Frans W. Saris

Term ending 31 December 1994

William R. Frensley
Julia M. Phillips
Paul M. Solomon

AIP EDITORIAL STAFF: Deborah McHone, *Editorial Supervisor*; Julia Macklin, *Chief Production Editor*; Cindy Klingensmith and Marilyn Schrage, *Senior Production Editors*; Elizabeth Belmont, *Journal Coordinator*

The *Journal of Applied Physics* is published semimonthly by the American Institute of Physics (AIP) with the cooperation of The American Physical Society. It is devoted to general physics and its applications to other sciences, to engineering, and to industry. (Prior to 1937, the Journal carried the name *Physics*.) The Editor welcomes manuscripts describing significant new experimental or theoretical results in applied physics or manuscripts concerning important new applications of physics to other branches of science and engineering.

Information for Contributor

Submit manuscripts to the *Journal of Applied Physics*, Argonne National Laboratory, 9700 South Cass Avenue, Building 203, Room R-127, P.O. Box 8296, Argonne, IL 60439-8296. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. It is the responsibility of the corresponding author to confirm that each co-author approves of the paper as submitted. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whoever holds the copyright) to AIP; a suitable form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the 1978 U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a *page charge* of \$55 per page (with a one-page minimum) and an *article charge* of \$20 per article. For **Errata** the minimum page charge is \$10, with no article charge.

Two categories of manuscripts are acceptable, **full-length articles** and **Communications**. The latter are short contributions not generally exceeding in length nine double-spaced typewritten pages or approximately 2500 words of text reduced, however, by allowances for equations, tables, and figures. Abstracts are required for manuscripts of both types. Being short, Communications are often published more quickly than full-length articles. Instructions for preparation of

manuscripts will be found in the January issue of this journal and occasionally in later issues. In brief and incomplete summary: Two copies of the manuscript, including clear copies of the figures, are required, double-spaced throughout on one side of 21.6 × 28 cm (8½ × 11 in.) paper. The *abstract*, *references*, *figure captions*, and *tables* are similarly to be double-spaced each on its separate sheets. The *figures* should be original line drawings or high-contrast glossy prints not larger than 21.6 × 28 cm and should be included with the submission. *References* should conform to the style used in AIP journals including this one. Unusual mathematical symbols should be clarified with marginal notes. See AIP Style Manual for further details.

AIP's **Physics Auxiliary Publication Service (PAPS)** is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proofs and all correspondence concerning papers in the process of publication should be addressed to: Editorial Supervisor, *The Journal of Applied Physics*, American Institute of Physics, 500 Sunnyside Blvd., Woodbury, NY 11797. In all correspondence reference should be made to title, author, journal, and scheduled date of issue. A limited number of **alterations in proof** are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1992, American Institute of Physics. Individual teachers, students, researchers, and libraries acting for them are permitted to make copies of articles in this journal for their own use in research or teaching, including multiple copies for classroom or library reserve use, provided such copies are not sold. Copying for sale is subject to payment of copying fees. (See "Copying Fees" paragraph elsewhere in this journal.) Permission is granted to quote from this journal with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires in addition the consent of one of the original authors and notification to AIP. Reproduction for advertising or promotional purposes, or republication in any form, is permitted only under license from AIP, which will normally require that the permission of one of the authors also be obtained. Direct inquiries to Office of Rights and Permissions, American Institute of Physics, 335 East 45th Street, New York, NY 10017.

APPLIED PHYSICS REVIEWS

R23 Quantitative emission microscopy

J. Kölzer, C. Boit, A. Dallmann, G. Deboy, J. Otto, D. Weinmann

GENERAL PHYSICS: Nuclear, Atomic, and Molecular (PACS 01–36)

5303 Representation of tails of periodic and infinite-range signals: Towards a treatment for truncation

A. C. Vermeulen, R. Delhez, Th. H. de Keijser, E. J. Mittemeijer

CLASSICAL PHENOMENOLOGY: Electricity, Magnetism, Optics, Acoustics, Heat, Mechanics (PACS 41–52)

5310 Instabilities in annealed proton exchange waveguides in lithium tantalate

Paul J. Matthews, Alan R. Mickelson

5318 Propagation of several waves in a nonlinear medium displaying an optical activity: Application to four-wave mixing in $\text{Bi}_{12}(\text{Ge;Si})\text{O}_{20}$ crystals

