10.1.	Claim 1 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	50
10.1.1.	[1.P] A method for network communication, the method comprising: .....	50
10.1.2.	[1.1] receiving a plurality of packets from the network, each of the packets including a media access control layer header, a network layer header and a transport layer header; .....	50
10.1.3.	[1.2] processing the packets by a first mechanism, so that for each packet the network layer header and the transport layer header are validated without an interrupt dividing the processing of the network layer header and the transport layer header; .....	52
10.1.4.	[1.3] sorting the packets, dependent upon the processing, into first and second types of packets, so that the packets of the first type each contain data;.....	54
10.1.5.	[1.4] sending, by the first mechanism, the data from each packet of the first type to a destination in memory allocated to an application without sending any of the media access control layer headers, network layer headers or transport layer headers to the destination.....	55
10.2.	Claim 2 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	57

10.2.1.	[2.1] The method of claim 1, wherein processing the packets by a first mechanism further comprises: processing the media access control layer header for each packet without an interrupt dividing the processing of the media access control layer header and the network layer header.....	57
10.3.	Claim 3 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	57
10.3.1.	[3.1] The method of claim 1, further comprising: processing an upper layer header of at least one of the packets by a second mechanism, thereby determining the destination, wherein the upper layer header corresponds to a protocol layer above the transport layer.....	57

10.4.1.	[4.1] The method of claim 1, further comprising: processing an upper layer header of at least one of the packets of the second type by a second mechanism, thereby determining the destination.....	59
10.5.	Claim 5 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	60
10.5.1.	[5.1] The method of claim 1, further comprising: processing a transport layer header of another packet by a second mechanism, prior to receiving the plurality of packets from the network, thereby establishing a Transmission Control Protocol (TCP) connection for the packets of the first type.....	60
10.6.	Claim 6 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	62
10.6.1.	[6.1] The method of claim 1, wherein sorting the packets includes classifying each of the packets of the first type as having an Internet Protocol (IP) header and a Transmission Control Protocol (TCP). .....	62
10.7.	Claim 7 is unpatentable as obvious over Erickson in combination with Tanenbaum96 and Alteon .....	63
