I, Rachel J. Watters, am a librarian, and the Director of Wisconsin

TechSearch ("WTS"), located at 215 North Randall Avenue, Madison Wisconsin,
53706. WTS is an interlibrary loan department at the University of WisconsinMadison. I have worked as a librarian at the University of Wisconsin library
system since 1998. I have been employed at WTS since 2002, first as a librarian
and, beginning in 2011, as the Director. Through the course of my employment, I
have become well informed about the operations of the University of Wisconsin
library system, which follows standard library practices.

This Declaration relates to the dates of receipt and availability of the following:

Wright, DR et al. "A closed-loop temperature control system for a low-temperature etch chuck." Advanced Techniques for Integrated Circuit Processing II, SPIE Proceedings, v. 1803, 1992, p. 321-329

Standard operating procedures for periodicals at the University of

Wisconsin-Madison. When an individual issue of a periodical was received by the

Library, it would be checked in, stamped with the date of receipt, added to library

holdings records, and made available to readers as soon after its arrival as possible.

The procedure normally took a few days or at most a few weeks.

Exhibit A to this Declaration is a true and accurate copy of Advanced

Techniques for Integrated Circuit Processing II, from the University of Wisconsin
Madison Library collection. A date stamp on the cover of this copy indicates that

this volume, published in 1993, was received by the Kurt F. Wendt Library, College of Engineering, University of Wisconsin, on June 23, 1993.

Based on the information in Exhibit A, it is clear that the volume was received by the library on or before June 23, 1993, catalogued and available to library patrons within a few days or at most a few weeks after June 23, 1993.

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
