John C. Hart

**Last, First:**

Hart, John C.

Faculty

Title & Interests:

CS - high performance graphics, shape modeling

John C. Hart is a Professor in the Department of Computer Science at the University of Illinois, Urbana-Champaign where he studies computer graphics, data visualization and computational topology. He is also Executive Associate Dean of the Graduate College. He received his B.S. from Aurora University in 1987, and his M.S. (1989) and Ph.D. (1991) from the Electronic Visualization Laboratory at the University of Illinois at Chicago.

Prof. Hart's research on computer graphics and related areas over the past 25 years has been supported by Adobe, AT&T, DARPA, IBM, Intel, Microsoft, Nokia, NVIDIA and the NSF. He has also consulted for graphics hardware manufacturers, defense contractors, visual effects studios, game developers and a medical imaging startup, and provided graphics hardware IP expertise for Microsoft, NVIDIA, AMD (ATI), SGI (GPH) and Creative (ZiiLabs), including depositions and trial testimony.

Prof. Hart is the graphics area editor for ACM Books, and edited the recently published book: "[The VR Book: Human-Centered Design for Virtual Reality](#)" by Jason Jerald. Prof. Hart teaches the Coursera [Data Visualization](#) course which enrolled over 88,000 learners from 198 different countries on its initial offering. He is also a past Editor-in-Chief of ACM Transactions on Graphics and remains on its editorial board. He is a co-author of "Real-Time Shading" and a contributing author for "Texturing and Modeling: A Procedural Approach." He served from 1994-9 on the ACM SIGGRAPH Executive Committee, and is an Executive Producer of the documentary "The Story of Computer Graphics."

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
