of Fig. 1. The storage controller 20 comprises a DSP (digital signal processor) 21 (or any other micro-processor device) that implements the DCE 12 of Fig. 1. The storage controller 21 further comprises at least one programmable logic device 22 (or volatile logic device). The programmable logic device 22 preferably implements the logic

(program code) for instantiating and driving both the disk interface 14 and the bus interface 15 and for providing full DMA capability for the disk and bus interfaces 14, 15. Further, as explained in detail below, upon host computer power-up and/or assertion of a system-level "reset" (e.g., PCI Bus reset), the DSP 21 initializes and programs the programmable logic device 22 before of the completion of initialization of the host computer. This advantageously allows the data storage controller 20 to be ready to accept and process commands from the host computer (via the bus 16) and retrieve boot data from the disk (assuming the data storage controller 20 is implemented as the boot device and the hard disk stores the boot data (e.g., operating system, etc.)).

[0046] The data storage controller 20 further comprises a plurality of memory devices including a RAM (random access memory) device 23 and a ROM (read only memory) device 24 (or FLASH memory or other types of non-volatile memory). The RAM device 23 is utilized as on-board cache and is preferably implemented as SDRAM (preferably, 32 megabytes minimum). The ROM device 24 is utilized for non-volatile storage of logic code associated with the DSP 21 and configuration data used by the DSP 21 to program the programmable logic device 22. The ROM device 24 preferably comprises a one time (erasable) programmable memory (OTP-EPROM) device.

[0047] The DSP 21 is operatively connected to the memory devices 23, 24 and the programmable logic device 22 via a local bus 25. The DSP 21 is also operatively connected to the programmable logic device 22 via an independent control bus 26. The programmable logic device 22 provides data flow control between the DSP 21 and the host computer system attached to the bus 16, as well as data flow control between the DSP 21 and the storage device. A plurality of external I/O ports 27 are included for data transmission and/or loading of one programmable logic devices. Preferably, the disk interface 14 driven by the programmable logic device 22 supports a plurality of hard drives.

[0048] The storage controller 20 further comprises computer reset and power up circuitry 28 (or "boot configuration circuit") for controlling initialization (either cold or warm boots) of the host computer system and storage controller 20. A preferred boot configuration circuit and preferred computer initialization systems and protocols are described in U.S. Patent Application Serial No. \_\_\_\_\_ (Attorney Docket No. 8011-10), filed concurrently herewith (Express Mail Label No. EL679454245US), which is

commonly assigned and incorporated herein by reference. Preferably, the boot configuration circuit 28 is employed for controlling the initializing and programming the programmable logic device 22 during configuration of the host computer system (i.e., while the CPU of the host is held in reset). The boot configuration circuit 28 ensures that the programmable logic device 22 (and possibly other volatile or partially volatile logic devices) is initialized and programmed before the bus 16 (such as a PCI bus) is fully reset.

**[0049]** In particular, when power is first applied to the boot configuration circuit 28, the boot configuration circuit 28 generates a control signal to reset the local system (e.g., storage controller 20) devices such as a DSP, memory, and I/O interfaces. Once the local system is powered-up and reset, the controlling device (such as the DSP 21) will then proceed to automatically determine the system environment and configure the local system to work within that environment. By way of example, the DSP 21 of the disk storage controller 20 would sense that the data storage controller 20 is on a PCI computer bus (expansion bus) and has attached to it a hard disk on an IDE interface. The DSP 21 would then load the appropriate PCI and IDE interfaces into the programmable logic device 22 prior to completion of the host system reset. It is to be appreciated that this can be done for all computer busses and boot device interfaces including: PCI, NuBus, ISA, Fiber Channel, SCSI, Ethernet, DSL, ADSL, IDE, DMA, Ultra DMA, and SONET. Once the programmable logic device 22 is configured for its environment, the boot device controller is reset and ready to accept commands over the computer/expansion bus 16. Details of the boot process using a boot device comprising a programmable logic device will be provided below.

**[0050]** It is to be understood that the data storage controller 20 may be utilized as a controller for transmitting data (compressed or uncompressed) to and from remote locations over the DSP I/O ports 27 or system bus 16, for example. Indeed, the I/O ports 27 of the DSP 21 may be used for transmitting data (compressed or uncompressed) that is either retrieved from the disk 11 or received from the host system via the bus 16, to remote locations for processing and/or storage. Indeed, the I/O ports may be operatively connected to other data storage controllers or to a network communication channels. Likewise, the data storage controller 20 may receive data (compressed or uncompressed) over the I/O ports 27 of the DSP 21 from remote systems that are connected to the I/O

ports 27 of the DSP, for local processing by the data storage controller 20. For instance, a remote system may remotely access the data storage controller (via the I/O ports of the DSP or system bus 16) to utilize the data compression, in which case the data storage controller would transmit the compressed data back to the system that requested compression.

[0051] The DSP 21 may comprise any suitable commercially available DSP or processor. Preferably, the data storage controller 20 utilizes a DSP from Texas Instruments' 320 series, C62x family, of DSPs (such as TMS320C6211GFN-150), although any other DSP or processor comprising a similar architecture and providing similar functionalities may be employed. The preferred DSP is capable of up to 1.2 billion instructions per second. Additional features of the preferred DSP include a highly parallel eight processor single cycle instruction execution, onboard 4K byte UP Program Cache, 4K L1D Data Cache, and 64K byte Unified L2 Program/Data Cache. The preferred DSP further comprises a 32 bit External Memory Interface (EMIF) that provides for a glueless interface to the RAM 23 and the non-volatile memory 24 (ROM). The DSP further comprises two multi-channel buffered serial ports (McBSPs) and two 32 bit general purpose timers. Preferably, the storage controller disables the I/O capability of these devices and utilizes the I/O ports of the DSP as general purpose I/O for both programming the programmable logic device 22 using a strobed eight bit interface and signaling via a Light Emitting Diode (LED). Ancillary DSP features include a 16 bit Host Port Interface and full JTAG emulation capability for development support.

[0052] The programmable logic device 22 may comprise any form of volatile or non-volatile memory. Preferably, the programmable logic device 22 comprises a dynamically reprogrammable FPGA (field programmable gate array) such as the commercially available Xilinx Spartan Series XCS40XL-PQ240-5 FPGA. As discussed in detail herein, the FPGA instantiates and drives the disk and bus interfaces 14, 15.

