USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT

This collection of information is required by 37 CFR 1.51. The information is used by the public to file (and by the PTO to process) a provisional application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the complete provisional application to the PTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Washington, D.C., 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Box Provisional Application, Assistant Commissioner for Patents, Washington, D.C., 20231.

Title: **Code Signing System and Method**

Inventor(s): **Michael Brown, Herb Little, David Yach**

Assignee: **Research In Motion Limited**

BACKGROUND OF THE INVENTION

Field of the Invention

This invention relates to security protocols with Java programs. Specifically this invention relates to assigning a digital signature to a Java program in order to use it on a mobile communications device (herein collectively called devices).

Description of the Prior Art

When a Java application arrives on a device such as the RIM Wireless Handheld 957™, there is a need to control the access that the application has. For example, if a product is to be exported, access to strong cryptographic routines must be restricted. Interfaces to a radio transmitter may be protected so that destructive applications are unable to flood the wireless network with data; similarly, interfaces to a database or file system may be protected so that destructive applications are unable to fill a device's storage space with unwanted data.

SUMMARY OF THE INVENTION

It is an object of the invention is to provide an improved coding signing system and method.

It is an object of the invention to oversee the management and execution of

DOCKET ALARM Find authenticated court documents without watermarks at docketalarm.com.

Java applications arriving to the device;

It is an object of the invention to verify that any application has been digitally signed as having permission to carry out its intended function;

It is an object of the invention to prevent unacceptable applications from gaining access strong cryptographic routines and any other application programming interface (API) designated by its author as "sensitive";

In the present invention, digital signatures are used to control access to sensitive APIs, thereby allowing access to only those applications that have been digitally signed by the author of a sensitive API.

In the invention, a Java application, which will access an API, is developed to run on a device. In order to run on the device and access the sensitive API, the author of the API must approve the application by attaching a digital signature using the author's private key. Whenever the application on the device is executed the signed application will be verified. The author of any API may decide that the API should not be exposed to every application on the device, but only to those that have been verified to be non-destructive, or for which some business arrangement pre-exists, for example.

Further features of the invention will be described or will become apparent in the course of the following detailed description.

BRIEF DESCRIPTION OF THE DRAWINGS

In order that the invention may be more clearly understood, at least one embodiment thereof will now be described in detail by way of example, with reference to

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
