**Re: *Certain Audio Processing Hardware and Software and Products Containing Same,*
Inv. No. 337-TA-949**

Dear Judge Pender:

I write on behalf of all of the parties with respect to the upcoming claim construction hearing scheduled for November 16-17. Following the completion of *Markman* briefing, the parties have conferred extensively in a cooperative effort to decrease the number of disputed claims and generally streamline the claim construction hearing. I am pleased to report that the parties have now agreed on constructions for the majority of the terms, dramatically reducing the number of disputed claim terms requiring construction by the Court by two-thirds.

The following are the claim terms previously in dispute (and briefed in the parties' claim construction papers) for which the private parties and the Staff have now come to agreement.

'345 Patent	
Claim Term	Status
Current Minimum Value	No dispute: the parties have agreed to adopt the Staff's construction
Future Minimum Value	No dispute: the parties have agreed to adopt the Staff's construction
Subtractor for subtracting said noise elements/subtracting said noise elements	No dispute: Respondents have agreed to adopt the construction offered by Staff and Complainant

Almaty Beijing Boston Brussels Chicago Dallas Dubai* Frankfurt Harrisburg Houston Irvine London Los Angeles Miami
Moscow New York Palo Alto Paris Philadelphia Pittsburgh Princeton San Francisco Tokyo Washington Wilmington

*In association with Mohammed Buhashem Advocates & Legal Consultants

'637 Patent	
Claim Term	Status
Canceled	No dispute: The parties have agreed to drop this term from construction
'607 Patent	
Claim Term	Status
Main Signal	No dispute: Respondents have agreed to drop their position that this term is indefinite. The parties all agree on construction for this term.
Transform Function	No dispute: Respondents have agreed to drop their position that this term is indefinite. The parties all agree on construction for this term.
Band-limited	No dispute: The parties agree on a new construction of this term: "Signals limited to a band of frequencies that are a subset of frequencies of the original target and interference signals."
Adaptively Filtering	No dispute: Complainant has agreed to adopt the construction offered by Staff and Respondents

The parties will be filing an Amended Joint Claim Construction Chart to reflect the newly agreed-upon constructions for each of these terms.

The result of the parties' agreement is that only four claim terms are now in dispute and require construction by the Court. The parties' proposed constructions for each of these four terms remain unchanged from the claim construction briefs. The remaining terms in dispute are as follows:

The Honorable Thomas B. Pender
November 10, 2015
Page 3

'345 Patent
Magnitude
'607 Patent
Interference Signal
beam splitter for beam-splitting said target signal into a plurality of band-limited target signals and beam-splitting said interference signal into band-limited interference signals . . .
beam-splitting said target signal into a plurality of band limited target signals; beam splitting said interference signal into band-limited interference signals . . .

The parties believe that their diligent efforts to resolve the majority of the disputed claims in this investigation will help to simplify the claim construction hearing next week and assist the Court in construing the remaining claims.

Please let me know if you require any further clarification with respect to the agreement between the parties.

Sincerely,

/s/ Eric S. Namrow

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
