About the type

This dictionary is typeset in CollinsFedra, a special version of the Fedra family of types designed by Peter Bil'ak. CollinsFedra has been customized especially for Collins dictionaries; it includes both sans serif (for headwords) and serif (entries) versions, in several different weights. Its large x-height, its open 'eye', and its basis in the tradition of humanist letterforms make CollinsFedra both familiar and easy to read at small sizes. It has been designed to use the minimum space without sacrificing legibility, as well as including a number of characters and signs that are specific to dictionary typography. Its companion phonetic type is the first of its kind to be drawn according to the same principles as the regular typeface, rather than assembled from rotated and reflected characters from other types. Peter Bil'ak (born 1973, Slovakia) is a graphic and type designer living in the Netherlands. He is the author of two books, *Illegibility* and *Transparency*. As well as the Fedra family, he has designed several other typefaces including *Eureka*. His typotheque.com website has become a focal point for research and debate around contemporary type design.

outpost ('aʊt,pəʊst) *n* **1** *military* **a** a position stationed at a distance from the area occupied by a major formation **b** the troops assigned to such a position **2** an outlying settlement or position **3** a limit or frontier
