Samsung SCH-V770 7 Megapixel digital camera phone

Samsung SCH-V770 seven megapixel digital camera phone : Samsung Electronics unveils the world's first mobile phone equipped with a 7 megapixel digital camera at CeBIT 2005. Just six months after the introduction of its world's first 5 MP camera phone. Samsung has reached another milestone in camera phones. The Samsung V770 offers the same level of picture-taking sophistication that a 7 megapixel digital camera does. The camera functions have been upgraded to include a 3x optical zoom and 5x digital zoom with a 1/1.8" CCD. It also supports auto focus and a flash unit that performs optimally for 7 megapixel photographs. The V770 is designed to enable attachable wide-angle and tele-conversion lenses, the first ever on a camera phone.