[0053] The non-volatile memory device 24 preferably comprises a 128 Kbyte M27W101-80K one time (erasable) programmable read only memory, although other suitable non-volatile storage devices may be employed. The non-volatile memory device 24 is decoded at a designated memory space in the DSP 21. The non-volatile memory device 24 stores the logic for the DSP 21 and configuration data for the programmable logic device 22. More specifically, in a preferred embodiment, the lower 80 Kbytes of the non-

volatile memory device 24 are utilized for storing DSP program code, wherein the first 1k bytes are utilized for the DSP's boot loader. Upon reset of the DSP 21 (via boot configuration circuit 28), the first 1K of memory of the non-volatile memory device 24 is copied into an internal RAM of the DSP 21 by e.g., the DSP's Enhanced DMA Controller (EDMA). Although the boot process begins when the CPU of the host system is released from external reset, the transfer of the boot code into the DSP and the DSP's initialization of the programmable logic device actually occurs while the CPU of the host system is held in reset. After completion of the 1K block transfer, the DSP executes the boot loader code and continues thereafter with executing the remainder of the code in non-volatile memory device to program the programmable logic device 22.

[0054] More specifically, in a preferred embodiment, the upper 48K bytes of the non-volatile memory device 24 are utilized for storing configuration data associated with the programmable logic device 22. If the data storage controller 20 is employed as the primary boot storage device for the host computer, the logic for instantiating and driving the disk and bus interfaces 14, 15 should be stored on the data storage controller 20 (although such code may be stored in remotely accessible memory locations) and loaded prior to release of the host system bus 16 from "reset". For instance, revision 2.2 of the PCI Local Bus specification calls for a typical delay of 100msec from power-stable before release of PCI Reset. In practice this delay is currently 200msec although this varies amongst computer manufacturers. A detailed discussion of the power-on sequencing and boot operation of the data storage controller 20 will be provided below.

[0055] Fig. 3 illustrates another embodiment of a data storage controller 30 wherein the data storage controller 35 is embedded within the motherboard of the host computer system. This architecture provides the same functionality as the system of Fig. 2, and also adds the cost advantage of being embedded on the host motherboard. The system comprises additional RAM and ROM memory devices 23a, 24a, operatively connected to the DSP 21 via a local bus 25a.

[0056] Fig. 4 illustrates another embodiment of a data storage controller. The data storage controller 40 comprises a PCB implementation that is capable of supporting RAID levels 0,1 and 5. This architecture is similar to those of Fig. 1 and 2, except that a plurality of programmable logic devices 22, 22a are utilized. The programmable logic device 22 is dedicated to controlling the bus interface 15. The programmable logic

device 22a is dedicated to controlling a plurality of disk interfaces 14, preferably three interfaces. Each disk interface 14 can connect up to two drives. The DSP in conjunction with the programmable logic device 22a can operate at RAID level 0, 1 or 5. At RAID level 0, which is disk striping, two interfaces are required. This is also true for RAID level 1, which is disk minoring. At RAID level 5, all three interfaces are required.

[0057] Fig. 5 illustrates another embodiment of a data storage controller according to the present invention. The data storage controller 45 provides the same functionality as that of Figure 4, and has the cost advantage of being embedded within the computer system motherboard.

## II. Initializing A Programmable Logic Device

[0058] As discussed above with reference to Fig. 2, for example, the data storage controller 20 preferably employs an onboard Texas Instruments TMS320C6211 Digital Signal Processor (DSP) to program the onboard Xilinx Spartan Series XCS4OXL FPGA upon power-up or system level PCI reset. The onboard boot configuration circuit 28 ensures that from system power-up and/or the assertion of a bus reset (e.g., PCI reset), the DSP 21 is allotted a predetermined amount of time (preferably a minimum of 10msec) to boot the DSP 21 and load the programmable logic device 22. Because of a potential race condition between either the host computer power-up or assertion of PCI Bus reset and configuration of the programmable logic device 20 (which is used for controlling the boot device and accepting PCI Commands), an "Express Mode" programming mode for configuring the SpartanXL family XCS4OXL device is preferably employed. The XCS4OXL is factory set to byte-wide Express-Mode programming by setting both the MI/M0 bits of the XCS4OXL to 0x0. Further, to accommodate express mode programming of the programmable logic device 22, the DSP 21 is programmed to utilize its serial ports reconfigured as general purpose I/O. However, after the logic device 22 is programmed, the DSP 21 may then reconfigure its serial ports for use with other devices. Advantageously, using the same DSP ports for multiple purposes affords greater flexibility while minimizing hardware resources and thus reducing product cost.

[0059] The volatile nature of the logic device 22 effectively affords the ability to have an unlimited number of hardware interfaces. Any number of programs for execution by the programmable logic device 22 can be kept in an accessible memory location (EPROM, hard disk, or other storage device). Each program can contain new disk interfaces,

Atty. Dkt. No. 2855.004000B

interface modes or subsets thereof. When necessary, the DSP 21 can clear the interface currently residing in the logic device 22 and reprogram it with a new interface. This feature allows the data storage controller 20 to have compatibility with a large number of interfaces while minimizing hardware resources and thus reducing product cost.

[0060] A preferred protocol for programming the programmable logic device can be summarized in the following steps: (1) Clearing the configuration memory; (2) Initialization; (3) Configuration; and (4) Start-Up. When either of three events occur: the host computer is first powered-up or a power failure and subsequent recovery occurs (cold boot), or a front panel computer reset is initiated (warm boot), the host computer asserts RST# (reset) on the PCI Bus. As noted above, the data storage controller 20 preferably comprises a boot configuration circuit 28 that senses initial host computer power turn-on and/or assertion of a PCI Bus Reset ("PCI RST#"). It is important to note that assuming the data storage controller 20 is utilized in the computer boot-up sequence, it should be available exactly 5 clock cycles after the PCI RST# is deasserted, as per PCI Bus Specification Revision 2.2. While exact timings vary from computer to computer, the typical PCI bus reset is asserted for approximately 200msec from initial power turn-on.

[0061] In general, PCI RST# is asserted as soon as the computer's power exceeds a nominal threshold of about 1 volt (although this varies) and remains asserted for 200msec thereafter. Power failure detection of the 5volt or 3.3 volt bus typically resets the entire computer as if it is an initial power-up event (i.e., cold boot). Front panel resets (warm boots) are more troublesome and are derived from a debounced push-button switch input. Typical front panel reset times are a minimum of 20msec, although again the only governing specification limit is 1msec reset pulse width.

