

FORGING INTELLIGENT SYSTEMS™

SEMICONDUCTOR TECHNOLOGIES FOR

From the Internet of Things to the cloud, we collaborate with forward-thinking customers on semiconductor solutions that are transforming businesses, industries and everyday lives.

GLOBALFOUNDRIES Technologies

- FD-SOI
- RF SOI
- FinFET
- ASICs
- Advanced Packaging
- SiGe
- Analog / Power
- Silicon Photonics
- Embedded Memory
- RF CMOS
- High Voltage
- MEMS

APPLICATIONS SPANNING DEVICES TO DATA CENTERS

The Power to Shape Your Market

- Comprehensive, specialized technology portfolio
- Rich IP portfolio
- Commitment to execution excellence
- State-of-the-art manufacturing
- Expert in-house and third-party design services
- Trusted Foundry facilities and services

GLOBALFOUNDRIES Fast Facts

- Created in 2009
- Acquired Chartered Semiconductor in 2010, IBM Microelectronics in 2015
- Largest privately held semiconductor company
- Ranked the industry's 2nd largest semiconductor foundry

Fab Capacity

GLOBALFOUNDRIES produces
~7 million wafers
per year, 200mm equivalents

Our capacity has
increased 8-fold
since 2009

More than...

18,000
employees

250
customers

25,000
patents and
applications

Global Presence

Local support for an expanding, global customer base
