COMPUTER COMMUNICATION REVIEW is a quarterly publication of the ACM Special Interest Group on Data Communication. Its scope of interest includes: data communication systems for computers; data communication technology for computers; reliability, security and integrity of data in data communication systems; problems of interfacing

communication systems and computer systems; computer communication system modelling and analysis.

Items attributed to persons will ordinarily be interpreted as personal rather than organizational opinions. Technical papers appearing in Computer Communication Review are informally reviewed.

A SIGCOMM membership application can be found on the last page of this issue.

COMPUTER COMMUNICATION REVIEW (ISSN 0146-4833) is published five times a year (January, April, July, and two issues in October) by the Association for Computing Machinery, Inc., 1515 Broadway, New York, NY 10036. Second-class postage paid at New York, NY, and at additional mailing offices.

Postmaster: Send address changes to ACM COMPUTER COMMUNICATION REVIEW, 1515 Broadway, New York, NY 10036.

Printed in the U.S.A.

Admission Problem for Real-Time Applications with QOS Requirements

David Yates, James Kurose, Don Towsley (University of Massachusetts) and Michael G. Hluchyj (Motorola Codex)

Analysis of Burstiness and Jitter in Real-Time Communications
Zheng Wang and Jon Crowcroft (University College London)

An Adaptive Congestion Control Scheme for Real-Time Packet Video Transport

Hemant Kanakia (AT&T Bell Laboratories), Partho P. Misra (University of Maryland) and Amy Reibman (AT&T Bell Laboratories)

Session 3: Routing

Chair: *Martha Steenstrup, BBN Systems and Technologies*

The Synchronization of Periodic Routing Messages

Sally Floyd and Van Jacobson (Lawrence Berkeley Laboratory)

Dynamics of Internet Routing Information

Bilal Chinoy (San Diego Supercomputer Center)

Open Shortest Path First (OSPF) Routing Protocol Simulation

Deepinder Sidhu, Tayang Fu, Shukri Abdallah, Raj Nair (University of Maryland Baltimore County) and Rob Coltun (Consultant)

Session 4: Protocol Implementation Issues

Chair: *Craig Partridge, BBN*

Implementing Network Protocols at User Level

Chandramohan A. Thekkath, Thu D. Nguyen, Evelyn Moy and Edward D. Lazowska (University of Washington)

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
