Submitted to the Department of Electrical Engineering and  
Computer Science on August 29, 1997 in partial fulfillment of the  
requirements for the degree of Master of Science

## ABSTRACT

Prolac is a new statically-typed object-oriented programming language designed for implementing network protocols. Prolac is designed to make protocol specifications *readable* to human beings, and thus more likely to be correct; easily *extensible* to accommodate protocol enhancements; and *efficient* when compiled.

We present an overview of the Prolac language and a discussion of issues and principles in its design, as well as a preliminary language reference manual. The *prolacc* optimizing protocol compiler is also described. A prototype TCP specification is presented that is both readable and extensible; experience with the specification suggests that, even untuned, Prolac overhead is negligible on normal networks.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
