(57) ABSTRACT

An automated labor and resource scheduling system provides automated assistance to scheduling managers for scheduling labor and resources to host and service events at a facility. The automated scheduling is based on on real time and motion analysis, resulting in realistic and clearly defined productivity expectations. It assists management in minimizing labor costs for events of any size, while providing greater confidence that proper staffing guidelines are in place to cover all bases. The automated scheduling helps eliminate guess work involved in manual scheduling, and more readily identifies near optimum labor margins. The scheduling system also provides employees itineraries with clear expectations, along with a map which charts the flow of events, resulting in improved performance, labor expense savings, and enhanced communication in the scheduling process.
