

US7256486 vs. Seoul Semiconductor Z Power LED – Z7, Z7-F Series and all predecessor and successor models, all products containing the same or similar features as those identified in the accompanying charts, all products including or incorporating any of these products as components (such as luminaires, lighting fixtures, bulbs, or any other consumer product).

1 (Preamble)

A semiconductor device, comprising:

SEOUL SEMICONDUCTOR

Description

The Z-Power series is designed for high current operation and high flux output applications. It incorporates state of the art SMD design and low thermal resistant material.

The Z Power LED is ideal light sources for general illumination applications, custom designed solutions, automotive, large LCD backlights and high performance torches.

Applications

- General Torch
- Architectural lighting
- Task lighting
- Decorative / Pathway lighting
- Remote / Solar powered lighting
- Street lighting

Comment: *As shown in the image and schematic drawing, LED has a planar substrate having a top major surface and a bottom major surface (opposite major surfaces).*

1 (b):

*an electrically
conductive mounting
pad located on one of
the major surfaces of
the substrate;*

Comment: *As shown in the figure, the top major surface of the substrate includes one or more mounting pads.*

1 (c):

a light emitting diode (LED) having a metallized bottom major surface that is mounted on the electrically conductive mounting pad, the metallized bottom major surface comprising one of an anode and a cathode of the LED;

Source: http://www.seoulsemicon.com/upload/Goods_Spec/SZW07A0A.pdf Page 3 and 5 of 23

Comment: *The metallized bottom surface of LED die includes an electrical contact (Anode or Cathode) which is further connected to the mounting pad. The other electrical contact is present on the top surface of the LED die.*

1 (d):

*a first electrically
conductive connecting
pad located on the
other of the major
surfaces of the
substrate; and*

Comment: *The figure shows the connecting pads present on the bottom major surface of the substrate.*

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
