DECLARATION OF WILLIAM C EASTTOM II

Apple v. Uniloc, IPR2017-1804 Uniloc's Exhibit No. 2001

TABLE OF CONTENTS

I.	INTRODUCTION1
II.	BACKGROUND AND QUALIFICATIONS
III.	LEGAL STANARDS USED IN MY ANALYSIS
	A. Obviousness
	B. Priority Date4
	C. Person of Ordinary Skill in the Art4
	D. Broadest Reasonable Interpretation6
IV.	OVERVIEW OF THE '622 PATENT6
V.	CLAIM CONSTRUCTION9
	A. "instant voice messaging application"9
	B. "client platform system"
	C. "communication platform system"
VI.	PETITIONERS' CITED REFERENCES
	A. International Application WO 01/11824 ("Zydney")17
	B. Excerpt of Computer Networking Essentials ("Shinder")21
	C. U.S. Patent No. 6,725,228 ("Clark")
	D. U.S. Patent No. 6,750,881 ("Appelman")26
VII.	VALIDITY ANALYSIS
	A. Zydney does not render obvious "wherein the instant voice messaging application includes a document handler system for attaching one or more files to the instant voice message" (claim 27)

	B. Zydney does not render obvious "wherein the instant voice message includes an object field" (independent claim 3)
	C. No prima facie obviousness for "wherein the instant voice messaging application includes a message database storing the instant voice message, wherein the instant voice message is represented by a database record including a unique identifier" (dependent claims 14-17 and 28-31) 34
	Zydney and Clark both lack a database record in a message database, where that database record includes both a unique identifier and an instant voice message
	2. There could not have been any motivation to combine Zydney with Clark to devise a database record that included a unique identifier
	3. No prima facie obviousness because Petitioners' proposed combination of Zydney with Clark results in messages being deleted once they are sent to the server
	D. No prima facie obviousness for "a display [at the client device] displaying a list of one or more potential recipients" (claims 38-39)41
VIII	CONCLUSION

I, Chuck Easttom, hereby declare as follows:

I. INTRODUCTION

- 1. My name is William Charles Easttom II (Chuck Easttom) and I have been retained by Uniloc, USA, Inc., and Uniloc Luxembourg S.A. ("Uniloc" or the "Patent Owner") to provide my expert opinions regarding U.S. Patent No. 8,724,622 (the '622 Patent). In particular, I have been asked to opine on whether a person of ordinary skill in the art (POSITA) at the time the inventions described in the '622 patent were conceived would have found all claims, Claims 3, 6-8, 10, 11, 13, 14-23, 27-35, 38, and 39 ("Challenged Claims") as obvious in light of the following referenced cited in IPR2017-01667:
 - Ex. 1003, PCT Patent Application No. PCT/US00/21555 ("Zydney")
 - Excerpts from Debra Littlejohn Shinder, Computer Networking Essentials ("Shinder")
 - Ex. 1007, U.S. Patent No. 6,725,228 ("Clark")
 - Ex. 1008, U.S. Patent No. 6,750,881 ("Appelman")
- 2. Based on my review of the prior art then available, my understanding of the relevant of the relevant requirements of patent law, and my decades of experience in the field of computer science including communications systems, it is my opinion that the Challenged Claims would not have been obvious in light of the proposed combinations.

3. I am being compensated for my time at my standard consulting rate of \$300 per hour. I am also being reimbursed for expenses that I incur during the course of this work. Apart from that, I have no financial interest in Uniloc. My compensation is not contingent upon the results of my study or the substance of my opinions.

II. BACKGROUND AND QUALIFICATIONS

- 4. In my over 25 years of computer industry experience I have had extensive experience in communications systems, including data networks in general that have messaging capabilities. I hold 42 industry certifications, which include (among others) networking certifications. I have authored 24 computer science books, several of which deal with networking topics. I am also the sole named inventor on thirteen patents.
- 5. A more detailed description of my professional qualifications, including a list of publications, teaching, and professional activities, is contained in my curriculum vitae, a copy of which is attached hereto as Exhibit A.

III. LEGAL STANARDS USED IN MY ANALYSIS

6. Although I am not an attorney and I do not offer any legal opinions in this proceeding, I have been informed of and relied on certain legal principles in reaching the opinions set forth in this Declaration.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
