### **Warning and Disclaimer**

This book is designed to provide information about Cisco's proprietary Internetwork Operating System (IOS) software architecture. Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied.

The information is provided on an "as is" basis. The author, Cisco Press, and Cisco Systems, Inc., shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the discs or programs that may accompany it.

The opinions expressed in this book belong to the author and are not necessarily those of Cisco Systems, Inc.

### **Trademark Acknowledgments**

All terms mentioned in this book that are known to be trademarks or service marks have been appropriately capitalized. Cisco Press or Cisco Systems, Inc. cannot attest to the accuracy of this information. Use of a term in this book should not be regarded as affecting the validity of any trademark or service mark.

### **Feedback Information**

At Cisco Press, our goal is to create in-depth technical books of the highest quality and value. Each book is crafted with care and precision, undergoing rigorous development that involves the unique expertise of members from the professional technical community.

Readers' feedback is a natural continuation of this process. If you have any comments regarding how we could improve the quality of this book, or otherwise alter it to better suit your needs, you can contact us through e-mail at [ciscopress@mcp.com](mailto:ciscopress@mcp.com). Please make sure to include the book title and ISBN in your message.

We greatly appreciate your assistance.

## About the Authors

**Vijay Bollapragada**, CCIE #1606, is currently a manager in the Solution Engineering team at Cisco, where he works on new world network solutions and resolves complex software and hardware problems with Cisco equipment. Vijay also teaches Cisco engineers and customers several courses, including Cisco Router Architecture, IP Multicast, Internet Quality of Service, and Internet Routing Architectures. He is also an adjunct professor in Duke University's electrical engineering department.

**Curtis Murphy**, CCIE #1521, is an engineer in Cisco's Serviceability Design Department in Research Triangle Park, specializing in IOS software products. He has worked in the networking industry since 1989 and at Cisco since 1994. While at Cisco, he has worked both as an IBM protocols specialist in the Technical Assistance Center and as a software engineer in IOS Software Development for mid-range and high-end routers.

**Russ White**, CCIE #2635, currently is working on the IOS Network Protocols Deployment and Scalability Team, where he is involved in the design and implementation of routing protocols and scalable network design. Russ is the co-author of the Cisco Press title *CCIE Professional Development: Advanced IP Network Design* (ISBN: 1-57870-097-3), published in June 1999.

## About the Technical Reviewers

**Michael Brown**, CCIE #2249, is an ISP Support engineer for Cisco Systems. He earned his bachelor of science degree in electrical engineering from North Carolina State University. In the 11 years he has worked in the networking industry, he has supported a variety of customer networks and technologies. He spent three and half years supporting customers in the Cisco Technical Assistance Center in Brussels, Belgium, before joining the Cisco ISP Support team in Research Triangle Park, NC. He has taught several router architecture courses to Cisco internal audiences and to Cisco customers.

**Jennifer DeHaven Carroll**, CCIE #1402, is a principal consultant for Lucent Technologies, NetworkCare Professional Services. She earned her bachelor of science degree in computer science from University of California, Santa Barbara. In the past 11 years, Jennifer has planned, designed, and implemented many Cisco-based networks, utilizing all the various IOS switching and packet queuing methods.

**Ron Long** is the Director of Internet Development for a large, southwestern integrated communications provider. He is responsible for the planning, extension, development, and implementation of Internet services and Layer 2-3 access. Ron entered the networking industry in 1995 when he co-founded an ISP in a small town in Texas. Since then, Ron has provided consulting services and has implemented Cisco solutions to Fortune 1000 companies across the globe.

**Alexander Marhold**, CCIE #3324, holds an MSC degree in industrial electronics and an MBA. He works as Senior Consultant and Manager at PROIN, a leading European training and consulting company. His focus areas are core routing and service provider issues, such as MPLS, Local Loop, Network Design, and Implementation. Beside his works as a consultant, Alexander is also a CCSI and develops and holds specialized trainings in the service provider area. His previous working experiences also include academic teaching at a polytechnical university for telecommunications, as well as working as CIM-Project Manager in the chemical industry.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
