CLAIMS

What is claimed is:

1. A message broadcasting system providing a broadcast message to a broadcast target area, the system comprising:

a broadcast request interface configured for receiving a broadcast message record having a broadcast message, a defined broadcast target area, and a broadcast message originator identifier;

a broadcast admission control module configured for receiving the broadcast message record, validating the broadcast message record as a function one or more of the broadcast message originator identifier, the broadcast target area, and a broadcast message transmission network parameter associated with a broadcast transmission network adapted for broadcasting the message to at least a portion of the broadcast target area, said broadcast admission control module configured for generating a validated broadcast message record as a function of the validating; and

a broadcast message distributor module configured for receiving the validated broadcast message record and transmitting the broadcast message and the broadcast target area, or a part thereof, to an output interface configured for distributing the broadcast message to at least a portion of the broadcast target area.

2. The system of claim 1, further comprising a broadcast network interface module coupled to the broadcast message distributor module for receiving the broadcast message record and forwarding the broadcast message record to a broadcast network transmission module associated with at least one of the broadcast message transmission networks.

3. The system of claim 2, further comprising the broadcast network transmission module associated with at least one of the broadcast message transmission networks and coupled to one or more network transmission components within the at least one broadcast message transmission network configured for transmitting the broadcast message to broadcast message receiving devices within the broadcast target area.

4. The system of claim 3 wherein the broadcast network transmission module is configured for receiving the validated broadcast message record and determining at least one network transmission component address as a function of the broadcast target area within the validated broadcast message record and transmitting the broadcast message to the network transmission component having the component address for transmission to the broadcast message receiving devices.

5. The system of claim 3 wherein the broadcast network transmission module is dedicated to one particular broadcast message transmission network.

6. The system of claim 3 wherein the broadcast network transmission module is configured as a service bureau and coupled to a plurality of broadcast message transmission networks.

7. The system of claim 1 wherein the output interface is configured for transmitting the validated broadcast message to a second broadcast request interface associated with a second broadcast admission control module associated with a second message broadcasting system.

8. The system of claim 1 wherein the broadcast message interface is configured for hosting a web page and generating the broadcast message record in response to data entered by a broadcast message originator accessing the hosted web page.

9. The system of claim 1 wherein the broadcast message interface is configured for presenting a broadcast message originator with a geographic area and enabling the broadcast message originator to define the broadcast target area as a subset of the presented geographic area.

10. The system of claim 9 wherein the geographic area is presented as a graphical map and wherein the broadcast message interface is configured for enabling the broadcast message originator to graphically define the broadcast target area on the presented graphical map.

11. The system of claim 1 wherein the broadcast admission control module verifies an authority of the broadcast message originator as a function of a broadcast message originator authorization parameter, said transmitting the broadcast message being responsive to the authority verification.

12. The system of claim 1 wherein the broadcast admission control module is configured for validating including validating the authority of a broadcast message originator as a function of a broadcast message originator parameter.

13. The system of claim 12 wherein the broadcast message originator parameter includes one or more of an authorized broadcast message originator identification code, a message priority, an authorized password, an authorized message target broadcast geographic area, a geographic broadcast area authorization flag or parameter, a reusable geographic broadcast target area template definition authorization parameter, an authorized broadcast network distribution parameter, a broadcast message profile parameter, a message language text parameter, and a geographic broadcast target area message language priority parameter.

14. The system of claim 1 wherein the broadcast admission control module is configured for validating includes identifying a broadcast transmission network providing broadcast message communications to broadcast message receiving devices within the broadcast target area and validating the broadcast transmission network against a broadcast network parameter.

15. The system of claim 14 wherein the broadcast network parameter includes one or more of a reusable geographic broadcast target area template definition parameter, a broadcast message target area parameter, a message priority, a message language text format parameter, a network authorization parameter, and a message language priority indicator.

16. The system of claim 1 wherein the broadcast admission control module is configured for identifying one or more broadcast transmission networks providing broadcast message communications to broadcast message receiving devices located within the broadcast target area and validating at least one of the identified broadcast transmission networks against a broadcast transmission network authority parameter.

17. The system of claim 16 wherein the broadcast admission control module is configured for identifying a first broadcast transmission network providing broadcast message communications to broadcast message receiving devices within the broadcast target area is repeated to identify a second broadcast network providing broadcast message communications to other broadcast message receiving devices within the broadcast target area in response to forwarding the broadcast message to a broadcast transmission network, wherein the broadcast admission control module validates the broadcast transmission network includes validating a first and a second broadcast transmission network against first and second broadcast transmission network parameters, respectively, and forwards the broadcast message to the first broadcast transmission network and the second broadcast transmission network for transmission to broadcast message receiving devices within the broadcast target area.

