Art Unit: 2711

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 18-29 are rejected under the judicially created doctrine of double patenting over claims 1-17 of U. S. Patent No. 5,761,606 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the providing of an online address with a video program, the electronic extraction of the address, the visual or auditory indication of the presence of an address, and the establishing of a communication link with an online information source associated with the address.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application

which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968).

See also MPEP § 804.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 18-20, 22, 23, 25, and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Honey et al (5,912,700), cited by the examiner.

Note the Honey et al reference, Figure 21 and the disclosure of col. 25, lines 38-67, which discloses hardware at a viewer's home which allows for the enhancement of television presentations based on non-video data. Particularly, television signals are received at by a television and sent to a decoder (which is a stand-alone decoder or one incorporated within a computer) to remove data from the vertical blanking interval of the signals. The decoder removes this non-video data, which may be one or more addresses of web-pages on the Internet, and displays the data in a window on the display of the computer such that the user is able to click on an address with a mouse or other input means, thus causing software in the computer (e.g. Mosaic or Netscape) to load the addressed web page.
