(57) **ABSTRACT**

The present invention is generally directed to a system and method for monitoring the level of light surrounding an automatic teller machine (ATM). In accordance with one aspect of the invention, a system includes a plurality of light sensors disposed in varying locations around the ATM. Preferably, some sensors will be disposed near the ATM, while others will be dispersed at various distances surrounding the ATM, in order to effectively monitor the lighting around the ATM. A circuit is provided within the ATM in communication with the sensors. In addition, a radio frequency (RF) transmitter is disposed within the ATM, and is configured to communicate the status of the sensors to a remotely located receiver. Finally, a receiver is interfaced to a telephone line forming part of a public switched telephone network (PSTN), wherein the receiver is configured to receive the status of the sensors communicated from the RF transmitter and to communicate the status information to a remote system via the PSTN. Various methods also are provided for monitoring lighting conditions surrounding an automatic teller machine, with some embodiments incorporating a customer access feature which provides a customer with access to ATM status information.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
