What is Current TV?

create & upload: mobile

capture it with your mobile phone camera

Don't just watch content on your mobile phone, **make content and let the world see it** - on Current's national TV network -- now available in 28 million homes. Current is the first and only TV network to showcase your mobile videos.

Check out the call outs below, watch a sample, shoot some footage with your video phone and find out how the content you capture with your mobile can **pay** those coverage charges. Oh, and make sure what you send to Current is something you and your friends would want to watch on TV!

Mobile Culture

Never let another "awe inspiring", "laugh inducing", "newsworthy" moment get away from you. Next time you encounter something or someone you want to share, whether it's a movie star, a fantastic performance or tricked out ride, pick up the phone, stop talking, and start shooting.

make sure you check out our guidelines before submitting

Mobile Rant

Have you seen an article in the paper, or something on the news that is begging for your opinion? When life happens do you have to put your two cents in? Then rant away -- just make sure your phone is rolling and recording.