M. Sylla, P. X. Nguyen, D. Rouede, G. Rivoire

5323 AlGaAs diode laser blue shift resulting from fast neutron irradiation

J. C. Camparo, S. B. Delcamp, R. P. Frueholz

5332 Effect of optical activity on higher-order self-diffraction in absorptive photorefractive medium: Transmission geometry for two-wave mixing

Amitava Roy, Kehar Singh

5338 Magnetic field enhanced performance of a copper hollow anode cathode laser

Z. Zhang, N. D. Perry, R. C. Tobin

5344 Longitudinal mode stability difference in Se- and Si-doped AlGaAs lasers

H. Sugiura, A. Noma, M. Yuri, M. Hirose, M. Kume, I. Ohta, M. Kazumura

5347 Gain measurements of high-pressure ultraviolet-preionized self-sustained discharge pumped atomic xenon laser

Katsuhiko Komatsu, Fumihiko Kannari, Minoru Obara

5353 Anisotropic thermal conductivity in chemical vapor deposition diamond

J. F. Graebner, S. Jin, G. W. Kammlott, B. Bacon, L. Seibles, W. Banholzer

Subscription Prices* (1992)

	U.S.A. & Poss.	Can., Mex., Central & S. Amer. & Caribbean	Foreign Surface mail	Air Freight Europe, Asia, Africa & Oceania	Optional Air Freight Asia, Oceania
Members [†]	\$160.00	\$240.00	\$240.00	—	\$350.00
Reg. rate	\$1240.00	\$1320.00	—	\$1430.00 [‡]	—

*The Journal is available on microfiche at \$160 per year to members and \$1240 per year at the regular rate.

[†]AIP Member and affiliated Societies.

[‡]Regular rate subscriptions to Europe, Asia, Africa, and Oceania include air freight service.

Back-Number Prices. Single copies from Vol. 24 (1953) through Vol. 55 (1984): \$55.00; Vol. 56 (1984) and thereafter; \$55.00. Special Supplements; \$55.00. Volumes 1-23 (1931-1952) are available only on microfilm.

The *Journal of Applied Physics* (ISSN: 0021-8979) is published semimonthly by the American Institute of Physics, 500 Sunnyside Blvd., Woodbury, NY 11797. Second-class postage paid at Woodbury, NY, and additional mailing offices. POSTMASTER: Send address changes to *Journal of Applied Physics*, 500 Sunnyside Blvd., Woodbury, NY 11797.

Subscription, renewals, address changes, and single-copy orders should be addressed to AIP Member and Subscriber Services Division, 500 Sunnyside Blvd., Woodbury, NY 11797. Allow at least six weeks advance notice. For address changes please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue. For your convenience a **change of address form** is included in every issue of *Physics Today*.

please use it. Request from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price. (AIP Headquarters are located at 335 East 45th St., New York, NY 10017; Subscription Fulfillment offices are located at 500 Sunnyside Blvd., Woodbury, NY 11797.)

Reprints of individual articles in this journal may be ordered singly at \$10.00 per article copy (postage included) for articles up to 20 pages. Beyond 20 pages there is a surcharge of \$0.20 per page. Air mail delivery is available. Orders are filled within one week of receipt or of the date of publication, whichever is later. Send orders to the AIP Member and Subscriber Services Division, 500 Sunnyside Blvd., Woodbury, NY 11797.

Copying Fees: The code that appears on the first page of articles in this journal gives the fee for each copy of the article made beyond the free copying permitted by AIP. (See statement under "Copyright" elsewhere in this journal.) If no code appears, no fee applies. The fee for pre-1978 articles is \$0.25 per copy. With the exception of copying for advertising and promotional purposes, the express permission of AIP is not required provided the fee is paid through the *Copyright Clearance Center, Inc. (CCC), 21 Congress St., Salem, MA 01970*. Contact the CCC for information on how to report copying and remit payment.

Microfilm Subscriptions of complete volumes of the *Journal of Applied Physics* are available on 16 mm and 35 mm. The *Journal of Applied Physics* also appears on a monthly basis in *Current Physics Microform (CPM) Section 1* along with 32 other journals published by the American Institute of Physics and its member societies. A *Microfilm Catalog* is available on request. The *Journal of Applied Physics* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP and its member societies.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
