## INTRODUCTION

Inventors Hiestand and Schnell discovered that far lower doses of fingolimod could help RRMS patients than were previously thought possible. The '405 Patent claims these methods for using 0.5 mg daily to reduce relapses, treat the disease, and slow its progression. Unique EAE rodent model experiments gave the inventors the insight to see past the art teaching that a dose this low would not work. Later, clinical trials overcame experts' skepticism and ultimately proved the dose effective.

The Petition here relied on testimony from only a single expert, MS physician Dr. Barbara Giesser. (Ex. 1002.) But discovery showed Dr. Giesser conducted no independent literature review to support her obviousness arguments, instead relying solely on references supplied by counsel. Courts categorically reject such lawyer-driven analyses as *per se* hindsight, and thus unlawful. (Paper 26 at 42-44.) Dr. Giesser also lacks the qualifications and experience needed to provide the full view of a person of skill, which the Institution Decision defined to include a pharmacologist. Dr. Giesser manifestly is not a pharmacologist. (*Id.* at 44-46.)

Petitioners dispute none of this in their Reply. (Paper 49.) Either the lack of testimony from a pharmacologist or the undisputed lawyer-driven nature of Dr. Giesser's review would, by themselves, defeat the Petition for failing to make out a *prima facie* case. Petitioners now seek to back-fill with new testimony from Dr. Leslie Z. Benet, a pharmacologist. (Ex. 1047.) It is too late. The Board should deny

the Petition based on its failure to make a *prima facie* showing. But even if the Board were to consider Dr. Benet's views, they cannot save the Petition.

Petitioners and Dr. Benet begin by trying to recast the Board's claim constructions contrary to what the Institution Decision says. They then argue the prior art says something other than what it says; offer opinions on MS and EAE models beyond Dr. Benet's expertise; improperly propound new invalidity theories beyond the Petition's scope; and otherwise create a smokescreen around the Petition's inadequacies. The Board should deny all three Grounds.

## ARGUMENT

Dr. Benet is an eminent pharmacologist, but the wrong witness for this case. On cross-examination, he admitted his experience with the disease MS, the EAE animal model system, or the drug fingolimod is limited or non-existent—each key aspects of this case. (Ex. 2100 at 43:9-46:2; Ex. 2096 at ¶¶ 6-7.) Respectfully submitted herewith are declarations from experts to address Dr. Benet's testimony: Exhibits 2096 (3d Steinman), 2095 (4th Jusko), 2097 (4th Lublin), and 2098 (Chun).

### **I. The Patent's Claims Require Efficacy and Daily Administration.**

*A. The Preambles.* The Patent claims methods "for" achieving different effects from giving 0.5 mg "daily" to a "subject in need": (i) "preventing, reducing, or alleviating" relapses (claims 1 and 2); (ii) "treating" RRMS (claims 3 and 4); and (iii) "slowing progression" of RRMS (claims 5 and 6). (Ex. 1001 at 12:49-13:9.)

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
