c. Limitation 104[B]: "performing content dependent data compression with a content dependent data compression encoder if a data type of the data block is identified" 49

i. Content Dependent Data Compression Encoder 49

ii. Performing Content Dependent Data Compression with a Content Dependent Data Compression Encoder if a Data Type of the Data Block is Identified 53

d. Limitation 104[C]: "performing data compression with a single data compression encoder, if a data type of the data block is not identified" 56

i. Single Data Compression Encoder 56

ii. Performing Data Compression with a Single Data Compression Encoder if a Data Type of the Data Block is not Identified 66

e. Limitation 104[D]: "wherein the analyzing of the data within the data block to identify one or more data types excludes analyzing based only on a descriptor that is indicative of the data type of the data within the data block" 69

6. Conclusion: Claim 104 Would Have Been Obvious 79

7. Independent Claim 105 Would Have Been Obvious Over Franaszek in View of Hsu, or in the Alternative, Obvious Over Franaszek in View of Hsu and Sebastian 79

a. Preamble: "A computer implemented method" 79

b. Limitation 105[A]: "receiving a data block in an uncompressed form, said data block being included in a data stream" 80

c. Limitation 105[B]: "analyzing data within the data block to determine a type of said data block" 81

d. Limitation 105[C]: "compressing said data block to provide a compressed data block" 82

e. Limitation 105[D]: "wherein if one or more encoders are associated to said type, compressing said data block with at least one of said one or more encoders, otherwise compressing said data block with a default data compression encoder, and" 83

f. Limitation 105[E]: "wherein the analyzing of the data within the data block to identify one or more data types excludes analyzing based only on a descriptor that is indicative of the data type of the data within the data block." 93

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