18. The system of claim 1 wherein the broadcast admission control module is configured for validating the broadcast message record against a plurality of broadcast transmission network parameters, wherein the broadcast transmission network parameters are associated with a particular broadcast transmission network.

19. The system of claim 1 wherein the broadcast admission control module is configured for receiving a plurality of broadcast message records from a plurality of broadcast request interfaces and the validated broadcast message record is a first broadcast message record having a first broadcast message and a first broadcast target area and the broadcast network is a first broadcast transmission network, and wherein the broadcast admission control module is further configured for validating a second broadcast message record in response to completing the forwarding of the first broadcast message to the first broadcast transmission network for transmission to the broadcast message receiving devices within the first broadcast target area.

20. The system of claim 19 wherein the broadcast admission control module is configured for selecting the second broadcast message record from among a plurality of broadcast message records as a function of a message priority parameter.

21. The system of claim 1 wherein the broadcast request interface is configured for receiving a broadcast message request indicating a broadcast originator suspension notification and the broadcast admission control module is configured for validating a subsequent broadcast message record indicating that all broadcast transmission networks decline the transmission of the subsequent broadcast message.

22. The system of claim 21 wherein the broadcast admission control module is configured for initiating the reporting and sending of the subsequent broadcast message record to a message broadcast system administrative account.

23. A method of broadcast messaging to a broadcast target area, the method comprising:
- hosting a broadcast message interface;
 - receiving a broadcast message record having a broadcast message, a defined broadcast target area, and a broadcast message originator identifier;
 - validating the broadcast message record as a function one or more of the broadcast message originator identifier, the broadcast target area, and a broadcast message transmission network parameter associated with a broadcast transmission network configured for broadcasting the message to at least a portion of the broadcast target area;
 - generating a validated broadcast message record as a function of the validating; and
 - transmitting the validated broadcast message record to an output interface configured for distributing the broadcast message to at least a portion of the broadcast target area.
24. The method of claim 23 wherein the broadcast message interface is configured for presenting a broadcast message originator with a geographic area and enabling the broadcast message originator to define the broadcast target area as a subset of the presented geographic area.
25. The method of claim 23 wherein hosting includes hosting a webpage and presenting a map of an area having a plurality of definable broadcast target areas and includes an interactive user interface for receiving broadcast message originator input to define the broadcast target area with reference to the presented map.
26. The method of claim 25 wherein hosting includes providing the interactive user interface with a graphical mapping capability for enabling the broadcast message originator to define the broadcast target area having a user definable shape.
27. The method of claim 23 wherein hosting includes hosting a data network interface configured for receiving the broadcast message record transmitted from a coupled second broadcast message system.

28. The method of claim 23 wherein validating includes verifying an authority of a broadcast message originator as a function of a broadcast message originator authorization parameter and the broadcast target area.

29. The method of claim 23 wherein the broadcast message originator authorization parameter includes a geographic parameter defining an area in which the broadcast message originator is authorized to originate a broadcast message contained within the broadcast message record.

30. The method of claim 23 wherein transmitting the broadcast message to the output interface is responsive to the authority verification.

31. The method of claim 23 wherein transmitting includes transmitting the broadcast message and broadcast target area to one of a plurality of broadcast transmission networks serving, at least in part, the broadcast target area as a function of a message admission control parameter associated with the one broadcast transmission network.

32. The method of claim 23, further comprising transmitting at least one area identification parameter within the message target broadcast area to at least one network broadcast center.

33. The method of claim 23, further comprising transmitting a report containing the broadcast message, the broadcast target area and the at least one area identification parameter within the message broadcast target area.

34. The method of claim 23, further comprising identifying one or more broadcast transmission networks providing broadcast message communications to broadcast message receiving devices located within the broadcast target area, wherein validating includes validating one of the identified broadcast transmission networks against a broadcast transmission network authority parameter.

35. The method of claim 23, further comprising identifying a first broadcast transmission network providing broadcast message transmission to first broadcast message

receiving devices served by the first broadcast transmission network and within the broadcast target area and identifying a second broadcast transmission network providing broadcast message transmission to second broadcast message receiving devices served by the second broadcast transmission network and within the broadcast target area, wherein validating includes validating the first and the second broadcast transmission networks against first and second broadcast transmission network parameters, respectively, and transmitting includes forwarding the broadcast message to the first broadcast transmission network and the second broadcast transmission network for transmission to the served broadcast message receiving devices located within the broadcast target area.

