[57] **ABSTRACT**

A holster arrangement for a transportable communications device that is worn by a user and is arranged to have a holder portion positioned on either side of the user's torso. Straps extending from a shoulder pad are utilized to support the holder portion and to secure the holster arrangement to the user. The holder portion is arranged to support a case in varied positions with the case being mountable on the holder portion at a substantially vertical position and at angular positions to the holder portion. Two angular mounting positions are provided to facilitate the use of the holster arrangement when fitted to either side of the user. The case for holding the communications device is readily detached from the holder of the holster arrangement.