[0062] As discussed in detail below, it may not be necessary to reload the programmable logic device 22 each time the DSP is reset. The boot configuration circuit 20 preferably comprises a state machine output signal that is readable by the DSP 21 to ascertain the type of boot process requested. For example, with a front-panel reset (warm boot), the power remains stable on the PCI Bus, thus the programmable logic device 22 should not require reloading.

[0063] Referring now to Fig. 6, a flow diagram illustrates a method for initializing the programmable logic device 22 according to one aspect of the invention. In the following

discussion, it is assumed that the programmable logic device 22 is always reloaded, regardless of the type of boot process. Initially, in Fig. 6a, the DSP 21 is reset by asserting a DSP reset signal (step 50). Preferably, the DSP reset signal is generated by the boot circuit configuration circuit 28 (as described in the above-incorporated U.S. Serial No. \_\_\_\_\_ (Attorney Docket No. 8011-10). While the DSP reset signal is asserted (e.g., active low), the DSP is held in reset and is initialized to a prescribed state. Upon deassertion of the DSP Reset signal, the logic code for the DSP (referred to as the "boot loader") is copied from the non-volatile logic device 24 into memory residing in the DSP 21 (step 51). This allows the DSP to execute the initialization of the programmable logic device 22. In a preferred embodiment, the lower 1K bytes of EPROM memory is copied to the first 1k bytes of DSP's low memory (0x0000 0000 through 0x0000 03FF). As noted above, the memory mapping of the DSP 21 maps the CE1 memory space located at 0x9000 0000 through 0x9001 FFFF with the OTP EPROM. In a preferred embodiment using the Texas Instrument DSP TMS320c6211GFN-150, this ROM boot process is executed by the EDMA controller of the DSP. It is to be understood, however, that the EDMA controller may be instantiated in the programmable logic device (Xilinx), or shared between the DSP and programmable logic device.

[0064] After the logic is loaded in the DSP 21, the DSP 21 begins execution out of the lower 1K bytes of memory (step 52). In a preferred embodiment, the DSP 21 initializes with at least the functionality to read EPROM Memory (CE 1) space. Then, as described above, the DSP preferably configures its serial ports as general purpose I/O (step 53).

[0065] Next, the DSP 21 will initialize the programmable logic device 22 using one or more suitable control signals. (step 54). After initialization, the DSP 21 begins reading the configuration data of the programmable logic device 22 from the non-volatile memory 24 (step 55). This process begins with clearing a Data Byte Counter and then reading the first data byte beginning at a prespecified memory location in the non-volatile memory 24 (step 56). Then, the first output byte is loaded into the DSP's I/O locations with LSB at DO and MSB at D7 (step 57). Before the first byte is loaded to the logic device 22, a prespecified time delay (e.g., 5usec) is provided to ensure that the logic device 22 has been initialized (step 58). In particular, this time delay should be of a duration at least equal to the internal setup time of the programmable logic device 22 from completion of

initialization. Once this time delay has expired, the first data byte in the I/O bus 26 of the DSP 21 is latched into the programmable logic device 22 (step 59).

[0066] Next, a determination is made as to whether the Data Byte Counter is less than a prespecified value (step 60). If the Data Byte Counter is less than the prespecified value (affirmative determination in step 60), the next successive data byte for the programmable logic device 22 is read from the non-volatile memory 24 (step 61) and the Data Byte Counter is incremented (step 62).

[0067] Next, the read data byte is loaded into the I/O of the DSP (step 63). A time delay of, e.g., 20 nsec is allowed to expire before the data byte is latched to the programmable logic device to ensure that a minimum data set-up time to the programmable logic device 21 is observed (step 64) and the process is repeated (return to step 60). It is to be appreciated that steps 60-64 may be performed while the current data byte is being latched to the programmable logic device. This provides "pipeline" programming of the logic device 22 and minimizes programming duration.

[0068] When the Data Byte Counter is not less than the prespecified count value negative determination in step 60), as shown in Fig. 6b, the last data byte is read from the non-volatile memory and latched to the programmable logic device 22, and the DSP 21 will then poll a control signal generated by the programmable logic device 22 to ensure that the programming of the logic device 22 is successful (step 65). If programming is complete (affirmative determination in step 66), the process continues with the remainder of the data storage controller initialization (step 67). Otherwise, a timeout occurs (step 68) and upon expiration of the timeout, an error signal is provided and the programming process is repeated (step 69).

### III. Data Storage and Retrieval Protocols

[0069] A detailed discussion of operational modes of a data storage controller will now be provided with reference to the embodiment of Fig 2 (although it is to be understood that the following discussion is applicable to all the above-described embodiments). The data storage controller 20 utilizes a plurality of commands to implement the data storage, retrieval, and disk maintenance functions described herein. Each command preferably comprises eight thirty-two bit data words stored and transmitted in little endian format. The commands include: Read Disk Data; Write Disk Data; and Copy Disk Data, for example. For example, a preferred format for the "Read Disk Data" command is:

31	16	15	8	7	0	
Command Packet Number 0000h to FFFFh		Command Type 00h		Command Parameters (00h)		00h
Starting Block Address (Least Significant Word)						04h
Starting Block Address (Most Significant Word)						08h
Number of Blocks (Least Significant Word)						0Ch
Number of Blocks (Most Significant Word)						10h
Destination Address (Least Significant Word)						14h
Destination Address (Most Significant Word)						18h
Checksum			Reserved			1Ch

**[0070]** The host computer commands the data storage controller 20 over the PCI Bus 16, for example. Upon computer power-up or reset, the host computer issues a PCI Bus Reset with a minimum pulse width of 100msec (in accordance with PCI Bus Specification Revision 2.2). Upon completion of the PCI Bus reset, the data storage controller 20 is fully initialized and waiting for completion of the PCI configuration cycle. Upon completion of the PCI configuration cycles, the data storage controller will wait in an idle state for the first disk command.

**[0071]** During operation, the host operating system may issue a command to the data storage controller 20 to store, retrieve, or copy specific logical data blocks. Each command is transmitted over the PCI Bus 16 at the Address assigned to the Base Address Register (BAR) of the data storage controller 20.

**[0072]** The commands issued by the host system to the data storage controller and the data transmitted to and from the data storage controller are preferably communicated via a 32 bit, 33MHz, PCI Data Bus. As noted above, the PCI Interface is preferably housed within the onboard Xilinx Spartan XCS40XL-5 40,000 field programmable gate array which instantiates a PCI 32, 32 Bit, 33MHz PCI Bus Interface (as per PCI Bus Revision 2.2).

