TerraVision II: Visualizing massive terrain databases in VRML

☐ Search within citing articles

Under the hood of GeoVRML 1.0
M Reddy, L Iverson, YG Leclerc - Proceedings of the fifth symposium on …, 2000 - dl.acm.org
Abstract GeoVRML 1.0 provides geoscientists with a rich suite of enabling capabilities that
cannot be found elsewhere. That is, the ability to model dynamic 3-D geographic data that
can be distributed over the web and interactively visualized using a standard browser **...**

[PDF] Research Article Multiscale Terrain and Topographic Modelling with the Implicit TIN
DB Kidner, JM Ware, AJ Sparkes, CB Jones - Transactions in GIS, 2000 - users.cs.cf.ac.uk
Abstract The Multiscale Implicit Triangulated Irregular Network (TIN) provides a storage and
access scheme for generating triangulated terrain models that adapt their content and level
of detail to the requirements of the user. The scheme combines storage of data **...**

An information database for VRML cities
A Heinonen, S Pulkkinen… - … 2000. Proceedings. IEEE …, 2000 - ieeexplore.ieee.org
Abstract A system is presented to visualize information about city with a three-dimensional
web user interface. We present a novel way to connect a VRML world to an in-formation
database. As the data, code and models are kept separate, updates and maintenance of **...**

3D Virtual Warehouse on the WEB
M Buffa, EC Lafon - Information Visualization, 2000. …, 2000 - ieeexplore.ieee.org
Abstract In the emerging field of E-Commerce we show the great potential interest to create
30 virtual shopping centers. The study of a specific application: the creation of an electric
household applicants warehouse enables us to highlight the possibilities of the VRML2. 0 **...**

An interactive land use VRML application (ILUVA) with servlet assist
LA Belfore II, S Chitithoti - Proceedings of the 32nd conference on Winter …, 2000 - dl.acm.org
Abstract We summarize progress achieved on an interactive land use VRML application
(ILUVA) with servlet assist. The purpose of this application is to enable one to take a virtual
land area and add buildings, roadways, landscaping and other features. The application **...**

Integrating VRML, Java, and HTML in a web-based tool for computer literacy
W Patterson, J Hankins - Journal of Computing Sciences in Colleges, 2000 - dl.acm.org
Abstract Virtual reality visualization tools are gaining importance in many fields including
medical training, elementary and secondary school education, and ecology, among others.
Since humans live in a three-dimensional world, there is an increasing interest in **...**

Automatic generation of hair texture with line integral convolution
X Mao, M Kikukawa, K Kashio… - Information Visualization …, 2000 - ieeexplore.ieee.org
Abstract Synthesis of hair image is one of the most important and challenging computer
graphics problems. In this paper, we propose a new technique for automatically generating
realistic human hair texure on the 3 0 models of human character. The idea is inspired by **...**

[PDF] Decoding of Large Terrains Using a Hardware Rendering Pipeline
JE Fowler, J van der Zwaag, S Tenginakai, R Machiraju… - 2000 - infoserv.erc.msstate.edu
Abstract In this paper, we present a simple approach to the quantization of vertex-coordinate
values of a very large terrain dataset, allowing both efficient representation and timely
rendering of the data. We focus on uniform scalar quantization, which, although **...**

Database and modelling strategy: a compliant way for display optimisation
N Farenc, F Sidler, A Ferrando, D Thalmann - wise, 2000 - computer.org
ABSTRACT In order to display huge scenes with virtual human inhabitants evolving inside a
virtual city, we propose a methodology to create and manage different Level of Detail for a
well-segmented scene without "re-meshing" the scene during simulation. A database **...**

[CITATION] Nutzerunterstützung in elektronischen, kartographischen Medien. User Support in electronic, cartographic Media.
A Müller - ubt.opus.hbz-nrw.de
Zusammenfassung: Im Rahmen der Arbeit wird ein Entwicklungsmodell für elektronische,
kartographische Medien vorgestellt, das eine aufgaben-und handlungsgerechte Gestaltung
interaktiver Kartensysteme zum Ziel hat. Dies geschieht vor dem Hintergrund, dass **...**
