Cisco Completes Acquisition of Springpath

Cisco Completes Acquisition of Springpath

Delivering next-generation data center innovation.

Read announcement

⌐ Overview

SAN JOSE, Calif. – On September 22, 2017: Cisco completed the acquisition of Springpath, Inc., a Sunnyvale-based leader in hyperconvergence software. This acquisition will allow Cisco to continue to deliver next-generation data center innovation to its customers. Springpath has developed a distributed file system purpose-built for hyperconvergence that enables server-based storage systems.

The acquisition is the culmination of a long-standing strategic relationship between Cisco and Springpath. The companies have worked together since early 2016 to launch HyperFlex, the industry's first fully integrated hyperconvergence infrastructure system. Together Cisco and Springpath will to continue to deliver next-generation data center innovation to our customers.
