LEARNING that you have cancer can be overwhelming.

While many people know about breast cancer, most patient information focuses on early-stage breast cancers. It is a challenge to find good information on metastatic breast cancer. The goal of this book is to help people with metastatic breast cancer get the best cancer treatment. It explains which cancer tests and treatments are recommended by experts in breast cancer.

The National Comprehensive Cancer Network® (NCCN®) is a not-for-profit alliance of 27 of the world's leading cancer centers. Experts from NCCN have written treatment guidelines for doctors who treat breast cancer. These treatment guidelines suggest what the best practice is for cancer care. The information in this patient book is based on the guidelines written for doctors.

This book focuses on the treatment of metastatic breast cancer. Key points of the book are summarized in the [NCCN Quick Guide™](#). NCCN also offers patient resources on early-stage breast cancer, locally advanced breast cancer, ovarian cancer, and other cancer types. Visit NCCN.org/patients for the full library of patient books, summaries, and other resources.

About

These patient guides for cancer care are produced by the National Comprehensive Cancer Network® (NCCN®).

The mission of NCCN is to improve cancer care so people can live better lives. At the core of NCCN are the NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®). NCCN Guidelines® contain information to help health care workers plan the best cancer care. They list options for cancer care that are most likely to have the best results. The NCCN Guidelines for Patients® present the information from the NCCN Guidelines in an easy-to-learn format.

Panels of experts create the NCCN Guidelines. Most of the experts are from NCCN Member Institutions. Their areas of expertise are diverse. Many panels also include a patient advocate. Recommendations in the NCCN Guidelines are based on clinical trials and the experience of the panelists. The NCCN Guidelines are updated at least once a year. When funded, the patient books are updated to reflect the most recent version of the NCCN Guidelines for doctors.