36. The method of claim 23 wherein validating includes comparing the broadcast message record against a plurality of broadcast transmission network parameters, wherein the broadcast transmission network parameters are associated with a particular broadcast transmission network.

37. The method of claim 23 wherein receiving includes a plurality of broadcast message records from a plurality of broadcast request interfaces and validating including validating a first broadcast message record having a first broadcast message and a first broadcast target area and a second broadcast message record having a second broadcast message and a second broadcast target area, and wherein transmitting includes transmitting the first validated broadcast message record to a first output interface associated with a first broadcast transmission network and transmitting the second validated broadcast message record to a second output interface associated with a second broadcast transmission network.

38. The method of claim 23, further comprising selecting the second broadcast message record from among the plurality of broadcast message records as a function of a message priority parameter.

39. The method of claim 23 wherein validating includes identifying a broadcast transmission network providing broadcast message communications to broadcast message receiving devices within the broadcast target area and validating the broadcast transmission network against a broadcast network parameter.

40. The method of claim 39 wherein the broadcast network parameter includes one or more of a reusable geographic broadcast target area template definition parameter, a broadcast message target area parameter, a message language text format parameter, a network authorization parameter, and a message language priority indicator.

41. The method of claim 23, further comprising receiving a broadcast message record indicating a broadcast originator suspension notification, validating a subsequent broadcast message record, declining the transmission of the validated broadcast message record, and initiating the reporting of the declined broadcast message record to a broadcast system administrative account.

42. A method of admission control for authorizing a submission of a broadcast message to a broadcast target area, comprising:

- receiving a broadcast message record including the broadcast message and the broadcast target area for the broadcast message;
- validating the authority of a broadcast message originator originating the broadcast message record as a function of a broadcast message originator parameter;
- identifying a broadcast transmission network providing broadcast message transmission to broadcast message receiving devices located within the broadcast target area;
- validating the broadcast transmission network against a broadcast transmission network parameter; and
- forwarding the broadcast message record to an output interface associated with the broadcast transmission network for transmission to the broadcast message receiving devices within the broadcast target area.

43. The method of claim 42, further comprising identifying one or more broadcast transmission networks providing broadcast message transmissions to broadcast message receiving devices located within the broadcast target area and validating at least one of the identified broadcast transmission networks against a broadcast transmission network authority parameter.

44. The method of claim 42 wherein identifying includes identifying a first broadcast transmission network providing broadcast message transmission to first broadcast message receiving devices served by the first broadcast transmission network and within the broadcast target area and identifying a second broadcast transmission network providing broadcast message transmission to second broadcast message receiving devices served by the second broadcast transmission network and within the broadcast target area, wherein validating includes validating the first and the second broadcast transmission networks against first and second broadcast transmission network parameters, respectively, and transmitting includes forwarding the broadcast message to the first broadcast transmission network and the second broadcast transmission network for transmission to the served broadcast message receiving devices located within the broadcast target area.

45. The method of claim 42 wherein validating the broadcast transmission network includes validating the broadcast message record and broadcast transmission network against a plurality of broadcast transmission network parameters.

46. The method of claim 45, further comprising comparing the broadcast message record to a broadcast transmission network decline parameter in response to a failure of validating against one of the plurality of broadcast transmission network parameters and at least one of generating a warning message in response to a failure in the comparing to the broadcast transmission network decline parameter and generating a decline report in response to a success in the comparing to the broadcast transmission network decline parameter.

47. The method of claim 42, further comprising storing the submitted broadcast message record to a broadcast message log file.

48. The method of claim 42, further comprising generating a security report in response to a failure of the validating of the broadcast message record.

49. The method of claim 42 wherein validating includes retrieving a broadcast message originator parameter from a data base and comparing the broadcast message originator parameter against an authorization parameter.

50. The method of claim 49 wherein the broadcast message originator parameter includes one or more of an authorized broadcast message originator identification code, an authorized password, an authorized message target broadcast geographic area, a message priority, a geographic broadcast area authorization flag or parameter, a reusable geographic broadcast target area template definition authorization parameter, an authorized broadcast network distribution network parameter, a broadcast message profile parameter, a message language text parameter, and a geographic broadcast target area message language priority parameter.

