

tumor activity against solid pancreatic tumors. (Ex. 1010, Pantuck ¶ 105.) The results of the Weckbecker in vivo assay are summarized below:

Treatment Received	Tumor Volume (mm <sup>3</sup> )	Standard Error	Tumor Volume Range (mm <sup>3</sup> )
Control	4020	579	3441-4599
Everolimus	3685 (8.3%)	263	3422-3948
Rapamycin	2748 (31.6%)	325	2423-3073
Octreotide	2205 (45.1%)	339	1866-2544
Everolimus + octreotide	130 (96.8%)	75	55-205
Rapamycin + octreotide	106 (97.4%)	44	62-150
