*Integrated Network Management VI
Distributed Management for
the Next Millennium*
Edited by Morris Sloman, Subrata Mazumdar, and Emil Lupu

The next millennium will be a time of rapid change. Advances in computing and multi-media interaction will be widespread, permitting communication and multi-media interaction on the move. The wide distribution of countries will introduce many new challenges. Management in this new information era will need to support the integration of data and telecommunications networks from narrowband to broadband, terrestrial to satellite, fixed to mobile and uni-media to multi-media. This will be an age of electronic commerce, federated systems, and services that are dynamically configured to meet market needs as they evolve. The Sixth IPIP/IEEE International Symposium on Integrated Network Management looks at the underlying management technologies needed to support this vision, and offers a world-class program with high-quality technical sessions presented by recognized leaders in their fields, panel sessions for the interactive discussion of the latest technical questions, timely tutorials by renowned experts, and eminent keynote speakers. The following issues, among others, are considered:

- Web-based Management
- Virtual Private Networks
- Adaptable Network
- WDM & ADSL Management
- Intelligent & Mobile Agents
- Security Management
- Multi-Media Management
- Service Management
- Policy-based Management

This volume contains the proceedings for the sixth IPIP/IEEE International Symposium on Integrated Network Management (IM '99) and was held in May 1999, Boston, USA. Subrata Mazumdar is with Bell Laboratories, Lucent Technologies, US. Morris Sloman and Emil Lupu are with the Imperial College, UK.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