**[0073]** The PCI Bus interface operates in Slave Mode when receiving commands and as a Bus Master when reading or writing data. The source and destination for all data is specified within each command packet. When setting up data transfers, the Enhanced Direct Memory Access (EDMA) Controller of the DSP (or the Xilinx) utilizes two

Control Registers, a 16 Word Data Write to PCI Bus FIFO, a 16 Word Data Read From PCI Bus FIFO, and a PCI Data Interrupt (PCIDATINT). The 32 Bit PCI Address Register holds either the starting Source Address for data storage controller Disk Writes where data is read from the PCI Bus, or the starting Destination Address for data storage controller Disk Reads where data is written to the PCI Bus. The second control register is a PCI Count Register that specifies the direction of the data transfer along with the number of 32 bit Data words to be written to or from the PCI bus.

- [0074]** Data is written to the PCI Bus from the DSP via a 16 Word PCI Data Write FIFO located within a prespecified address range. Data writes from the DSP to anywhere within the address range place that data word in the next available location within the FIFO. Data is read from the PCI Bus to the DSP via a 16 Word PCI Data Read FIFO located within a prespecified address range and data read by the DSP from anywhere within this address range provides the next data word from the FIFO.
- [0075]** After completion of the Xilinx initialization by the DSP and subsequent negation of the PCI Bus Reset signal (RST#) by the host computer's PCI Bridge, the data storage controller is ready to accept commands from the host computer via the PCI Bus. When accepting commands it should be noted that the data storage controller is a PCI Target (Slave) Device. Commands are preferably fixed in length at exactly 8 (thirty-two bit) words long. Commands are written from the host computer to the data storage controller via the PCI Bus utilizing the data storage controller's Base Address Register 0 (BAR0). The PCI Bus Reset initially sets the Command FIFO's Counter to zero and also signals the Xilinx's PCI Bus State Controller that the Command FIFO is empty and enable to accept a command.
- [0076]** Whenever a data write occurs within the valid data range of BAR0, the data word is accepted from PCI Bus and placed in the next available memory position within the Command FIFO. When the last of the 8 thirty-two bit data words is accepted by the PCI Bus (thus completing the command, i.e. last word for the command FIFO to be full), the PCI Bus State Controller is automatically set to Target Abort (within same PCI Transaction) or Disconnect Without Data for all subsequent PCI transactions that try to writes to BAR0. This automatic setting is the responsibility of the Xilinx PCI Data Interface.

- [0077] The PCI Command FIFO State Controller then asserts the Command Available Interrupt to the DSP. The DSP services the Command Available Interrupt by reading the command data from a prespecified address range. It should be noted that the command FIFO is read sequentially from any data access that reads data within such address range. It is the responsibility of the DSP to understand that the data is read sequentially from any order of accesses within the data range and should thus be stored accordingly.
- [0078] Upon completion of the Command Available Interrupt Service Routine the DSP executes a memory read or write to desired location within the PCI Control Register Space mapped into the DSP's CE3 (Xilinx) memory space. This resets the Command FIFO Counter back to zero. Next, the DSP executes a memory read or write to location in the DSP Memory Space that clears the Command Available Interrupt. Nested interrupts are not possible since the PCI Bus State Machine is not yet able to accept any Command Data at BAR0. Once the Command Available Interrupt routine has cleared the interrupt and exited, the DSP may then enable the PCI State Machine to accept a new command by reading or writing to PCI Command Enable location within the PCI Command FIFO Control Register Space.
- [0079] A preferred architecture has been selected to enable the data storage controller to operate on one command at a time or to accept multiple prioritized commands in future implementations. Specifically, the decoupling of the Command Available Interrupt Service Routine from the PCI State Machine that accepts Commands at BAR0 enables the DSP's "operating system kernel" to accept additional commands at any time by software command. In single command operation, a command is accepted, the Command Available Interrupt Cleared, and the Command executed by the data storage controller in PCI Master Mode prior to the enabling of the PCI State machine to accept new commands.
- [0080] In a prioritized multi-command implementation, the "operating system kernel" may elect to immediately accept new commands or defer the acceptance of new commands based upon any software implemented decision criteria. In one embodiment, the O/S code might only allow a pre-specified number of commands to be queued. In another embodiment, commands might only be accepted during processor idle time or when the DSP is not executing time critical (i.e. highly pipelined) compress/decompress

routines. In yet another embodiment, various processes are enabled based upon a pre-emptive prioritized based scheduling system.

[0081] As previously stated, the data storage controller retrieves commands from the input command FIFO in 8 thirty-two bit word packets. Prior to command interpretation and execution, a command's checksum value is computed to verify the integrity of the data command and associated parameters. If the checksum fails, the host computer is notified of the command packet that failed utilizing the Command Protocol Error Handler. Once the checksum is verified the command type and associated parameters are utilized as an offset into the command "pointer" table or nay other suitable command/data structure that transfers control to the appropriate command execution routine.

[0082] Commands are executed by the data storage controller with the data storage controller acting as a PCI Master. This is in direct contrast to command acceptance where the data storage controller acts as a PCI Slave. When acting as a PCI Bus Master, the data storage controller reads or writes data to the PCI Bus utilizing a separate PCI Bus Data FIFO (distinct & apart from the Command FIFO). The PCI Data FIFO is 64 (thirty-two bit) words deep and may be utilized for either data reads or data writes from the DSP to the PCI Bus, but not both simultaneously.

[0083] For data to be written from the data storage controller to the Host Computer, the DSP must first write the output data to the PCI Bus Data FIFO. The Data FIFO is commanded to PCI Bus Data Write Mode by writing to a desired location within the Xilinx (CE3) PCI Control Register Space. Upon PCI Bus Reset the default state for the PCI Data FIFO is write mode and the PCI Data FIFO Available Interrupt is cleared. The PCI Data FIFO Available Interrupt should also be software cleared by writing to a prespecified location. Preferably, the first task for the data storage controller is for system boot-up or application code to be downloaded from disk. For reference, PCI Data Read Mode is commanded by writing to location BFF0 0104. The PCI Bus Reset initializes the Data FIFO Pointer to the first data of the 64 data words within the FIFO. However this pointer should always be explicitly initialized by a memory write to location BFF0 0108. This ensures that the first data word written to the FIFO by the DSP performing the data write anywhere in address range B000 0000 to B000 01FF is placed at the beginning of the FIFO. Each subsequent write to any location within this address range then places one thirty-two bit data word into the next available location within the

PCI Data FIFO. The FIFO accepts up to 64 thirty-two bit data words although it should be clearly understood that not all data transfers to and from the PCI Bus will consist of a full FIFO. Counting the number of thirty-two bit data words written to the PCI Data FIFO is the responsibility of the DSP Code. It is envisioned that the DSP will, in general, use 64 word DMA data transfers, thus alleviating any additional processor overhead.

