A network-based system is provided for enabling agent-users of the system to obtain current client-status information related to clients of an information-source facility connected to the network in order to optimize callback-connection success from the agent-users to the monitored clients. The system comprises, a first server node connected to the information-source facility and to the network, a second server node connected to the first server node and to the network, the second server node accessible to the first server node, a network-capable appliance connected to the network, the second server node accessible to the network-capable appliance, an agent workstation connected to the network and to the first server node, the first server node accessible to the agent workstation and a software application distributed on at least the first and second server nodes, the software application enabling distribution of the client-status information. The agent-user operating the agent workstation accesses the first server node and subscribes to the client-status information, the client-status information is accessed from the second server node by the first server node and delivered to the requesting agent-user.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
