How to Use This Book

The best way to learn MacPaint is to explore the drawing tools and patterns on your own. This is a book of hints to guide you in your exploration.

- If you want a brief lesson on getting started with MacPaint, see "Learning MacPaint."
- When you want to find out more about using the tools and the commands in the menus, flip through "Using MacPaint." (You don't have to read these pages in any particular order.)
- For a brief description of each of the tools, see "Tools Summary."

If the Apple Macintosh™ computer is totally new to you, you might want to look first at *Macintosh*, the owner's guide. It teaches the basic techniques you'll use to create pictures with MacPaint—clicking, dragging, selecting information, and choosing commands from menus.