[0084] When the data has been transferred from the DSP to the PCI Data FIFO, the PCI Bus Controller also needs the address of the PCI Target along with the number of data words to be transmitted. In the current data storage controller implementation, the PCI Bus Address is thirty-two bits wide, although future PCI bus implementations may utilize multiword addressing and/or significantly larger (64 bit & up) address widths. The single thirty-two bit address word is written by the DSP to memory location `aaaa+0x10` in the PCI Control Register Space.

[0085] Finally, the PCI Bus Data Write transaction is initiated by writing the PCI Data FIFO word count to a prespecified memory address. The word count value is always decimal 64 or less (`0x3F`). When the count register is written the value is automatically transferred to the PCI Controller for executing the PCI Bus Master writes.

[0086] When the PCI Bus has completed the transfer of all data words within the PCI Data FIFO the PCI Data FIFO Available Interrupt is set. The DSP PCI Data FIFO Available Interrupt handler will then check to see if additional data is waiting or expected to be written to the PCI Data Bus. If additional data is required the interrupt is cleared and the data transfer process repeats. If no additional data is required to be transferred then the interrupt is cleared and the routine must exit to a system state controller. For example, if the command is complete then master mode must be disabled and then slave mode (command mode) enabled — assuming a single command by command execution data storage controller.

[0087] For data to be read by the data storage controller from the Host Computer, the DSP must command the PCI Bus with the address and quantity of data to be received.

[0088] The PCI Data FIFO is commanded to PCI Bus Data Read Mode by writing to a desired location within the Xilinx (CE3) PCI Control Register Space. Upon PCI Bus Reset the default state for the PCI Data FIFO is Write Mode and the PCI Data FIFO Full Interrupt is cleared. The PCI Data FIFO Full Interrupt should also be cleared via software by writing to such location. The PCI Bus Reset also initializes the PCI Data FIFO Pointer

to the first data word of the available 64 data words within the FIFO. However this pointer should always be explicitly initialized by a memory write to prespecified location.

[0089] For data to be read from the PCI Bus by the data storage controller, the Xilinx PCI Bus Controller requires the address of the PCI Target along with the number of data words to be received. In the current data storage controller implementation, the PCI Bus Address is thirty-two bits wide, although future PCI bus implementations may utilize multiword addressing and/or significantly larger (64 bit & up) address widths. The single thirty-two bit address word is written by the DSP to prespecified memory location in the PCI Control Register Space.

[0090] Finally, the PCI Bus Data Read transaction is initiated by writing the PCI Data FIFO word count to prespecified memory address. The word count value is always decimal 64 or less (0x3F). When the count register is written the value is automatically transferred to the PCI Controller for executing the PCI Bus Master Read.

[0091] When the PCI Bus has received all the requested data words PCI Data FIFO Full Interrupt is set. The DSP PCI Data FIFO Full Interrupt handler will then check to see if additional data is waiting or expected to be read from the PCI Data Bus. If additional data is required the interrupt is cleared and the data receipt process repeats. If no additional data is required to be transferred, then the interrupt is cleared and the routine exits to a system state controller. For example, if the command is complete then master mode must be disabled and then slave mode (command mode) enabled — assuming a single command by command execution data storage controller.

[0092] It is clearly understood that there are other techniques for handling the PCI Data transfers. The current methodology has been selected to minimize the complexity and resource utilization of the Xilinx Gate Array. It should also be understood that the utilization of asynchronous memory reads and writes to initialize system states and synchronize events at a software level aids in both hardware and system level debug at the expense of increase software overhead. Subsequent embodiments of the gate array may automate resource intensive tasks if system level performance mandates.

#### IV. Memory Bandwidth Allocation

[0093] The onboard cache of the data storage controller is shared by the DSP, Disk Interface, and PCI Bus. The best case, maximum bandwidth for the SDRAM memory is 70 megawords per second, or equivalently, 280 megabytes per second. The 32 bit PCI

Bus interface has a best case bandwidth of 132 megabytes per second, or equivalently 33 megawords per second. In current practice, this bandwidth is only achieved in short bursts. The granularity of PCI data bursts to/from the data storage controller is governed by the PCI Bus interface data buffer depth of sixteen words (64 bytes). The time division multiplexing nature of the current PCI Data Transfer Buffering methodology cuts the sustained PCI bandwidth down to 66 megabytes/second.

[0094] Data is transferred across the ultraDMA disk interface at a maximum burst rate of 66 megabytes/second. It should be noted that the burst rate is only achieved with disks that contain onboard cache memory. Currently this is becoming more and more popular within the industry. However assuming a disk cache miss, the maximum transfer rates from current disk drives is approximately six megabytes per second. Allotting for technology improvements over time, the data storage controller has been designed for a maximum sustained disk data rate of 20 megabytes second (5 megawords/second). A design challenge is created by the need for continuous access to the SDRAM memory. Disks are physical devices and it is necessary to continuously read data from disk and place it into memory, otherwise the disk will incur a full rotational latency prior to continuing the read transaction. The maximum SDRAM access latency that can be incurred is the depth of the each of the two disk FIFO s or sixteen data. Assuming the FIFO is sixteen words deep the maximum latency time for emptying the other disk FIFO and restoring it to the disk interface is sixteen words at 5 megawords per second or  $(16 \times 3.2\text{usec}) = 1\text{usec}$ . Each EMIF clock cycle is 14.2857nsec, thus the maximum latency translates to 224 clock cycles. It should be noted that transfers across the disk interface are 16 bits wide, thus the FPGA is required to translate 32 bit memory transfers to 16 bit disk transfers, and vice-versa.

[0095] The DSP services request for its external bus from two requestors, the Enhanced Direct Memory Access (EDMA) Controller and an external shared memory device controller. The DSP can typically utilize the full 280 megabytes of bus bandwidth on an 8k through 64K byte (2k word through 16k word) burst basis. It should be noted that the DSRA does not utilize the SDRAM memory for interim processing storage, and as such only utilizes bandwidth in direct proportion to disk read and write commands.

