Diesel/Marine Diesel and Jet Fuels Microbiocide

BioborJF® was specially formulated and introduced in 1965 to one of the harshest and most safety-conscious industries in the world, the commercial and military jet aircraft industry. For over 45 years **BioborJF®** has maintained and even enhanced its position as the worldwide leader in the disinfection of microbial growth in both jet engines and jet fuel storage tanks, in addition to the marine diesel work boat and pleasure boat markets.

BioborJF® has expanded its user base to include railroads, marine diesel fuels, standby power generators, construction equipment, bulk blending, bulk storage, petrochemicals, home heating oil, diesel trucking and RV's-solving fuel problems for consumers worldwide. From the U.S. and Canada, to South America, Europe and Asia, **BioborJF**® continues to give customers the product to combat microbial growth. From jet engines on a military or commercial aircraft, to marine diesel engines on a commercial tugboat or luxury yacht, from standby power generators at a hospital to an RV power plant, **BioborJF**® has proven itself over and over again, unsurpassed in quality, performance and dependability. The need was then...the need is now...the product is **BioborJF**®.

BioborJF[®], the Worldwide Standard Since 1965, is a low-cost preventative maintenance additive to protect your investment, and in both new and used fuel tanks. Plus prevents rust and corrosion while eliminating the need for expensive fuel polishing. Constant use of **BioborJF**[®] will keep fuel filters clean, protect rubber fuel system components, lowering maintenance costs while improving fuel effectively.

BioborJF[®] also adds lubricity to all low sulfur fuels that have been mandated by the EPA. The addition of **BioborJF**[®] to fuel, brings the lubricity in the fuel up to ASTM standards which again allows increased fuel efficiency.

Container sizes and dosage rates—Biobor,JF® is available in 8 oz. and 16 oz. Easy Squeeze containers designed to dispense the exact measure every time, along with 1 quart cans, 1 gallon containers, 5 gallon pails, and 55 gallon drums. Use the following chart to calculate how much Biobor,JF® you need for proper fuel treatment.

Fuel to be treated (in gal.)	40	100	500	1,000
Biobor® JF (in oz.) Maintenance Dosage	1/2	11/2	7	14
Shock Treatment	1	3	14	28

Other Hammonds Products—Ask your distributor about other Hammonds products:

- BioborEB® LubriBor®
- BioborMD[®] HumBug Detector[®] Kit

Questions? To contact a Hammonds Fuel Additives specialist, or to locate the Hammonds distributor nearest you, please call us at (800) 548-9166.

BioborJF® kills fungi, bacteria and **micro-organisms** which cause **fuel tank contamination...**

- Disperses and prevents sludge
- Prevents clogged filters
- Adds lubricity to low sulfur fuels, exceeding ASTM Standards
- Recommended by airframe and equipment manufacturers around the world (See back for current list)
- ✓ MIL-S-53021A
