Advancing Academic Research

Bibliography of Published Papers and
Presentations Using QuintilesIMS Information

Introduction

QuintilesIMS information is used extensively by researchers around the world to advance understanding of key healthcare issues. As a leading global information and technology services company, we collaborate with academics and others whose research would be significantly advanced through access to QuintilesIMS proprietary information. This activity generates a large number of peer-reviewed publications and conference presentations, covering a broad range of topics.

The range of information accessed and used for research purposes is extensive. It includes summarized global and national prescription drug volume and sales information; provider-level prescription information; de-identified longitudinal patient data; provider profiles and organizational relationships; and commercial insurance medical and pharmacy claims information.

This bibliography provides a summary of research published from January 2010 through December 2016 that was undertaken by U.S.-based researchers and utilized IMS Health data assets. The bibliography is in reverse chronological order by publication date and organized into four themes: Understanding Disease and Treatment Patterns, Providing Content for Healthcare Costs, Assessing Policy Levers, and Advancing Real World Patient-Level Clinical Evidence. Collectively, this research represents a substantial advancement in understanding the real-world operation of our health system, and is invaluable to multiple stakeholders. This bibliography has been produced as a public service without industry or government funding.

Murray Aitken

Lipid-lowering treatment patterns among patients with type 2 diabetes mellitus with high cardiovascular disease risk

BMJ Open Diabetes Res Care. 2015 Sep 23;3(1)
Quek RG, Fox KM, Wang L, Li L, Gandra SR, Wong ND

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
