ATTORNEYS FOR THE PLAINTIFFS

### UNITED STATES DISTRICT COURT NORTHERN DISTRICT OF CALIFORNIA SAN FRANCISCO DIVISION

UNILOC USA, INC., et al.,

Plaintiffs,

v.

APPLE INC.,

Defendant.

Case No.: 3:18-cv-00365-WHA

DECLARATION OF WILLIAM C. EASTTOM II IN REFERENCE TO PLAINTIFFS' OPPOSITION TO DEFENDANT'S MOTION FOR SUMMARY JUDGMENT

DATE: September 27, 2018 TIME: 8:00 a.m.

PLACE: Courtroom 12, 19th Floor JUDGE: Hon. William Alsup

### Case 3:18-cv-00365-WHA Document 147-3 Filed 09/06/18 Page 3 of 90

- 1. I, William C. Easttom II (Chuck Easttom), declare as follows:
- 2. I am a computer science expert retained by Uniloc in this matter. I have been asked by Uniloc to review technical materials, including patents and source code, to test certain Apple devices, and to provide my observations and opinions, which are set forth below and in the attached Exhibits.
- 3. I have been working professionally in the computer science industry for over 25 years. I have extensive experience with programming in a wide range of languages, including programming of apps for mobile devices. I have both developed mobile phone apps and taught mobile phone app programming for both iOS and Android. I also have extensive experience with mobile device forensics. I am the author of 26 computer science books, approximately 50 research articles, and an inventor of 14 computer science related patents. I have been a speaker at over 50 computer science related venues including being an invited speaker, keynote speaker, and/or chairing sessions.
- 4. I am also a member of the IEEE Systems and Software Engineering Standards
  Committee, as well as a Distinguished Speaker of the Association of Computing Machinery
  (ACM). During the late 1990's I was working as a software engineer developing
  telecommunications software. I have direct experience with the technology used in the timeframe
  of the patent in suit. Further details regarding my qualification can be found in my complete
  curriculum vitae, which I have attached to this declaration, as Exhibit A.
- 5. I have inspected source code produced for inspection by Apple in this action, and in other actions brought by Uniloc against Apple. I have conducted direct experiments using a variety of Apple products including the iPhone, iPad/iPod touch, and Apple Watch. The details of those experiments are provided in Exhibit B to this declaration. I have also conducted direct analysis of the HDMI to lightning adapters. The details of that analysis are in Exhibit C to this declaration. Furthermore, I have examined the Pebbles product, and the details of that analysis are in Exhibit D.
  - 6. I have reviewed United States Patent No 6,216,158 (the '158 patent), the application for which was filed January 25, 1999. I have reviewed Apple's Opposition to Uniloc's Motion for Summary Judgment of Infringement of Claim 9 of U.S. Patent No. 6,216,158 and Apple's Cross-

CASE NOS. 3:18-CV-00365-WHA & -00572-WHA

### Case 3:18-cv-00365-WHA Document 147-3 Filed 09/06/18 Page 4 of 90

Motion for Summary Judgment of Non0-Infringement, Invalidity, and Unpatentability, along with the Exhibits to Apple's brief. I have also reviewed the deposition transcripts for the depositions of Dr. Myers, Apple's expert, and two Apple witnesses: Theresa Lanowitz and Aurie Bendahan. As I explain in this declaration, it is my opinion that Apple has failed to show that claim 9 of U.S. Patent No. 6,216,158 ("the '158 Patent") is not infringed or is invalid.

### I. RESPONSE TO APPLE'S CLAIMS

- 7. In this section I provide my response to Apple's claims via their counsel and their expert witness(s).
- 8. Apple has alleged that "Claim 9 of the '158 Patent is invalid under 35 U.S.C. §§ 102(a), 102(g), and/or 103 as anticipated by, or obvious over, the "Pebbles Project" and/or "Jini" prior art;" Claim 9 of the '158 patent is dependent upon claim 8, and both claims are provided below:
  - 8. A method of controlling a program on a network device from a palm sized computer, the computer is not capable of executing the program by itself, the network device and computer being coupled in communications via a network, the method comprising: accessing a directory of services, a service in the directory of services corresponding to the program, the description of the service including at least a reference to program code for controlling the service; loading the program code; issuing control commands to the network device using the program code, the control commands causing the network device to control the program.
  - 9. The method of claim **8**, wherein loading the program code includes loading the program code onto the palm sized computer and the issuing the control commands includes the palm sized computer issuing the control commands.

#### **Pebbles**

9. Pebbles is an experimental device created by Dr. Myers, Apple's expert. I have reviewed Dr. Myers' testimony regarding Pebbles, including his deposition transcript, the documents describing Pebbles cited by Apple, as well as inspected a device produced by Apple, which I understand to be a version of Pebbles. In my opinion, as I explain in further detail below,

### Case 3:18-cv-00365-WHA Document 147-3 Filed 09/06/18 Page 5 of 90

the information that I reviewed about Pebbles does not teach each and every feature of Claim 9 of the '158 patent.

- 10. The first issue is Claim 8 requires a method of controlling a program on a network device. There are two significant problems with the Pebbles product in relation this claim element.
- 11. The first problem with Pebbles is that it doesn't include the "on a network" clause. While I understand that Apple has claimed that Pebbles operates on a network, my experimentation with the product did not validate this claim. Those experiments are detailed in exhibit D. In fact, the latest version of Pebbles that I was provided with, Pebbles v2, did have a choice to select a network, but when I selected that choice, absolutely nothing happened. There was no network communication, attempt to communicate over a network, nor prompt to choose a network.
- 12. On paragraph 88 of his declaration, Dr. Myers claimed that serial connections are networks. "The Pebbles system used a serial connection between the PC and at least one PalmPilot. In our lab, we tested up to four PalmPilots simultaneously using a serial hub that allowed the four PalmPilots to be networked to the PC."
- 13. The first problem with this claim is that Dr. Myers' own Pebbles website does not consider serial communications to be networks. This is shown in the following screenshot from http://www.cs.cmu.edu/~pebbles/v5/overview/software.html:

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

### **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

### **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
