

US005421013A

United States Patent [19] Smith

[11] Patent Number: **5,421,013**

[45] Date of Patent: **May 30, 1995**

- [54] AGENT-BASED MULTITHREADING APPLICATION PROGRAMMING INTERFACE
- [75] Inventor: Curtis A. Smith, West Jordan, Utah
- [73] Assignee: Park City Group, Inc., Park City, Utah
- [21] Appl. No.: 88,825
- [22] Filed: Jul. 8, 1993
- [51] Int. Cl.⁶ G06F 13/00
- [52] U.S. Cl. 395/650; 364/DIG. 1; 364/284.3; 364/281.3; 364/281.7
- [58] Field of Search 395/700, 650
- [56] **References Cited**

[57] ABSTRACT

An application programming interface facilitates development of portable, multithreaded application programs. An application is a collection of instances of agent classes. Agent classes are organized in class hierarchies because new subclass agents may be derived from existing base class agents. Each agent class has its own message dispatching function; this allows the application programmer to alter the message passing framework provided by the application programming interface. Each agent instance within the program is independent because it is a sub-process aware only of its own data and context. Multithreading is provided by the application programming interface which contains a master dispatcher process non-preemptively allocating time to individual agents. Therefore, an application's multithreading capability is independent of the platform's operating system. In addition, a thread of execution may be split when the currently activated agent activates the master dispatcher. The application programming interface mediates between the system resources and the application, and maps the user interface of the application to the platform's chosen user interface. Therefore, the application and its user interface are portable.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
