

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

NEVRO CORP.
Petitioner

v.

BOSTON SCIENTIFIC NEUROMODULATION CORP.
Patent Owner

**PETITION FOR *INTER PARTES* REVIEW
OF U.S. PATENT NO. 8,646,172**

Mail Stop "PATENT BOARD"
Patent Trial and Appeal Board
U.S. Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

TABLE OF CONTENTS

I.	Introduction.....	1
II.	Statement of Unpatentability Grounds for Claims 1-11 of the '172 Patent....	6
III.	Level of Ordinary Skill in the Art	7
IV.	Claim Construction.....	8
V.	Summary of the Unpatentability Argument for Independent Claim 6.....	10
A.	Overview of the '172 Patent.....	11
B.	The Prosecution History	17
C.	Independent Claim 6 is Unpatentable Over Stolz, Ormsby, and Black.....	18
1.	The steps of manufacturing the stimulation lead assembly described by the '172 patent claims were well-known by January 2005.	19
2.	Placing non-conductive material in empty portions of a conductor lumen, including radially beneath conductive contacts, and then heating and reflowing the non-conductive material would have been obvious by January 2005.	23
VI.	Ground 1: The Combination of Stolz, Ormsby, and Black Renders Obvious Claims 1-5 of the '172 Patent	28
A.	Independent Claim 1	28
1.	“a method of manufacturing a stimulation lead comprising” ...	28
2.	“providing a lead body comprising an insulation section, the insulation section defining a central lumen extending along the insulation section and a plurality of conductor lumens extending along the insulation section and arranged around, and external to, the central lumen,”	28
3.	“the lead body further comprising a plurality of conductive contacts located along an axial end of the lead body, and a plurality of conductor wires, wherein each of the conductor wires is disposed within one of the plurality of conductor lumens and each of the conductor lumens of the plurality of conductor lumens has at least one of the conductor wires of the plurality of conductor wires disposed therein, wherein a	

	portion of the conductor lumens is disposed radially beneath the conductive contacts”	31
4.	“after providing the lead body, conductively coupling at least one of the plurality of conductor wires to each of the conductive contacts”	34
5.	“after providing the lead body, placing non-conductive material into a portion of at least one of the conductor lumens of the lead body, wherein at least a portion of the non-conductive material is disposed radially beneath the conductive contacts”	37
B.	Claim 2	46
1.	“The method of claim 1”	46
2.	“further comprising heating the non-conductive material to cause the non-conductive material to thermally reflow or melt”	46
C.	Claim 3	48
1.	“The method of claim 1”	48
2.	“wherein placing non-conductive material comprises placing the non-conductive material into a portion of each of the conductor lumens of the lead body, wherein at least a portion of the non-conductive material in each of the conductor lumens is disposed radially beneath the conductive contacts”	48
D.	Claim 4	49
1.	“The method of claim 1”	49
2.	“further comprising placing spacers between pairs of adjacent conductive contacts”	50
E.	Claim 5	51
1.	“The method of claim 4”	51
2.	“further comprising heating the non-conductive material and spacers to cause the non-conductive material to thermally reflow or melt and to cause the non-conductive material and spacers to thermally fuse together”	51

VII. Ground 2: The Combination of Stolz, Ormsby, Black, and Modern Plastics Encyclopedia Renders Obvious Claims 6-11 of the '172 Patent	52
A. Independent Claim 6	52
1. “A method of making a stimulation lead, comprising”	56
2. “providing a lead body comprising a [sic] insulation section, the insulation section defining a central lumen extending along the insulation section and a plurality of conductor lumens extending along the insulation section and arranged around, and external to, the central lumen”	56
3. “the lead body further comprising a plurality of conductive contacts located along an axial end of the lead body, and a plurality of conductor wires, wherein each of the conductor wires is disposed within one of the plurality of conductor lumens and each of the conductor lumens of the plurality of conductor lumens has at least one of the conductor wires of the plurality of conductor wires disposed therein, wherein a portion of the conductor lumens is disposed radially beneath the conductive contacts”	57
4. “after providing the lead body, conductively coupling at least one of the plurality of conductor wires to each of the conductive contacts”	57
5. “after providing the lead body, placing non-conductive material into a portion of at least one of the conductor lumens of the lead body, wherein at least a portion of the non-conductive material is disposed radially beneath the conductive contacts”	57
6. “after placing the non-conductive material, heating the non- conductive material at a temperature in a range of 140 to 250 degrees Celsius for a period in a range of 15 to 120 seconds to cause the non-conductive material to thermally reflow or melt”	58
B. Claim 7	61
1. “The method of claim 6”	61

2.	“wherein the plurality of conductor lumens is exactly eight conductor lumens”	61
C.	Claim 8	62
1.	“The method of claim 6”	62
2.	“wherein placing non-conductive material comprises placing the non-conductive material into a portion of each of the conductor lumens of the lead body, wherein at least a portion of the non-conductive material in each of the conductor lumens is disposed radially beneath the conductive contacts”	62
D.	Claim 9	62
1.	“The method of claim 6”	62
2.	“further comprising placing spacers between pairs of adjacent conductive contacts”	63
E.	Claim 10	63
1.	“The method of claim 9”	63
2.	“wherein heating the non-conductive material comprises heating the non-conductive material and spacers to cause the non-conductive material to thermally reflow or melt and to cause the non-conductive material and spacers to thermally fuse together”	63
F.	Claim 11	63
1.	“The method of claim 6”	63
2.	“wherein the non-conductive material comprises polyurethane”	64
VIII.	Nevro is Unaware of Any Secondary Considerations of Non-Obviousness.....	65
IX.	Standing (37 C.F.R. § 42.104(a))	65
X.	Mandatory Notices (37 C.F.R. § 42.8)	65
A.	Real Party In Interest.....	65
B.	Related Matters.....	66
C.	Lead and Back-up Counsel	66

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
