

CURRICULUM VITAE - PAUL F. REYNOLDS, JR.
April, 2016

Professor Emeritus

Dept of Computer Science
University of Virginia, Charlottesville, Virginia 22904
reynolds.paul.f@gmail.com
www.cs.virginia.edu/~pfr

Summary:

Paul F. Reynolds, Jr. joined the Computer Science faculty at the University of Virginia in 1980, departing in August 2012 to pursue expert advisory opportunities in government and industry. His primary research activities are in simulation technology, parallel and distributed computing, high performance networking, software quality, and software analysis. He has been awarded over 60 grants. He has conducted research sponsored by DARPA, the National Science Foundation, DUSA (OR), the National Institute for Science and Technology, the Defense Modeling and Simulation Office, Virginia Center for Innovative Technology and numerous industries. His most recent research while at UVa addressed simulation issues –fault localization in simulations, uncertainty management, and automated determination of sources of unexpected outcomes. He led two interdisciplinary institutes: The Institute for Parallel Computation and the Modeling and Simulation Technology Research Initiative (MaSTRI) at UVa. With one of his PhD students he co-published the first general, rigorous approach to multi-resolution modeling. Funded by DARPA and NSF, he was a co-architect of Isotach Networks, capable of supporting scalable concurrent caches with message delivery order guarantees. Two special-purpose, ASIC-based, hardware networks were built based on his technologies.

Professor Reynolds has supervised to completion 65 graduate degrees, including sixteen Ph.D. students. Half of his Ph.D. students hold faculty positions in U.S. universities, including CMU and the University of Illinois. His record for graduating women and minority graduate students ranks among the best in his department. He co-advised a winner of the UVa Engineering School's annual senior thesis competition and five finalists. He was awarded multiple teaching awards. In 2009 he advised the national second place finisher (Erin Carson) in the annual Computing Research Association undergraduate research award competition.

He has served in numerous leadership roles within the Department of Defense, including initial setup and later oversight of the Joint National Test Facility in Colorado Springs, and conceptualization and design of the DoD High Level Architecture for Modeling and (distributed) Simulation (standard: IEEE 1516).

Currently, Professor Reynolds is a University Expert for the U.S. Army in cyber analysis at the National Ground Intelligence Center in Charlottesville. Also, he is actively engaged as a subject matter expert in patent litigation, having supported ten Patent Office petitions for Inter Partes Review in the last 3-1/2 years. He has recently been an expert for Shine S&T on a Virginia SBDC grant, regarding identification of viable IP in modeling and simulation technologies.

Paul F. Reynolds, Jr.

Personal

Born: Cleveland, Ohio, 5 Nov 1948
Marital Status: Married, Three Grown Children

Education

Ph. D. (Computer Science) University of Texas at Austin, 1979
M. S. (Computer Science) University of Texas at Austin, 1975
B. A. (Psychology) Ohio Northern University, Ada, Ohio, 1970

Professional Fulltime Employment History

Professor Emeritus, Computer Science, University of Virginia, Aug, 2012 – present
Professor, Computer Science, University of Virginia, 1998 - 2012
Associate Professor, Computer Science, University of Virginia, 1986 – 1998.
Director, Institute for Parallel Computation, U. Virginia, Aug, 1987 - June, 1989.
Associate Director, Institute for Parallel Computation, University of Virginia,
Dec, 1986 - Aug, 1987.
Assistant Professor, Computer Science, University of Virginia, 1980 - 1986.
Instructor, Computer Science, University of Texas at Austin, 1979 - 1980.
Software Architect and Developer, Tracor, Inc., Austin, Tx. 1975 – 1977.

Selected Professional Consulting/Expert History

Design/develop VideoSpeedTracker: <https://github.com/pfr/VideoSpeedTracker> (2016)
Patent subject matter expert (2012 – 2016) See next page for details.
Shine S&T (2011- present) Intellectual property identification and advancement.
U.S. Army, NGIC (1992-present) (Active clearance: TS/SCI) Software analysis, emitter description and analysis.
Into Networks (2000-2001) High performance networks.
Vanguard Research (1996-1999) Committee Chair, Joint National Test Facility review, Colorado Springs.
Institute for Defense Analyses (1994-1998) DoD Modeling and Simulation High Level Architecture (IEEE standard 1516).
Mystech (1990-1996) High performance simulation.
MITRE (1987-1989) Stand-up of DoD Joint National Test Facility, Colorado Springs.
NASA/ICASE (1986-1992) High performance networks.
IBM (1981-1985) High performance networks.
Honeywell (1978-1980). Capacity planning and analysis.

Patent Expert Experience (2012 – 2016)

Expert on ten IPR's
Deposed nine times
Testimony: none (but would like to)

- | | |
|----------------------|---|
| US6631449 (Borrill) | Dec 2012 expert for IPR filed with PTAB
Deposed Spring 2013. Case settled.
May 2013 expert for IPR filed with PTAB
Case settled.
Sept 2015 expert for IPR filed with PTAB
PTAB institutes trial March 2016, deposition scheduled. |
| US6918014 (Borrill) | Dec 2012 expert for IPR filed with PTAB
Deposed Spring 2013. Case settled. |
| US5825891 (Levesque) | Dec 2012 expert for IPR filed with PTAB
Deposed Spring 2013. Case settled.
May 2013 expert for IPR filed with PTAB
Case settled.
Dec 2013 expert for IPR filed with PTAB
Deposed Spring 2014. Case settled.
July 2014 expert for IPR filed with PTAB
Deposed Feb 2015.
Deposed July 2015. All claims invalidated by PTAB, Oct 2015. |
| US6259381 (Small) | April 2014 expert for IPR filed with PTAB
Deposed Fall 2014. All claims invalidated by PTAB, Oct 2015. |
| US7032089 (Ranade) | Aug 2014 expert for IPR filed with PTAB
Deposed March 2015.
Deposed July 2015. All claims invalidated by PTAB, Dec 2015. |

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