51. The method of claim 42 wherein the broadcast network parameter includes one or more of a reusable geographic broadcast target area template definition parameter, a

broadcast message target area parameter, a message priority, a message language text format parameter, and a message language priority indicator.

52. The method of claim 42, further comprising validating the broadcast message record against an authorized message parameter associated with the broadcast network, wherein forwarding the broadcast message record is in response to successfully validating the broadcast message for the broadcast network.

53. The method of claim 42, further comprising setting a message decline flag for the message transmission to the broadcast network in response to a failure of the validating the broadcast transmission network against a broadcast network parameter.

54. The method of claim 42, further comprising setting a message admission done flag and logging the completed message submission to the message log file in response to completion of the admission control procedure for all of a plurality of broadcast message transmission networks.

55. The method of claim 42, further comprising initiating the admission control method for a second broadcast message record in response to the successful forwarding of a first broadcast message record.

56. The method of claim 55, further comprising selecting the second broadcast message record from among a plurality of broadcast message records as a function of a message priority parameter.

57. The method of claim 42 wherein validating includes comparing a parameter associated with the broadcast message record to a stored authorization parameter.

58. The method of claim 42 wherein receiving includes receiving a plurality of broadcast message records from a plurality of broadcast request interfaces and wherein the validated message record is a first broadcast message record having a first broadcast message and a first broadcast target area and the broadcast network is a first broadcast transmission network, further comprising validating a second broadcast message record in response to

completing the forwarding of the first broadcast message to the first broadcast transmission network for transmission to the broadcast message receiving devices within the first broadcast target area.

59. The method of claim 42, further comprising generating a security report in response to a failure of validating the broadcast message record.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

FILING RECEIPT

Date Mailed: 12/12/2006

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER**Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under

37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

NOTICE TO FILE MISSING PARTS OF NONPROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(b)

Filing Date Granted

Items Required To Avoid Abandonment:

An application number and filing date have been accorded to this application. The item(s) indicated below, however, are missing. Applicant is given **TWO MONTHS** from the date of this Notice within which to file all required items and pay any fees required below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The statutory basic filing fee is missing.
Applicant must submit \$ 150 to complete the basic filing fee for a small entity.

The applicant needs to satisfy supplemental fees problems indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- Additional claim fees of **\$975** as a small entity, including any required multiple dependent claim fee, are required. Applicant must submit the additional claim fees or cancel the additional claims for which fees are due.
- To avoid abandonment, a surcharge (for late submission of filing fee, search fee, examination fee or oath or declaration) as set forth in 37 CFR 1.16(f) of **\$65** for a small entity in compliance with 37 CFR 1.27, must be submitted with the missing items identified in this letter.

SUMMARY OF FEES DUE:

Total additional fee(s) required for this application is **\$1540** for a small entity

- **\$150** Statutory basic filing fee.
- **\$65** Surcharge.
- The application search fee has not been paid. Applicant must submit **\$250** to complete the search fee.
- The application examination fee has not been paid. Applicant must submit **\$100** to complete the examination fee for a small entity in compliance with 37 CFR 1.27.

- Total additional claim fee(s) for this application is **\$975**
 - **\$975 for 39** total claims over 20.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER**Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under

37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(b)

Applicant/Patent Owner: EnvisionIT, LLC

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

4th SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§ 1.56, 1.97 and 1.98, Applicant hereby submits a Supplemental Information Disclosure Statement for consideration by the Examiner.

I. LIST OF PATENTS, PUBLICATIONS, AND OTHER INFORMATION

The patents, publications and other information requested to be considered by the Office (except unpublished U.S. patent applications) are listed on Form 1449 attached hereto.

II. COPIES

A. Submitted herewith is a legible copy of (i) each foreign patent; (ii) each publication or that portion which caused it to be listed, other than U.S. patents and U.S. patent application publications unless required by the Office; (iii) each unpublished U.S. application listed below in Section IV (i.e., including the specification, claims, and any drawing of the application, or that portion of the application which caused it to be listed, including any claims directed to that portion), except for such applications filed on or after June 30, 2003, pursuant to the Waiver of the Copy Requirement in 37 C.F.R. 1.98 (OG Notice dated October 19, 2004); and (iv) all other information or that portion which caused it to be listed.

Certificate of Transmission

I hereby certify that this correspondence is being electronically deposited via EFS-WEB with the United States Patent Office on November 16, 2009.

