INSTRUCTOR SUPPORT: For information on classroom software and other instructor materials available to adopters, please contact the editorial offices of Morgan Kaufmann Publishers, Inc.

Contents

	Foreword	ix
	by C. GORDON BELL	
	Preface	xvii
	Acknowledgements	xxiii
1	Fundamentals of Computer Design	2
	1.1 Introduction	3
	1.2 Definitions of Performance	5
	1.3 Quantitative Principles of Computer Design	8
	1.4 The Job of a Computer Designer	13
	1.5 Putting It All Together: The Concept of Memory Hierarchy	18
	1.6 Fallacies and Pitfalls	21
	1.7 Concluding Remarks	22
	1.8 Historical Perspective and References	23
	Exercises	28
2	Performance and Cost	32
	2.1 Introduction	33
	2.2 Performance	35
	2.3 Cost	53
	2.4 Putting It All Together: Price/Performance of Three Machines	66
	2.5 Fallacies and Pitfalls	70
	2.6 Concluding Remarks	76
	2.7 Historical Perspective and References	77
	Exercises	81
3	Instruction Set Design: Alternatives and Principles	88
	3.1 Introduction	89
	3.2 Classifying Instruction Set Architectures	90
	3.3 Operand Storage in Memory: Classifying General-Purpose Register Machines	92
	3.4 Memory Addressing	94
	3.5 Operations in the Instruction Set	103
	3.6 Type and Size of Operands	109
	3.7 The Role of High-Level Languages and Compilers	111
	3.8 Putting It All Together: How Programs Use Instruction Sets	122
	3.9 Fallacies and Pitfalls	124
	3.10 Concluding Remarks	126
	3.11 Historical Perspective and References	127
	Exercises	132

4	Instruction Set Examples and Measurements of Use	138
	4.1 Instruction Set Measurements: What and Why	139
	4.2 The VAX Architecture	142
	4.3 The 360/370 Architecture	148
	4.4 The 8086 Architecture	153
	4.5 The DLX Architecture	160
	4.6 Putting It All Together: Measurements of Instruction Set Usage	167
	4.7 Fallacies and Pitfalls	183
	4.8 Concluding Remarks	185
	4.9 Historical Perspective and References	186
	Exercises	191
5	Basic Processor Implementation Techniques	198
	5.1 Introduction	199
	5.2 Processor Datapath	201
	5.3 Basic Steps of Execution	202
	5.4 Basic Steps of Execution	204
	5.4 Hardwired Control	208
	5.5 Microprogrammed Control	214
	5.6 Interrupts and Other Entanglements	220
	5.7 Putting It All Together: Control for DLX	220
	5.8 Fallacies and Pitfalls	238
	5.9 Concluding Remarks	240
	5.9 Concluding Remarks	241
	5.10 Historical Perspective and References	244
	Exercises	244
6	Pipelining	250
	6.1 What Is Pipelining?	251
	6.2 The Basic Pipeline for DLX	252
	6.3 Making the Pipeline Work	255
	6.3 Making the Pipeline Work	257
	6.4 The Major Hurdle of Pipelining—Pipeline Hazards	278
	6.5 What Makes Pipelining Hard to Implement	284
	6.6 Extending the DLX Pipeline to Handle Multicycle Operations	284
	6.7 Advanced Pipelining—Dynamic Scheduling in Pipelines	290
	6.8 Advanced Pipelining—Taking Advantage of More Instruction-Level Parallelism	314
	6.9 Putting It All Together: A Pipelined VAX	328
	6.9 Putting It All Together: A Pipelined VAX	334
	6.10 Fallacies and Pitfalls	337
	6.11 Concluding Remarks	337
	6.11 Concluding Remarks	338
	6.12 Historical Perspective and References	338
	6.12 Historical Perspective and References	343
	Exercises	343

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
