A fluid-filled clutch arrangement includes a housing; a piston mounted with freedom of axial movement in the housing, the piston being sealed against the housing, the piston having a drive side bounding a drive side pressure space from a takeoff side bounding a takeoff side pressure space; a clutch which can establish and release a working connection between a drive and a takeoff as a function of the position of the piston relative to the clutch; and a partition wall bounding the takeoff side pressure space opposite the piston, the partition wall being active between the takeoff side pressure space and a cooling space. At least one supply line connects a fluid supply source to at least one of the drive-side pressure space, the takeoff side pressure space, and the cooling space.