[0096] For a single read from disk transaction data is transferred from and DMA transfer into SDRAM memory. This data is then DMA transferred by the DSP into onboard DSP

memory, processed, and re transferred back to SDRAM in decompressed format (3 words for every one word in). Finally the data is read from SDRAM by the PCI Bus Controller and placed into host computer memory. This equates to eight SDRAM accesses, one write from disk, one read by the DSP, three writes by the DSP and three by the PCI Bus. Disk write transactions similarly require eight SDRAM accesses, three from the PCI, three DSP reads, one DSP write, and one to the disk.

[0097] Neglecting overhead for setting up DMA transfers, arbitration latencies, and memory wait states for setting up SDRAM transactions, the maximum DSRA theoretical SDRAM bandwidth limit for disk reads or writes is 280/8 megabytes second or 35 megabytes second. It should be noted that the best case allocation of SDRAM bandwidth would be dynamic dependent upon the data compression and decompression ratios. Future enhancements to the data storage controller will utilize a programmable timeslice system to allocate SDRAM bandwidth, however this first embodiment will utilize a fixed allocation ratio as follows:

If all three requestors require SDRAM simultaneously:

PCI Bus Interface	3/8
DSP Accesses	4/8
UltraDMA Disk Interface	1/8

If only the PCI Bus and DSP require SDRAM:

PCI Bus Interface	4/8
DSP Accesses	4/8

If only the DSP and Disk require SDRAM:

DSP Accesses	6/8
UltraDMA Disk Interface	2/8

If only the PCI Bus and Disk require SDRAM:

PCI Bus Interface	6/8
UltraDMA Disk Interface	2/8

[0098] If only one device requires SDRAM it receives the full SDRAM bandwidth. It should be noted that different ratios may be applied based upon the anticipated or actual compression and/or decompression ratios. For example in the case of all three requestors

active the following equation applies. Assume that data storage accelerator achieves a compression ratio A:B for example 3:1. The Numerator and denominators of the various allocations are defined as follows:

PCI Bus Interface	A/K
DSP Accesses	(A+B)/K
UltraDMA Disk Interface	B/K

[0099] Where Further define a sum K equal to the sum of the numerators of the PCI Bus interface fraction, the DSP Access fraction, and the UltraDMA Disk Interfaces, i.e.  $K = 2(A+B)$ . Similarly:

If only the PCI Bus and DSP require SDRAM:

PCI Bus Interface	(A+B)/K
DSP Accesses	(A+B)/K

If only the DSP and Disk require SDRAM:

DSP Accesses	2A/K
UltraDMA Disk Interface	2B/K

If only the PCI Bus and Disk require SDRAM:

PCI Bus Interface	2A/K
UltraDMA Disk Interface	2B/K

[0100] It should be noted that the resultant ratios may all be scaled by a constant in order to most effectively utilize the bandwidths of the internal busses and external interfaces. In addition each ratio can be scale by an adjustment factor based upon the time required to complete individual cycles. For example if PCI Bus interface takes 20% longer than all other cycles, the PCI time slice should be adjusted longer accordingly.

#### V. Instant Boot Device For Operating System, Application Program and Loading

[0101] Typically, with conventional boot device controllers, after reset, the boot device controller will wait for a command over the computer bus (such as PCI). Since the boot device controller will typically be reset prior to bus reset and before the computer bus starts sending commands, this wait period is unproductive time. The initial bus commands inevitably instruct the boot device controller to retrieve data from the boot device (such as a disk) for the operating system. Since most boot devices are relatively

Atty. Dkt. No. 2855.004000B

slow compared to the speed of most computer busses, a long delay is seen by the computer user. This is evident in the time it takes for a typical computer to boot.

[0102] It is to be appreciated that a data storage controller (having an architecture as described herein) may employ a technique of data preloading to decrease the computer system boot time. Upon host system power-up or reset, the data storage controller will perform a self-diagnostic and program the programmable logic device (as discussed above) prior to completion of the host system reset (e.g., PCI bus reset) so that the logic device can accept PCI Bus commands after system reset. Further, prior to host system reset, the data storage controller can proceed to pre-load the portions of the computer operating system from the boot device (e.g., hard disk) into the on-board cache memory. The data storage controller preloads the needed sectors of data in the order in which they will be needed. Since the same portions of the operating system must be loaded upon each boot process, it is advantageous for the boot device controller to preload such portions and not wait until it is commanded to load the operating system. Preferably, the data storage controller employs a dedicated JO channel of the DSP (with or without data compression) to pre-load computer operating systems and applications.

[0103] Once the data is preloaded, when the computer system bus issues its first read commands to the data storage controller seeking operating system data, the data will already be available in the cache memory of the data storage controller. The data storage controller will then be able to instantly start transmitting the data to the system bus. Before transmission to the bus, if the was stored in compressed format on the boot device, the data will be decompressed. The process of preloading required (compressed) portions of the operating system significantly reduces the computer boot process time.

[0104] In addition to preloading operating system data, the data storage controller could also preload other data that the user would likely want to use at startup. An example of this would be a frequently used application such as a word processor and any number of document files.

[0105] There are several techniques that may be employed in accordance with the present invention that would allow the data storage controller to know what data to preload from the boot device. One technique utilizes a custom utility program that would allow the user to specify what applications/data should be preloaded.

**[0106]** Another technique (illustrated by the flow diagram of Figs. 7a and 7b) that may be employed comprises an automatic process that requires no input from the user. With this technique, the data storage controller maintain a list comprising the data associated with the first series of data requests received by the data storage controller by the host system after a power-on / reset. In particular, referring to Fig. 7a, during the computer boot process, the data storage controller will receive requests for the boot data (step 70). In response, the data storage controller will retrieve the requested boot data from the boot device (e.g., hard disk) in the local cache memory (step 71). For each requested data block, the data storage controller will record the requested data block number in a list (step 72). The data storage controller will record the data block number of each data block requested by the host computer during the boot process (repeat steps 70-72). When the boot process is complete (affirmative determination in step 73), the data storage controller will store the data list on the boot device (or other storage device) (step 74).

**[0107]** Then, upon each subsequent power-on / reset (affirmative result in step 75), the data storage controller would retrieve and read the stored list (step 76) and proceed to preload the boot data specified on the list (i.e., the data associated with the expected data requests) into the onboard cache memory (step 77). It is to be understood that the depending on the resources of the given system (e.g., memory, etc.), the preloading process may be completed prior to commencement of the boot process, or continued after the boot process begins (in which case booting and preloading are performed simultaneously).

