[57] ABSTRACT

A loan origination system including an apparatus and method for automatically matching a best available loan to a potential borrower, via a global telecommunications network. The loan origination system of the present invention brings together via the global telecommunications network potential borrowers and lenders. The loan origination system accepts and stores into a database borrower attributes entered by a potential borrower requesting a loan, via the global telecommunications network. The loan origination system also accepts and stores into the database credit related information regarding the potential borrower sent from at least one credit bureau. The loan origination system stores into the database respective loan acceptance criteria and respective loan attributes for an offered loan. The loan origination system compares the borrower attributes of the potential borrower with all of the loan acceptance criteria stored in the database to determine any available loans for the potential borrower. The loan attributes of the available loans are analyzed to determine rankings of best loans. From the rankings of best loans, the borrower chooses a selected loan provided by a selected lender. A loan application is automatically generated from the borrower attributes and is automatically sent to the selected lender for loan approval. In addition, the loan origination system of the present invention provides to a lender information regarding borrowers and/or other competitive lenders in the loan market.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
