## Table of Contents

|   |           |
|---|-----------|
| <i>Preface</i> .....                        | <i>xi</i> |
| <b>1: Overview of TCP/IP</b> .....          | <b>1</b>  |
| TCP/IP and the Internet .....               | 2         |
| A Data Communications Model .....           | 5         |
| TCP/IP Protocol Architecture .....          | 8         |
| Network Access Layer .....                  | 11        |
| Internet Layer .....                        | 11        |
| Transport Layer .....                       | 17        |
| Application Layer .....                     | 21        |
| Summary .....                               | 22        |
| <b>2: Delivering the Data</b> .....         | <b>23</b> |
| Addressing, Routing, and Multiplexing ..... | 23        |
| The IP Address .....                        | 25        |
| Subnets .....                               | 31        |
| Internet Routing Architecture .....         | 34        |
| The Routing Table .....                     | 36        |
| Address Resolution .....                    | 39        |
| Protocols, Ports, and Sockets .....         | 42        |
| Summary .....                               | 47        |

|  |            |
|--|------------|
| <b>3: Network Services</b> .....           | <b>48</b>  |
| Names and Addresses .....                  | 49         |
| The Host Table .....                       | 50         |
| Domain Name Service .....                  | 52         |
| Mail Services .....                        | 60         |
| Configuration Servers .....                | 71         |
| Bootstrap Protocol .....                   | 73         |
| File and Print Servers .....               | 76         |
| Summary .....                              | 78         |
| <b>4: Getting Started</b> .....            | <b>80</b>  |
| Connected and Non-Connected Networks ..... | 81         |
| Basic Information .....                    | 83         |
| Planning Routing .....                     | 91         |
| Planning Naming Service .....              | 94         |
| Other Services .....                       | 97         |
| Informing the Users .....                  | 100        |
| netconfig .....                            | 102        |
| Summary .....                              | 104        |
| <b>5: Basic Configuration</b> .....        | <b>105</b> |
| Kernel Configuration .....                 | 105        |
| Linux Kernel Configuration .....           | 106        |
| The BSD Kernel Configuration File .....    | 112        |
| The Internet Daemon .....                  | 118        |
| Summary .....                              | 121        |
| <b>6: Configuring the Interface</b> .....  | <b>123</b> |
| The ifconfig Command .....                 | 123        |
| TCP/IP Over a Serial Line .....            | 137        |
| Installing PPP .....                       | 140        |
| Installing SLIP .....                      | 153        |
| Summary .....                              | 162        |
| <b>7: Configuring Routing</b> .....        | <b>164</b> |
| Common Routing Configurations .....        | 164        |
| The Minimal Routing Table .....            | 165        |
| Building a Static Routing Table .....      | 167        |
| Interior Routing Protocols .....           | 173        |

Exterior Routing Protocols ..... 184  
Gateway Routing Daemon ..... 187  
Configuring gated ..... 189  
Summary ..... 200

**8: Configuring DNS Name Service ..... 202**  
BIND: UNIX Name Service ..... 202  
Configuring the Resolver ..... 205  
Configuring named ..... 208  
Using nslookup ..... 221  
Summary ..... 225

**9: Configuring Network Servers ..... 226**  
The Network File System ..... 226  
Line Printer Daemon ..... 240  
Network Information Service ..... 245  
A BOOTP Server ..... 250  
DHCP ..... 258  
Managing Distributed Servers ..... 263  
Mail Servers ..... 266  
Summary ..... 269

**10: sendmail ..... 271**  
sendmail's Function ..... 272  
Running sendmail as a Daemon ..... 273  
sendmail Aliases ..... 274  
The sendmail.cf File ..... 276  
sendmail Configuration ..... 283  
Rewriting the Mail Address ..... 295  
Modifying a sendmail.cf File ..... 304  
Testing sendmail.cf ..... 308  
Summary ..... 318

**11: Troubleshooting TCP/IP ..... 319**  
Approaching a Problem ..... 320  
Diagnostic Tools ..... 322  
Testing Basic Connectivity ..... 324  
Troubleshooting Network Access ..... 328  
Checking Routing ..... 335  
Checking Name Service ..... 341

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