**[0108]** When the boot process begins (step 78) (i.e., the storage controller is initialized and the system bus reset is deasserted), the data storage controller will receive requests for boot data (step 79). If the host computer issues a request for boot data that is preloaded in the local memory of the data storage controller (affirmative result in step 80), the request is immediately serviced using the preloaded boot data (step 81). If the host computer issues a request for boot data that is not preloaded in the local memory of the data storage controller (negative determination in step 80), the controller will retrieve the requested data from the boot device, store the data in the local memory, and then deliver the requested boot data to the computer bus (step 82). In addition, the data storage controller would update the boot data list by recording any changes in the actual data requests as compared to the expected data requests already stored in the list (step 83).

Then, upon the next boot sequence, the boot device controller would pre-load that data into the local cache memory along with the other boot data previously on the list.

[0109] Further, during the boot process, if no request is made by the host computer for a data block that was pre-loaded into the local memory of the data storage controller (affirmative result in step 84), then the boot data list will be updated by removing the non-requested data block from the list (step 85). Thereafter, upon the next boot sequence, the data storage controller will not pre-load that data into local memory.

#### VI. Quick Launch for Operating System, Application Program, and Loading

[0110] It is to be appreciated that the data storage controller (having an architecture as described herein) may employ a technique of data preloading to decrease the time to load application programs (referred to as “quick launch”). Conventionally, when a user launches an application, the file system reads the first few blocks of the file off the disk, and then the portion of the loaded software will request via the file system what additional data it needs from the disk. For example, a user may open a spreadsheet program, and the program may be configured to always load a company spreadsheet each time the program is started. In addition, the company spreadsheet may require data from other spreadsheet files.

[0111] In accordance with the present invention, the data storage controller may be configured to “remember” what data is typically loaded following the launch of the spreadsheet program, for example. The data storage controller may then proceed to preload the company spreadsheet and all the necessary data in the order in which such data is needed. Once this is accomplished, the data storage controller can service read commands using the preloaded data. Before transmission to the bus, if the preloaded data was stored in compressed format, the data will be decompressed. The process of preloading (compressed) program data significantly reduces the time for launching an application.

[0112] Preferably, a custom utility program is employed that would allow the user to specify what applications should be made ready for quick launch.

[0113] Figs. 8a and 8b comprise a flow diagram of a quick launch method according to one aspect of the present invention. With this technique, the data storage controller maintains a list comprising the data associated with launching an application. In particular, when an application is first launched, the data storage controller will receive

requests for the application data (step 90). In response, the data storage controller will retrieve the requested application data from memory (e.g., hard disk) and store it in the local cache memory (step 91). The data storage controller will record the data block number of each data block requested by the host computer during the launch process (step 92). When the launch process is complete (affirmative determination in step 93), the data storage controller will store the data list in a designated memory location (step 94).

[0114] Then, referring to Fig. 8b, upon each subsequent launch of the application (affirmative result in step 95), the data storage controller would retrieve and read the stored list (step 96) and then proceed to preload the application data specified on the list (i.e., the data associated with the expected data requests) into the onboard cache memory (step 97). During the application launch process, the data storage controller will receive requests for application data (step 98). If the host computer issues a request for application data that is pre-loaded in the local memory of the data storage controller (affirmative result in step 99), the request is immediately serviced using the preloaded data (step 100). If the host computer issues a request for application data that is not preloaded in the local memory of the data storage controller (negative result in step 99), the controller will retrieve the requested data from the hard disk memory, store the data in the local memory, and then deliver the requested application data to the computer bus (step 101). In addition, the data storage controller would update the application data list by recording any changes in the actual data requests as compared to the expected data requests already stored in the list (step 102).

[0115] Further, during the launch process, if no request is made by the host computer for a data block that was pre-loaded into the local memory of the data storage controller (affirmative result in step 103), then the application data list will be updated by removing the non-requested data block from the list (step 104). Thereafter, upon the next launch sequence for the given application, the data storage controller will not pre-load that data into local memory.

[0116] It is to be understood that the quick boot and quick launch methods described above are preferably implemented by a storage controller according to the present invention and may or may not utilize data compression/decompression by the DSP. However, it is to be understood that the quick boot and quick launch methods may be implemented by a separate device, processor, or system, or implemented in software.

## VII. Content Independent Data Compression

- [0117] It is to be understood that any conventional compression/decompression system and method (which comply with the above mentioned constraints) may be employed in the data storage controller for providing accelerated data storage and retrieval in accordance with the present invention. Preferably, the present invention employs the data compression/decompression techniques disclosed in the above-incorporated U.S. Serial No. 09/210,491.
- [0118] Referring to FIG. 9, a detailed block diagram illustrates an exemplary data compression system 110 that may be employed herein. Details of this data compression system are provided in U.S. Serial No. 09/210,491. In this embodiment, the data compression system 110 accepts data blocks from an input data stream and stores the input data block in an input buffer or cache 115. It is to be understood that the system processes the input data stream in data blocks that may range in size from individual bits through complete files or collections of multiple files. Additionally, the input data block size may be fixed or variable. A counter 120 counts or otherwise enumerates the size of input data block in any convenient units including bits, bytes, words, and double words. It should be noted that the input buffer 115 and counter 120 are not required elements of the present invention. The input data buffer 115 may be provided for buffering the input data stream in order to output an uncompressed data stream in the event that, as discussed in further detail below, every encoder fails to achieve a level of compression that exceeds an *a priori* specified minimum compression ratio threshold.
- [0119] Data compression is performed by an encoder module 125 which may comprise a set of encoders E1, E2, E3 ... En. The encoder set E1, E2, E3 ... En may include any number "n" (where n may =1) of those lossless encoding techniques currently well known within the art such as run length, Huffman, Lempel-Ziv Dictionary Compression, arithmetic coding, data compaction, and data null suppression. It is to be understood that the encoding techniques are selected based upon their ability to effectively encode different types of input data. It is to be appreciated that a full complement of encoders are preferably selected to provide a broad coverage of existing and future data types.
- [0120] The encoder module 125 successively receives as input each of the buffered input data blocks (or unbuffered input data blocks from the counter module 120). Data compression is performed by the encoder module 125 wherein each of the encoders E1 ....

En processes a given input data block and outputs a corresponding set of encoded data blocks. It is to be appreciated that the system affords a user the option to enable/disable any one or more of the encoders E1... En prior to operation. As is understood by those skilled in the art, such feature allows the user to tailor the operation of the data compression system for specific applications. It is to be further appreciated that the encoding process may be performed either in parallel or sequentially. In particular, the encoders E1 through En of encoder module 125 may operate in parallel (i.e., simultaneously processing a given input data block by utilizing task multiplexing on a single central processor, via dedicated hardware, by executing on a plurality of processor or dedicated hardware systems, or any combination thereof). In addition, encoders E1 through En may operate sequentially on a given unbuffered or buffered input data block. This process is intended to eliminate the complexity and additional processing overhead associated with multiplexing concurrent encoding techniques on a single central processor and/or dedicated hardware, set of central processors and/or dedicated hardware, or any achievable combination. It is to be further appreciated that encoders of the identical type may be applied in parallel to enhance encoding speed. For instance, encoder E1 may comprise two parallel Huffman encoders for parallel processing of an input data block.

