OPERATING SYSTEMS REVIEW is an informal publication of the ACM Special Interest Group on Operating Systems (SIGOPS), whose scope of interest includes: Computer operating systems and architecture for multiprogramming, multiprocessing, and time sharing; resource management; evaluation and simulation; reliability, integrity, and security of data; communications among computing processors; and computer system modeling analysis.

Membership in SIGOPS (at \$15 per annum) is open to ACM members and associate members, and student members (at \$8 per annum); non-ACM members may join also (at \$42 per annum). Non-members of SIGOPS may subscribe to OPERATING SYSTEMS REVIEW at \$30 per year. All SIGOPS members receive OPERATING SYSTEMS REVIEW.

SIGOPS membership application forms are available from ACM Headquarters (or see back cover of this issue), 1515 Broadway, 17th Floor, New York, New York 10036, telephone (212) 869-7440. Changes of address and other matters pertaining to the SIGOPS mailing list should be directed to ACM Headquarters, not to any of the SIGOPS officers.

Contributions to OSR are sent to the editor and should be single spaced and printed on one side of the paper only. Text and diagrams must be contained within a 6½ inch wide by 8½ inch high (165mm by 216mm) area with at least one inch (25mm) top and side margins, 1½ inch (38mm) bottom margin, and be camera-ready (i.e., be an original having sufficient contrast and density for reproduction). All letters to the editor will be considered for publication unless accompanied by a request to the contrary. Except for editorial items, all sources of material appearing in OPERATING SYSTEMS REVIEW will be clearly identified. Items attributed to individuals will ordinarily be interpreted as personal rather than organizational opinions. The technical material in this newsletter is not refereed. **Deadlines for submitting material are the 15th of February, May, August, and November. The SIGOPS conference proceedings will be mailed as the December issue in odd numbered calendar years, and the ASPLOS conference proceedings will be mailed in even numbered calendar years.**

OPERATING SYSTEMS REVIEW (ISSN 0163-5980) is published five times a year (January, April, July, October and December) by the Association for Computing Machinery Inc., 1515 Broadway, New York, NY 10036. Periodicals postage paid at New York, NY 10001, and at additional mailing offices. **POSTMASTER:** Send address changes to OPERATING SYSTEMS REVIEW, ACM, 1515 Broadway, New York, NY 10036.

Subscriptions: Annual subscription cost of \$12.53 is included in the member dues of \$15.00 (for students

The USENIX Association

**Proceedings of the
Second Symposium on Operating Systems
Design and Implementation
(OSDI '96)**

Co-sponsored by ACM SIGOPS and IEEE TCOS

October 28-31, 1996

For additional copies of these proceedings contact:

USENIX Association
2560 Ninth Street, Suite 215
Berkeley, CA 94710 USA
Phone: 510 528 8649
FAX: 510 548 5738
Email: office@usenix.org
URL: <http://www.usenix.org>

The price is \$20 for members and \$27 for nonmembers.
Outside the U.S.A. and Canada, please add
\$11 per copy for postage (via air printed matter).

Opening Remarks and Awards Presentation

Karin Petersen, Xerox PARC; Willy Zwaenepoel, Rice University

Invited Talk: Java OS: Back to the Future	1
<i>Jim Mitchell, Sun Fellow, Vice President of Technology and Architectures, JavaSoft</i>	

Caching And Prefetching in I/O Systems

Automatic Compiler-Inserted I/O Prefetching for Out-Of-Core Applications	3
<i>Todd C. Mowry, Angela K. Demke and Orran Krieger, University of Toronto</i>	

A Trace-Driven Comparison of Algorithms for Parallel Prefetching and Caching	19
<i>Tracy Kimbrel, University of Washington; Andrew Tomkins and R. Hugo Patterson, Carnegie Mellon University; Brian Bershad, University of Washington; Pei Cao, University of Wisconsin; Edward W. Felten, Princeton University; Garth Gibson, Carnegie Mellon University; Anna R. Karlin, University of Washington; and Kai Li, Princeton University</i>	

Efficient Cooperative Caching Using Hints	35
<i>Prasenjit Sarkar and John Hartman, University of Arizona</i>	

Distributed Shared Memory

Online Data-Race Detection via Coherency Guarantees	47
<i>Dejan Perkovic and Pete Keleher, University of Maryland</i>	

Lightweight Logging for Lazy Release Consistent Distributed Shared Memory	59
<i>Manuel Costa, Paulo Guedes, Manuel Sequeira, Nuno Neves and Miguel Castro, IST -NESC</i>	

Performance Evaluation of Two Home-Based Lazy Release Consistency Protocols for Shared Virtual Memory Systems	75
<i>Yuanyuan Zhou, Liviu Iftode and Kai Li, Princeton University</i>	

Wednesday, October 30

Invited Talk: Active Networks	89
<i>David Tennenhouse, Telemedia, Networks and Systems Group, Laboratory for Computer Science, MIT</i>	

Scheduling and Synchronization

CPU Inheritance Scheduling	91
<i>Bryan Ford and Sai R. Susarla, University of Utah</i>	

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
