Till the last year competition with other makers bothered the company of Nokia in no way. So, it held rather a calm policy and launched products in accordance with old plans. Such models often lost to rivals. And in the beginning of 2005 the company started the development of a product line, which was aimed at competition with other makers' leading devices. And opposition to growing Samsung's and Sony Ericsson's popularity was the main idea.

Twitter, Inc. v. VidStream LLC
IPR2017-01133

VidStream LLC | Ex. 2002

Nokia 6270 can be regarded as the first measure against Samsung. According to specifications, the new model has the same functionality and is targeted at the same group. That is one of the first company's sliders, which followed Nokia 6111 closely. A time gap of several months separates the new model and Samsung D600, however consider the popularity of Nokia brand and you will understand that Nokia 6270 is not a bit late.

You will recognize the Nokia's style at first sight. They still do not refuse big size, and the device surpasses rivals in dimensions. Its large screen is not a reason, but more a justification of the size. And applied aluminum panels can be considered optional, as some dozens of grams would not harm the phone weight. The whole face panel and the top of side facets are made of anodized aluminum. The back is also in the same style. It all resembles a sandwich of a plastic base and a metallic plate above.

Two colour solutions are available - brown and silvery bodies. They both look fascinating, and the light version seems to be targeted at those few women, who will choose the device.

The model's weight forms 132 grams (with a memory card), and it can be felt in hands. At the same time the maker claims 125 g. Considering the weight and dimensions we would call the handset a variant for men, for little women can work with it constantly.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
