The invention relates to a method of pairing a first device with a second device, the first and second devices being adapted for wirelessly communicating with each other, the pairing of devices aiming at ensuring communication only between trusted devices. The invention further relates to a communication device, a system, a computer readable medium and a data processing system. The object of the present invention is to provide a simple and intuitive scheme for pairing two wireless devices. The problem is solved by providing in the first device an algorithm comprising at least the following states a) A STANDBY state where the first device is in a default state; b) A CONNECTED state where wireless communication between the first and second devices is established; c) A PAIRING state comprising a pairing search state where pairing inquiries are repeatedly issued by the first device; and further providing that when the first device is NOT in the STANDBY or CONNECTED states, the first device is automatically, repeatedly brought in the pairing search state. This has the advantage of providing an automatic scheme for pairing two wireless devices. The invention may e.g. be used for wireless communication devices, e.g. portable, low-power devices, such as listening systems.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