[0121] A buffer/counter module 130 is operatively connected to the encoder module 125 for buffering and counting the size of each of the encoded data blocks output from encoder module 125. Specifically, the buffer/counter 130 comprises a plurality of buffer/counters BC1, BC2, BC3 .... BCn, each operatively associated with a corresponding one of the encoders E1...En. A compression ratio module 135, operatively connected to the output buffer/counter 130, determines the compression ratio obtained for each of the enabled encoders E1...En by taking the ratio of the size of the input data block to the size of the output data block stored in the corresponding buffer/counters BC1 BCn. In addition, the compression ratio module 135 compares each compression ratio with an *a priori*-specified compression ratio threshold limit to determine if at least one of the encoded data blocks output from the enabled encoders E1...En achieves a compression that exceeds an *a priori*-specified threshold. As is understood by those skilled in the art, the threshold limit may be specified as any value inclusive of data expansion, no data compression or expansion, or any arbitrarily desired compression limit. A description module 138, operatively coupled to the compression ratio module 135, appends a

corresponding compression type descriptor to each encoded data block which is selected for output so as to indicate the type of compression format of the encoded data block. A data compression type descriptor is defined as any recognizable data token or descriptor that indicates which data encoding technique has been applied to the data. It is to be understood that, since encoders of the identical type may be applied in parallel to enhance encoding speed (as discussed above), the data compression type descriptor identifies the corresponding encoding technique applied to the encoded data block, not necessarily the specific encoder. The encoded data block having the greatest compression ratio along with its corresponding data compression type descriptor is then output for subsequent data processing, storage, or transmittal. If there are no encoded data blocks having a compression ratio that exceeds the compression ratio threshold limit, then the original unencoded input data block is selected for output and a null data compression type descriptor is appended thereto. A null data compression type descriptor is defined as any recognizable data token or descriptor that indicates no data encoding has been applied to the input data block. Accordingly, the unencoded input data block with its corresponding null data compression type descriptor is then output for subsequent data processing, storage, or transmittal.

[0122] Again, it is to be understood that the embodiment of the data compression engine of Fig. 9 is exemplary of a preferred compression system which may be implemented in the present invention, and that other compression systems and methods known to those skilled in the art may be employed for providing accelerated data storage in accordance with the teachings herein. Indeed, in another embodiment of the compression system disclosed in the above-incorporated U.S. Serial No. 09/210,491, a timer is included to measure the time elapsed during the encoding process against an *a priori*-specified time limit. When the time limit expires, only the data output from those encoders (in the encoder module 125) that have completed the present encoding cycle are compared to determine the encoded data with the highest compression ratio. The time limit ensures that the real-time or pseudo real-time nature of the data encoding is preserved. In addition, the results from each encoder in the encoder module 125 may be buffered to allow additional encoders to be sequentially applied to the output of the previous encoder, yielding a more optimal lossless data compression ratio. Such techniques are discussed in greater detail in the above-incorporated U.S. Serial No. 09/210,491.

Atty. Dkt. No. 2855.004000B

- [0123] Referring now to FIG. 10, a detailed block diagram illustrates an exemplary decompression system that may be employed herein or accelerated data retrieval as disclosed in the above-incorporated U.S. Serial No. 09/210,491. In this embodiment, the data compression engine 180 retrieves or otherwise accepts compressed data blocks from one or more data storage devices and inputs the data via a data storage interface. It is to be understood that the system processes the input data stream in data blocks that may range in size from individual bits through complete files or collections of multiple files. Additionally, the input data block size may be fixed or variable.
- [0124] The data decompression engine 180 comprises an input buffer 155 that receives as input an uncompressed or compressed data stream comprising one or more data blocks. The data blocks may range in size from individual bits through complete files or collections of multiple files. Additionally, the data block size may be fixed or variable. The input data buffer 55 is preferably included (not required) to provide storage of input data for various hardware implementations. A descriptor extraction module 160 receives the buffered (or unbuffered) input data block and then parses, lexically, syntactically, or otherwise analyzes the input data block using methods known by those skilled in the art to extract the data compression type descriptor associated with the data block. The data compression type descriptor may possess values corresponding to null (no encoding applied), a single applied encoding technique, or multiple encoding techniques applied in a specific or random order (in accordance with the data compression system embodiments and methods discussed above).
- [0125] A decoder module 165 includes one or more decoders D 1 ... Dn for decoding the input data block using a decoder, set of decoders, or a sequential set of decoders corresponding to the extracted compression type descriptor. The decoders D1 ... Dn may include those lossless encoding techniques currently well known within the art, including: run length, Huffman, Lempel-Ziv Dictionary Compression, arithmetic coding, data compaction, and data null suppression. Decoding techniques are selected based upon their ability to effectively decode the various different types of encoded input data generated by the data compression systems described above or originating from any other desired source.
- [0126] As with the data compression systems discussed in U.S. Application Serial No. 09/210,491, the decoder module 165 may include multiple decoders of the same type

applied in parallel so as to reduce the data decoding time. An output data buffer or cache 170 may be included for buffering the decoded data block output from the decoder module 165. The output buffer 70 then provides data to the output data stream. It is to be appreciated by those skilled in the art that the data compression system 180 may also include an input data counter and output data counter operatively coupled to the input and output, respectively, of the decoder module 165. In this manner, the compressed and corresponding decompressed data block may be counted to ensure that sufficient decompression is obtained for the input data block.

[0127] Again, it is to be understood that the embodiment of the data decompression system 180 of FIG. 10 is exemplary of a preferred decompression system and method which may be implemented in the present invention, and that other data decompression systems and methods known to those skilled in the art may be employed for providing accelerated data retrieval in accordance with the teachings herein.

[0128] Although illustrative embodiments have been described herein with reference to the accompanying drawings, it is to be understood that the present invention is not limited to those precise embodiments, and that various other changes and modifications may be affected therein by one skilled in the art without departing from the scope or spirit of the invention. All such changes and modifications are intended to be included within the scope of the invention as defined by the appended claims.
