QLogic Licenses Alacritech

QLogic and Alacritech have entered into a partnership to respond to the market need for multi-platform support of a 10-Gbit/s TOE

ALISO VIEJO, Calif. -- QLogic Corp. (Nasdaq:QLGC) and Alacritech(r), Inc. today announced the companies have entered into a partnership to respond to the market need for multi-platform support of a 10 Gigabit TCP Offload Engine (TOE). QLogic is licensing Alacritech TCP offload patents to deliver HBAs with 10 Gigabit TOE for all operating systems including Linux and Microsoft Windows. Customers with multiple high performance operating environments can now look to QLogic host bus adapters for a common 10 Gigabit TOE infrastructure in order to simplify management, and save time and money.

"To support all of their I/O intensive applications, customers are looking to see Alacritech SLIC Technology(r) made available across many operating environments," said Larry Boucher, president and CEO, Alacritech. "With a pervasive Fibre Channel HBA market presence based on support for popular operating systems, QLogic is in a unique position to partner with Alacritech and bring Alacritech SLIC Technology to a broader market."

"Linux is a high performance computing platform and 10 Gigabit offload will be essential to server performance in the future," said Brian Garrett, senior analyst, Enterprise Strategy Group. "Making Alacritech SLIC Technology(r) broadly available to the Linux community through the QLogic and Alacritech partnership is an important milestone." "Customers expect TCP offload to be a key component of a 10 Gigabit Ethernet network that is efficiently delivering data," said Roger Klein, vice president and general manager, QLogic Computer Systems Group. "We expect the partnership between QLogic and Alacritech to broaden customer access to 10 Gigabit TOE and accelerate widespread adoption."

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
