IEEE Std 1284-1994

Recognized as an American National Standard (ANSI)

## IEEE Standard Signaling Method for a Bidirectional Parallel Peripheral Interface for Personal Computers

#### Sponsor

Microprocessor and Microcomputer Standards Committee of the IEEE Computer Society

Approved March 30, 1994

**IEEE Standards Board** 

Approved September 2, 1994

American National Standards Institute

**Abstract:** A signaling method for asynchronous, fully interlocked, bidirectional parallel communications between hosts and printers or other peripherals is defined. A format for a peripheral identification string and a method of returning this string to the host outside of the bidirectional data stream is also specified.

**Keywords:** bidirectional parallel communications, computers, interfaces, PCs, personal computers, printers

**IEEE Standards** documents are developed within the Technical Committees of the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Board. Members of the committees serve voluntarily and without compensation. They are not necessarily members of the Institute. The standards developed within IEEE represent a consensus of the broad expertise on the subject within the Institute as well as those activities outside of IEEE that have expressed an interest in participating in the development of the standard.

Use of an IEEE Standard is wholly voluntary. The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE Standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE Standard is subjected to review at least every five years for revision or reaffirmation. When a document is more than five years old and has not been reaffirmed, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE Standard.

Comments for revision of IEEE Standards are welcome from any interested party, regardless of membership affiliation with IEEE. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments.

Interpretations: Occasionally questions may arise regarding the meaning of portions of standards as they relate to specific applications. When the need for interpretations is brought to the attention of IEEE, the Institute will initiate action to prepare appropriate responses. Since IEEE Standards represent a consensus of all concerned interests, it is important to ensure that any interpretation has also received the concurrence of a balance of interests. For this reason IEEE and the members of its technical committees are not able to provide an instant response to interpretation requests except in those cases where the matter has previously received formal consideration.

Comments on standards and requests for interpretations should be addressed to:

Secretary, IEEE Standards Board 445 Hoes Lane P.O. Box 1331 Piscataway, NJ 08855-1331 USA

IEEE standards documents may involve the use of patented technology. Their approval by the Institute of Electrical and Electronics Engineers does not mean that using such technology for the purpose of conforming to such standards is authorized by the patent owner. It is the obligation of the user of such technology to obtain all necessary permissions.

#### Introduction

DOCKET

Δ

LARM

(This introduction is not a part of IEEE Std 1284-1994, IEEE Standard Signaling Method for a Bidirectional Parallel Peripheral Interface for Personal Computers.)

This standard was formally started as an IEEE effort in January 1992, but without the advance work done by a loose alliance of printer manufacturers and printer software developers called the Network Printing Alliance, this standard would not be possible.

At the time it was completed, the key contributors to the IEEE P1284 Working Group were as follows:

Forrest D. Wright, Chair			
Robert Hillis, Secreta	ry Michae	Michael Timperman, Editor	
Aldo Alesii	Steven Goss	Brian Pendleton	
Chirag Bakshi	Robert Gross	Suzanne Price	
Motti Beck	Pat Hacker	Dinesh Rao	
Eric Bokman	Robert Herron	David Roach	
James Booth	Ken Hilliard	David Rosen	
Robert Botchek	Barry Hills	Fred Schlaffer	
Kerry Bott	George Horansky	P.V. Shivkumar	
Sylvan Butler	Richard Horton	Ron Smith	
Clark Buxton	Bill Hurdle	Jim Soriano	
Angel Colon	Arlin Jones	Larry Stein	
Darrell Cox	Tony Kiburis	Michael Stilz	
Blaine Davies	Eric Kuang	Stephen Tarr	
Steve Delnista	Boon Lim	David Voth	
Mike Dobbs	Peter Macourek	William Wagner	
Claudio Edelman	Cynthia Magidson	James Ward	
James Edwards	Ernie Mandese	Rusty Weyand	
Boris Elpiner	Martin Michael	Keith Winter	
Michael Fink	Joseph Mouhanna	Lloyd Young	
Neal Fischer	Roman Orzol	Fred Young	
Raimundo Garcia	Greg Peek	Desmond Yuen	
The following persons were on the ba	lloting committee:		
Scott Akers	Kenneth C. Heck	Suzanne L. Price	
Keith D. Anthony	Scott Hopkinson	Brian Ramelson	
Chirag Bakshi	John C. Hoppe	David L. Roach	
David Bartek	George Horansky	Jim Soriano	
Russell A. Beverly	Lak Ming Lam	Larry Stein	
Christos Bezirtzoglou	Tuvia Lamdan	Robert G. Stewart	
David Brearley	Min-Suk Lee	Michael D. Teener	
Charles Brill	Rollins Linser	Michael G. Thomps	
Myron A. Calhoun	Andy J. Luque	Michael Timperman	
Clyde Camp	Stephen Mabbs	Joseph P. Trainor	
C. H. Chen	Ernest N. Mandese	Robert Tripi

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

#### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
