I. INTRODUCTION

Defendants Bitdefender Inc., Piriform, Inc., Ubisoft, Inc., Square Enix, Inc., ADP, LLC, Big Fish Games, Inc., Blackboard, Inc., Box, Inc., and Zendesk Inc. (“Defendants”)¹ hereby submit this brief in support of their proposed constructions of disputed claim terms in U.S. Pat. Nos. 6,510,466 (the “’466 patent”), 6,728,766 (the “’766 patent”), 6,324,578 (the “’578 patent”) and 7,069,293 (the “’293 patent”) (the “Asserted Patents”).²

Plaintiffs’ Uniloc USA, Inc. and Uniloc Luxembourg, SA (“Plaintiffs” or “Uniloc”) opening claim construction brief (“Pl. Br.”) disregards the intrinsic record as it applies to the claim terms in dispute. Emblematic of this disregard, Plaintiffs’ opening brief does not contain a single citation to the Specifications of the Asserted Patents (other than references to the claims).

First, with respect to the term “application programs,” Plaintiffs rely on an alleged plain and ordinary meaning that ignores definitional statements and disclaimers in the Specifications and relevant file histories of the Asserted Patents, each of which require that the claimed application programs execute on the client and not the server. Next, for “registration operations,” Plaintiffs’ failed attempt to conflate the terms “application programs” and “file packets” into a single concept is unsupported by the claims, Specifications, and file histories, each of which treats “application programs” and “file packets” as separate concepts, such that the claimed “registration operations” refer specifically to registration of application programs (not file packets). Similarly, for “license availability,” Plaintiffs again disregard that the claims, Specifications, and file histories, each require that determining that a user is authorized to access

¹ Defendant Kaspersky Lab, Inc. will indicate its claim construction positions in a separate filing.

² The ’466 and ’293 patent share a common Specification; for ease of review, citations in support of Defendants’ proposed constructions as to these patents are made collectively to the ’466 patent Specification. Likewise, the ’578 and ’766 patent share a common Specification, so citations in support of Defendants’ proposed constructions for these two patents are made collectively to the ’578 patent Specification.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
