

# Exhibit D

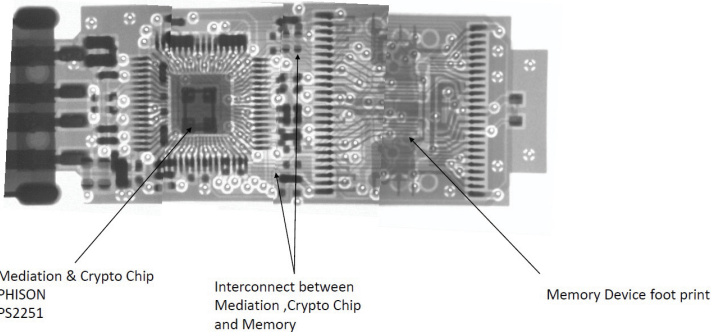

**Exhibit D**  
**U.S. Patent No. 6,088,802**  
**v.**  
**Kingston's DataTraveler Vault Privacy 3.0<sup>1</sup>**

Claim Language	Selected Analysis and Evidence
<b>Claim 11</b> A peripheral device, comprising:	Kingston designs, manufactures and sells peripheral devices. For example, Kingston sells encrypted USB flash drives, such as the DataTraveler Vault Privacy 3.0. The DataTraveler Vault Privacy 3.0, a peripheral device, intended to be plugged into external ports on a computer. 

<sup>1</sup> Investigation of both the patent and the potentially infringing product continues. This chart is constructed based on selections of the best available evidence and analysis at the time of filing. SPEX reserves the right to update and amend its contentions, including adding additional claims, as the litigation progresses.

Claim Language	Selected Analysis and Evidence
	
<p>[a] security means for enabling one or more security operations to be performed on data;</p>	<p>Kingston's DataTraveler Vault Privacy 3.0 includes a security means for enabling one or more security operations to be performed on data.</p> <p>If this claim element is treated as a means-plus-function claim element, the corresponding structures of this claim element are expected to be at least:</p> <ol style="list-style-type: none"> <li>1. Cryptographic processing device 801;</li> </ol>

Claim Language	Selected Analysis and Evidence
	<p>2. Security mechanism 302a;                      3. Security token; or                      4. Equivalent thereof.</p> <p>Kingston's DataTraveler Vault Privacy 3.0 meets this limitation. For example, this device has hardware-based encryption. See, e.g., <a href="http://www.kingston.com/us/usb/encrypted_security/dtvp30">http://www.kingston.com/us/usb/encrypted_security/dtvp30</a>. This device uses the Phison PS2251-13-1 chip to perform security operations on data. For example, this device enables at least AES encryption/decryption (also known as FIPS 197).</p> 

Claim Language	Selected Analysis and Evidence
	<p data-bbox="506 632 1040 657">The following is an X-ray of the device's components:</p>  <p data-bbox="506 1052 1495 1108">The Phison PS2251-13-1 is not listed on Phison's website but the information available shows it can perform the AES256 algorithm.</p>

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
