- Introducing Mozilla
- Understanding the Netscape Open Source Program
 - Licensing Issues
 - Exploring mozilla.org

Introducing Mozilla and the Netscape Open Source Program

Early in 1998, Netscape announced to the world that it would provide the source code for Netscape Communicator freely to the Internet community and that this free version of Communicator would be known as *Mozilla*. Mozilla is possibly the single most important development in the history of the Open Source movement — and that's saying a lot considering its predecessors are the likes of Linux, BSD Unix, and Apache. Mozilla is so important because it is a

Microsoft Corp. Exhibit 1060 3

cornerstone application for everything the Internet has to offer, from browsing to e-mail to newsgroups and more.

Every day millions of people access the Internet, or Net, using Communicator. As the number of Net users grows, so do the number of people who use browsers, and a large portion of these users will use browsers based on the Mozilla source code. As a programmer, you have an opportunity to be a part of this historic development, writing code for what could become one of the most widely used applications of all time.

Because Mozilla is so large and complex, there are always hundreds of different initiatives ongoing at mozilla.org, the official headquarters of Netscape's Open Source movement. By becoming a member of the Mozilla team, you can help implement projects you find interesting regardless of whether you want to program, track down bugs, or write documentation. You can even go it alone and develop your own custom solutions using Mozilla.

Introducing Mozilla

Mozilla is many things to many people, and this is because the word's meaning has evolved over time. Mozilla was introduced to the world with Netscape Navigator. It is the original code name for the browser and later for Communicator. It is the internal code name that Navigator and Communicator report in the HTTP header request. It is also the name of Netscape's mascot, a friendly, fire-breathing dinosaur. When Netscape released the source code for Netscape Communicator, mozilla.org adopted the term as well, using it as the catchword for both the free software version of Netscape Communicator and any browsers developed from this code.

So What Is Mozilla?

With so many meanings, it is difficult to know what Mozilla is and isn't. In this book, Mozilla is the name for the free software version of Communicator. Mozilla

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
