VII.	CLARK.....	17
VIII.	VALIDITY ANALYSIS FOR THE CHALLENGED CLAIMS	22
	A. Petitioner Does Not Establish a Prima Facie Case that Griffin Discloses an “Instant Voice Message”	22
	B. Griffin plus Zydney Does Not Disclose a Network Interface Connected to a Packet-Switched Network	23
	C. Zydney Does Not Render Obvious “Wherein the Instant Voice Messaging Application Includes a Document Handler System for Attaching One or More Files to the Instant Voice Message”	25
	D. No Prima Facie Showing of a Database Record of a Message Database Including a Unique Identifier and an Instant Voice Message	29

IX. A PHOSITA WOULD NOT COMBINE GRIFFIN WITH ZYDNEY AS
PETITIONER SUGGESTS 35

X. A PHOSITA WOULD NOT COMBINE GRIFFIN PLUS ZYDNEY WITH
LOW AS PETITIONER SUGGESTS 41

XI. CONCLUSION..... 42

I, Chuck Easttom, hereby declare as follows:

I. INTRODUCTION

1. My name is William Charles Easttom II (“Chuck Easttom”). Uniloc Luxembourg S.A. (“Uniloc” or the “Patent Owner”) retained me to provide my expert opinions regarding United States Patent No. 8,724,622 (“the ’622 Patent”).

2. From 2003 to 2013, I taught professional development courses to IT professionals in programming (C, Java, C++, and C#), web development (HTML, JavaScript, CSS, and .net), networking, and network security at Collin College, McKinney, TX. From 2000 to 2003, I was Department Chair for Computer Information Systems at Remington College, in _____. I have been a software engineer at Alegis Corporation Systems Group and a programmer at Boeing Aerospace Operations.

3. The Patent Owner asked me to study Claims 3, 13–16, 19, 24–31, and 33 (the “challenged claims”) of the ’622 Patent (“EX1001”) to determine whether a person having ordinary skill in the technical art most pertinent to the art of the challenged claims at the priority date of the ’622 Patent (hereafter a “PHOSITA”) would have considered those claim obvious in light of the asserted references considered as a whole.

4. I reviewed the '622 Patent, its prosecution file wrapper, the state of the art at the time the application was filed, the references asserted by Samsung, Samsung's Petition IPR2017-1798 ("Petition"), the Declaration of Dr. Haas (EX1002) in support of the Petition, the references relied upon in the Petition (including *Zydney*, *Griffin*, *Clark*, *Vaananen*, and *Low*) and my own Declarations from IPR2017-01667 and IPR2017-01668 in support of the Patent Owner. IPR2017-01667 and IPR2017-01668 also involved a challenge to the '622 Patent based on *Zydney*. I also determined the scope and content of the prior art, ascertained the differences between the challenged claims and the prior art, and determined the level of ordinary skill in the art most pertinent to the claimed technology. All the opinions I express here are my own.

5. Based on the above, and my familiarity with those having ordinary skill in the art at the time the application was filed, and my decades of experience in the field of computer science including communications systems, I concluded that challenged the challenged claims would not have been obvious in light of the arguments and references relied upon in the Petition.

6. The Patent Owner compensates me at my standard consulting rate of \$300 per hour. Patent Owner also reimburses my reasonable expenses necessary to this work. I have no financial interest in Patent Owner, and my

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