Dawn M. Carlton

B. Any patents, publications or other information which are listed on Form 1449 or on the copies of PTO-892, but which are not enclosed herewith, were previously cited by or submitted to the PTO in one of the following applications which has been relied upon for an earlier filing date under 35 U.S.C. § 120:

U.S. Serial Number

U.S. Filing Date

C. This is a PCT application in the entry of the National Phase in the United States. A copy of the International Search Report is attached for the Examiner's information. The documents listed on the International Search report are listed on the attached Form 1449 for consideration by the Examiner and for listing on any patent resulting from this application. If the International Search report was from the US, EPO, or JPO search authorities, copies of these references should have been supplied to the USPTO under the trilateral agreement and are believed to be in the file of the above-identified application. (MPEP 1893.03(g).)

III. CONCISE EXPLANATION OF THE RELEVANCE (check at least one box)

A. Except as may be indicated below in (B), all of the patents, publications or other information are in the English language (concise explanation not required).

B. A concise explanation of the relevance of each patent, publication or other information listed that is not in the English language is as follows (see 37 C.F.R. § 1.98(a)(3)):

1. See the attached foreign patent office communication from a counterpart foreign application:

2. English translations are provided:

1. No certification; therefore, a fee in the amount of \$180.00 is required by 37 C.F.R. § 1.17(p).

2. See the certification below. No fee is required.

C. **37 C.F.R. § 1.97(d):**

after the mailing date of either a Final Office Action under 37 C.F.R. § 1.113 or a Notice of Allowance under 37 C.F.R. § 1.311, yet on or before payment of the issue fee.

1. See the certification below. A fee in the amount of \$180.00 is required by 37 C.F.R. § 1.17(p).

VI. CERTIFICATION UNDER 37 C.F.R. § 1.97(e): (check only one box)

The undersigned hereby certifies that:

A. each item of information contained in this IDS was first cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this IDS (See 37 C.F.R. § 1.97(e)(1)). See further statement under 37 C.F.R. 1.704(d) below in section VII, if applicable; or

B. no item of information contained in this IDS was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the undersigned after making reasonable inquiry, no item of information contained in this IDS was known to any individual designated in 37 C.F.R. § 1.56(c) more than three months prior to the filing of this IDS (See 37 C.F.R. § 1.97(e)(2)).

C. some of the items of information were first cited in a communication from a foreign patent office. As to this information, the undersigned hereby certifies that each item of information contained in this IDS was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this IDS. As to the remaining information, the undersigned hereby certifies that no item of this remaining information contained in this IDS was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the undersigned after making reasonable inquiry, no item of information contained in this IDS was known to any individual designated in 37 C.F.R. § 1.56(c) more than three months prior to the filing of this IDS.

VII. STATEMENT UNDER 37 C.F.R. 1.704(d)

The undersigned hereby states that:

each item of information contained in this IDS was cited in a communication from a foreign patent office in a counterpart application and this communication was not received by any individual designated in 37 C.F.R. § 1.56(c) more than

thirty days prior to the filing of this IDS. A copy of said PCT Search Report is attached.

VIII. PAYMENT OF FEES (check only one box)

A. A check in the amount of \$180.00 is enclosed for the above identified fee.

B. Please charge Deposit Account No. 162201 in the amount of \$180.00 for the above-indicated fee. A duplicate copy of this paper is attached.

The above references are being cited only in the interest of candor and without any admission that they constitute statutory prior art, contain matter which anticipates the invention, or which would render the same obvious, either singly or in combination, to a person of ordinary skill in the art. This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

- A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.
B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

- A. Pay TOTAL FEE(S) DUE shown above, or
B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
 Commissioner for Patents

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 736 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 736 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record taken singularly or in combination teaches or suggests

- receiving a broadcast message record having a broadcast message, a defined broadcast target area, and a broadcast message originator identifier, validating the record as a function of one or more of the broadcast message originator identifier, the broadcast target area, and a broadcast message transmission network parameter associated with a broadcast transmission network configured for broadcasting the message to a least a portion of the broadcast target area, generating a validated broadcast message record as a function of the validating, and distributing the broadcast message to at least a portion of the target area (claims 1 & 23); and
- receiving a broadcast message record including a broadcast message and a broadcast target area for the message, validating the authority of a broadcast message originator originating the record as a function of a broadcast message originator parameter, validating a broadcast transmission network against the broadcast transmission parameter, and transmitting the broadcast message to receiving devices within the broadcast target area (claim 42).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Moustafa M. Meky whose telephone number is 571-272-4005. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
