

- (ii) Is in a repair shop or on a repair track;
- (iii) Is on a storage track and is not carrying passengers; or
- (iv) Has been delivered in interchange but has not been accepted by the receiving railroad.

Interior fitting means any auxiliary component in the passenger compartment which is mounted to the floor, ceiling, sidewalls, or end walls and projects into the passenger compartment from the surface or surfaces to which it is mounted. Interior *49794 fittings do not include side and end walls, floors, door pockets, or ceiling lining materials, for example.

Lateral means the horizontal direction perpendicular to the direction of travel of a rail vehicle.

Locomotive means a piece of on-track equipment, other than hi-rail, specialized maintenance, or other similar equipment, which may consist of one or more units operated from a single control stand with one or more propelling motors designed for moving other equipment; with one or more propelling motors designed to transport freight or passenger traffic or both; or without propelling motors but with one or more control stands. This term does not include a locomotive propelled by steam power unless it is used to haul an intercity or commuter passenger train.

Locomotive cab means a compartment or space on board a locomotive where the control stand is located and which is normally occupied by the engineer when the locomotive is being operated.

Locomotive, cab car means a unit of rolling equipment intended to provide transportation for members of the general public that is without propelling motors but with one or more control stands.

Locomotive, controlling means the locomotive from which the engineer exercises control over the train.

Locomotive, MU means a unit of rolling equipment self-propelled by any power source, other than steam, and intended to provide transportation for members of the general public.

Longitudinal means in a direction parallel to the normal direction of travel of a rail vehicle.

Luminescent material means a material that absorbs light energy when ambient levels of light are high and emits this stored energy when ambient levels of light are low, making the material appear to glow in the dark.

L/V ratio means the lateral force that the flange of a vehicle's wheel exerts on the rail, divided by the vertical force that the tread of the same wheel exerts on the rail.

MIL-STD-882C means a military standard issued by the United States Department of Defense to provide uniform requirements for developing and implementing a system safety program to identify and then eliminate the hazards of a system or reduce the associated risk to an acceptable level.

Occupied volume means the spaces of a rail vehicle or passenger train where passengers or crewmembers are normally located during service operation, such as the operating cab and passenger seating and sleeping areas. Vestibules are typically not considered occupied, except when in use as a control cab.

Ordered or date ordered means the date on which notice to proceed is given by a procuring railroad to a contractor or supplier for new equipment.
